**FREE** With

**LUCKY 7**  
**COLLECTION**

**Berry's "Favorite" Collection**  
**\$1 VALUE FREE**

A collection you have always wanted, containing favorite vegetable varieties, and large quantities of Berry's highest quality seeds to insure fresh vegetables all season, and a prize winning garden.

We have made Berry's "Favorite" collection a big \$1.00 bargain containing more seeds and better varieties than regular \$1.00 offers. It will produce enough vegetables for a family of 5 that would cost many times \$1.00 if purchased from the market.

17 favorite home garden vegetables and 19 best varieties. All 19 extra large packets in Berry's "Favorite" collection free with your order for Berry's "Lucky 7" Collection \$1.49 postpaid. A big free gift for a small order. Here it is. Look it over. **ACT NOW!**

- 1/2 oz. Detroit Dark Red Beet
- 1/2 oz. White Icicle Radish
- 1/2 oz. Scarlet Turnip White Tip Radish

**BERRY'S GREATEST BARGAIN**

**BERRY'S HYBRID SWEET CORN GARDEN**

**40¢**  
**LB.**

Plant Hybrid Sweet Corn for increased yields up to 50%. Hybrid Sweet Corn ears are large, deep kernalled, deliciously sweet and tender. Hybrid stocks are vigorous, drought and wind resistant, bearing at least two good ears at uniform height.

**HYBRID**  
**BERRY'S "Earli-Best"**

**Berry's "Best Early" Yellow Sweet Corn**

The best variety in your favorite Golden Bantam type 8-10 rowed. Selected for early maturity and extra fine quality from all hybrids developed to date. Because it matures uniformly, we recommend making several plantings at 6-8 day intervals. Plant 1/4 or 1/2 pound each time. No. 20X—Large pkt., 10c; 1/4 lb., 17c; 1/2 lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.65, postpaid.

**Berry's 8 Row Hybrid Blend**

A mixture of four finest hybrids, blended to make the earliest possible crop, and to insure superior hybrid flavor and quality over the longest possible period. For the earliest, most productive and finest quality Sweet Corn, plant this Hybrid blend to bear over a two to three weeks period. No. 201X—Large 2 oz. pkt., 10c; 1/4 lb., 15c; 1/2 lb., 22c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50 postpaid.

**35¢**  
**LB.**

**Berry's 12 Row Hybrid Blend**

A combination of 12 row hybrids with same plant heights and that mature at different times. Enjoy hybrid quality over a long picking period of at least two weeks by planting this blend. About 10 days later than our 8 row blend. No. 200X—Large 2 oz. pkt., 10c; 1/4 lb., 15c; 1/2 lb., 22c; 1 lb., 35c; 2 lbs., 65c; 5 lbs., \$1.50 postpaid.

**35¢**  
**LB.**

**STOWELL'S Evergreen Hybrid**

**A Favorite Variety at Its Best**

Of many hybrids developed of the Stowell's type, we have selected this as the best. It gives you unsurpassed Stowell's quality and increased yields. It is vigorous and highly resistant to disease, wind and drought. Plant successively at one week intervals. No. 287X—Large pkt., 10c; 1/4 lb., 17c; 1/2 lb., 25c; 1 lb., 40c; 2 lbs., 70c; 5 lbs., \$1.65, postpaid.

For other Sweet Corn prices see pages 9 and 11.

I URGE EVERY PERSON WHO READS  
THIS BOOK TO TRY SOME OF THESE  
EXTRA DELICIOUS VEGETABLES

Charles Sinn, Manager of our Garden Seed Department, grew up in the business. He is prepared to serve you personally and save you money.

## A VERY TENDER DWARF FIBERLESS BEAN

### Berry's Stringless Green Pod Bean

Absolutely the most vigorous growing, heavy yielding dwarf bean we ever saw. Of unsurpassed quality, it is absolutely stringless and fibreless. Very tender and mild flavored. Matures with the earliest, and outyields them all. Resistant to drouth and unusually hardy. Plant at least one pound early for table use; 2 or 3 pounds more later for canning. At these low prices, don't fail to have plenty. Lot 121X—Postpaid: Large 2 oz., pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 65c; 5 lbs., \$1.50.

The finest quality, heaviest yielding vegetable varieties I can offer you for your home garden, regardless of price. Thousands of customers by their repeat orders each year back my statement up. Let me send you all these favorites—8 packets—65c; any 5 your choice 40c.

## OUR BEST-A FAVORITE OF THOUSANDS

### Berry's Beat-'Em-All Radish

Think of it! Crisp, snappy radishes ready to eat 15 to 18 days after planting. A decidedly superior variety with sparkling red top and white tip. An extra early variety of superior quality for home or market. Save money by buying enough for a succession of plantings and enjoy fresh radishes all summer. Lot 725X—Postpaid: 1 pkt., 10c; oz., 20c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

## AN EARLY TOMATO of WONDERFUL QUALITY

### Berry's Early Wonder Tomato

A favorite with home and market gardeners for years. The very earliest tomato that gives you unsurpassed quality. The color is a deep, glossy, bright, brilliant red. The skin is smooth. The thick meat is finely flavored. The fruit is nearly round and large in size. Has a small seed cavity, firm but juicy flesh. A vigorous grower, it bears enormous crops, over a long period. Grow this tomato for the earliest finest quality fruit. Lot 156X — Postpaid: Pkt., 10c; oz., 40c; ¼ lb., \$1.50; ½ lb., \$2.75; 1 lb., \$5.00.

## DELICIOUSLY SWEET, TENDER, HEALTHFUL

### Berry's Tenderflesh Carrot

The finest health giving vegetable at its best. Crisp, tender, delicately flavored flesh makes this a garden favorite with anyone who grows it. Supreme quality. Coreless, distinctive cylindrical in shape with very little taper, its flesh has a deep rich orange color. This is a very early maturing strain developed for home gardens. Some say it is the favorite vegetable in their garden. Be sure to try it! Lot 012X—Postpaid: Pkt., 10c; oz., 25c; ¼ lb., 60c; ½ lb., \$1.00; 1 lb., \$1.75.

**10**  
PACKET  
**5 for 40¢**

## OUR MOST DELICIOUS WATERMELON AND VEGETABLE

### Berry's Mammoth Melting Sugar Watermelon

The sweetest most delicate flavor you ever tasted. Absolutely stringless, its scarlet flesh fairly melts in your mouth. A spice to its sugar—sweet juice makes it always a delicacy at any time. Big beauties growing 20 to 25 inches long, weighing 40 to 60 pounds. Dark green color with tough rind, creamy colored seed. Hardy, vigorous vines often bearing 6 to 8 melons each. The earliest finest quality melon we have ever seen. Plant extra early. Lot 153X—Postpaid: Pkt., 10c; oz., 25c; ¼ lb., 60c; ½ lb., \$1.00; 1 lb., \$1.75; 5 lbs., \$8.00.

## A MOST SUPERIOR QUALITY PEA FOR YOU

### Berry's Supreme Wonder Pea

Named because you will marvel at its quality and production. A dwarf wrinkled variety growing vigorous dark green pods about 20 inches high. They are loaded with pods filled with dark green peas. You have never tasted peas so tender, so sweet, so delicious. The best there is for your garden. Plant at least two pounds at different times so you will have plenty for canning. Lot 364X—Postpaid: Large 2 oz. Pkt., 10c; ½ lb., 25c; 1 lb., 40c; 2 lbs., 65c; 5 lbs., \$1.50.

## AN EXTRA FINE EARLY CABBAGE

### Berry's Earliest Cabbage

We challenge you to beat this variety anywhere for earliness, quality and productiveness. A round head type cabbage that starts with a bang, heads in a hurry and is ready for the table before most kinds curl up its center leaves. Heads are firm, color bright green. Rich flavor. Grows compact so may be planted closer together than most varieties. For the first cabbage in your own garden, plant this. Lot 971X—Postpaid: Pkt., 10c; oz., 35c; ¼ lb., \$1.10; ½ lb., \$2.00; 1 lb., \$3.75.

## A BEET of TRULY SUPERIOR QUALITY

### Berry's Early Blood Red Beet

An early variety of deep blood red color. A selection of equally superior quality for table, canning and pickling. Smooth globe shaped roots with short tops. Extra sweet and crisp, it matures quickly but is a splendid keeper. If you want the best, try this one. It will be a favorite among all others. Lot 393X—Postpaid: Pkt., 10c; oz., 20c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

# BERRY'S PRIZE COLLECTION

## 40 BIG Packets-A \$2.00 Value

The same big packets and fresh seed we have always sold.

*Only* \$1.00  
POSTPAID

A bargain probably never equalled. Many seed houses get more than \$2.00 for these same 40 packets.

**40 BIG PACKETS—ONLY 2½¢ EACH—\$1.00 POSTPAID**

Think of it! You can now buy garden and flower packets for only 2½ cents each that used to cost 10c apiece. These same packets may still be bought at higher prices if that is what you want. One seed catalog last year had 2 flower seed packets we are giving you in this collection priced at 25c each. We could sell them for 25c each too; but it would not make the seed any better. Select from our catalog these packets which sell for 5c each, or turn to other catalogs where they may sell for 10c up to 25c apiece. How far does your \$1.00 go? Only part way down the list! Have all the other 20 or more packets free at no extra cost by ordering Berry's "Prize" Collection \$1.00 postpaid. Every packet in this collection is guaranteed satisfactory.

### Best Varieties for the Farm Garden

Each packet in this collection is specially selected to give you the best variety we can. Liberal measure is given on all items, and on Radish, Lettuce, and your favorite vegetables, there will be enough seed for 100 feet of row. On all vegetables in this collection there is enough seed to produce a garden for a family of 5. The seed in this collection will plant 3000 square feet at regular rate or garden 60 ft. x 50 ft.; or 75 ft. x 40 ft.

### 4 FAVORITE HARDY FLOWERS

Here are 4 favorite flowers, all hardy perennials that will grow anywhere. Buy this collection to get these alone. Make your home surroundings more beautiful! Live happier!

# SAVE MONEY QUALITY EVERY POUND GUARANTEED

**J. F. SINN**  
President  
Berry Seed Company

A farmer by birth and early training. A man who has had 34 years of experience in the seed business. Recognized as one of the foremost men in the farm seed trade. He strives to give our customers better seed values.

He is always at your service and glad to help you with your seed problems.

Jan.

Dear Customers and Friends:

Every New Year brings hope and determination to all of us. This year I want to give you values my 34 years experience in the seed business will permit. You will find more outstanding bargains and real saving than ever before.

The past year has produced better seed crops at much lower prices. The farmers income has increased, so his buying power is far greater. The demand is urgent, so we look for an unusual amount of seed to be used. The low markets on Alsike, Red Clover, Sweet Clover, Lespedeza, Timothy and Blue Grass recommends using these crops in a big way. Alfalfa is somewhat higher than other seeds, but still about \$5.00 a bushel cheaper than last year.

We have been busy buying the different crops, laying in our supplies on a very low price level. These favorable purchases and our large capital permits us to offer very unusual low prices in this catalog. We expect to see a big demand and advancing markets. For this reason we would urge you again to buy early before any changes in price take effect.

Hybrid Corn has come to the front with leaps and bounds, and I want to urge every farmer who plants corn to use a high yielding Hybrid. We have top ranking Hybrids. See pages 50 and 51 for full particulars.

Our catalog is so full of Seed Bargains that I hardly know where to begin pointing them out to you. If you will study each page you will be well paid for doing so. See the many special offers and low prices on vegetable and nursery stock. If you will compare values, I believe I am safe in saying we can save you more money and give you better service than any other seed house. This is a broad statement, but I believe it to be true and hope you will agree after checking and seeing how much we can save you on your order.

I would like to meet you face to face and point out how our service is superior and the many ways that we can serve you better. If you have never ordered from us, begin now and I will guarantee to do my best to please you and make your dollars go further.

Your satisfaction is our best asset. My business is to see that you are so well satisfied that you will not only come back but bring a friend along.

Very respectfully yours,

J. F. Sinn

been buying from you for several years is the best. I have been getting good returns for my money, and can heartily recommend to others desiring good seed.

Yours truly,  
C. F. BUTLER

Mount Clare,  
W. Va.

Dear Sirs: I have been using your farm and garden seeds for some years and find them real money savers. Your descriptions and recommendations are accurate and reliable. Your courtesy and efficient service lead me to recommend you to all who wish to get the best seeds at a minimum cost. For purity and vitality your seeds are unsurpassed. Truly yours, G. W. CONLEY

New Berlin, Ill.

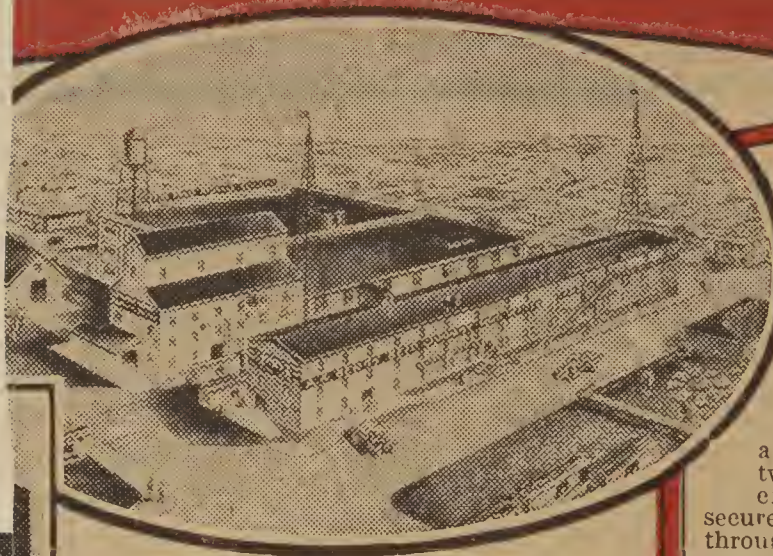

Gentlemen: I have been buying seeds from Berry's for 24 years. I have lately club ordered my seeds, inducing my farmer friends to order with me. I have bought over \$18,800 of seeds from you in one year. Not one farmer returned a bushel. Always better than expected. I always save from \$4.00 to \$7.00 per bushel by ordering from you. I find your World Brand the very best buy. J. W. GERHARDT

Hummelstown, Pa.  
Dear Sirs: I have found your seeds OK and you have saved me lots of money. Your Lot Honest John Alfalfa has given me wonderful results. I sent you a photo showing the fine big growth. I am well satisfied with all dealings I have had with you. Yours truly,  
DANIEL BEHRENS

## LARGEST SELLERS-DIRECT TO FARMERS

**LOWEST PRICES**  
from **WORLD'S LARGEST SEED**  
**HOUSE SELLING DIRECT to YOU!**

Our Clarinda plant and main offices are shown above and our Chicago storage location on the left. We are well equipped, financed and located to give excellent service, low prices and satisfactory quality.

**TESTED  
QUALITY**

Mr. L. C. Jorgenson is our analyst and has had twenty years of experience. He secured his training through U. S. Government at Washington, D. C.

## Prompt Shipment—Quick Arrival

Our entire policy of business is to take care of every customer's order so he or she will be satisfied in every way. Both our Clarinda and Chicago plants are organized and equipped to get shipments out promptly. Freight service is improved and shipments roll to destination in short order.

We guarantee that all shipments will arrive safely and in good condition. If there is any sign of loss or damage just have your agent mark it on the freight bill, send the bill to us and we will promptly adjust the matter. Address all letters, orders and correspondence to Clarinda. We have no office at Chicago.

**If you want a receipted invoice ask for it on your order.**

## Service on Seeding Problems

Perhaps you may be undecided as to what you should sow. You may desire further information on some crops. Possibly you have a farming problem that is hard to solve. If so, write to us. We may be able to help you. Our secretary, Mr. Joe Faassen, has made quite a study of farm crops. He is always glad to help whenever he can. His services are at your disposal. Feel free to write at any time.

## Cleaned Seed

The seed we sell our trade is not as it comes from the grower. It is cleaned and graded either by ourselves or direct through our buying connections. Seed cleaning and grading requires experience and equipment. Often it is necessary to run seed over different kinds of cleaners to get the desired results. Careful adjustments and expert operation are needed to do the best work. This applies also to grading for not all grades are of equal quality. The size and weight of berries as well as color enter into making grades. Our aim in cleaning or in buying cleaned seed is always to give the customer the greatest possible seed value at the price he wants to pay.

## GUARANTEE

We guarantee that our prices are lowest, considering quality. If upon receipt of your order you are not entirely satisfied you can return it and your money, plus transportation charges, will be promptly refunded. Or you can keep it 60 days and have the seed tested in order to satisfy yourself that the quality is good and that you have saved money and secured a big bargain. Then if you are not pleased you can return it, and have all money, including freight paid, refunded. You must be satisfied and we guarantee to save you money.

We also guarantee to replace, free of charge, any garden or flower seed that fails to grow on account of poor germination. Our nursery stock is guaranteed to arrive in good live planting condition or it will be replaced free of charge. Our guarantee protects the buyer and is lived up to, so it means just what it says.

BERRY SEED CO.,  
Clarinda, Iowa.

The test tags attached to shipments of seed show the results of the purity and germination tests of a composite sample of the lot of seed from which shipment is made. This sample is obtained by taking small quantities of seed from different portions of the lot. These are mixed thoroughly so as to make the composite sample as representative as possible of the entire lot of seed. A portion of this sample is taken to make the purity and germination test. That is the general method of testing seed and is followed by ourselves. In most cases the analysis is our own but occasionally we use the analysis furnished by the party selling us the seed. It is our aim to attach such test tags to all shipments made. Sometimes a tag will be missed or lost from the shipment but in such case a test tag may be had upon request. Individual bags may vary from the lot test.

**PLANT the BEST  
QUALITY SEED  
for BIGGEST  
CROPS and PROFITS**

# DIRECT BUYING

The Sensible  
Thing to Do

## More Farmers are Doing It

Our business is nation wide and farmers from every state send their orders to Berry's. We are proud to number among our customers many of the best farmers in their communities. Thousands have bought from us for many years. They come back year after year because they have been satisfied with our seeds and convinced that they have saved money.

They are not influenced by unfavorable propaganda and devices that are sometimes employed in an endeavor to discredit successful businesses. They realize that anyone may be bothered with technicalities. All our customers care about is the personal satisfaction they have had in their dealings with us. We can secure thousands to testify that they have been well pleased and some report savings up to 40% on their seed purchases.

IS THE  
PRACTICE of  
THOUSANDS  
of GOOD  
FARMERS

OUR CUSTOMERS REPORT  
SAVINGS up to 40%

## HIGHER PRICES EXPECTED

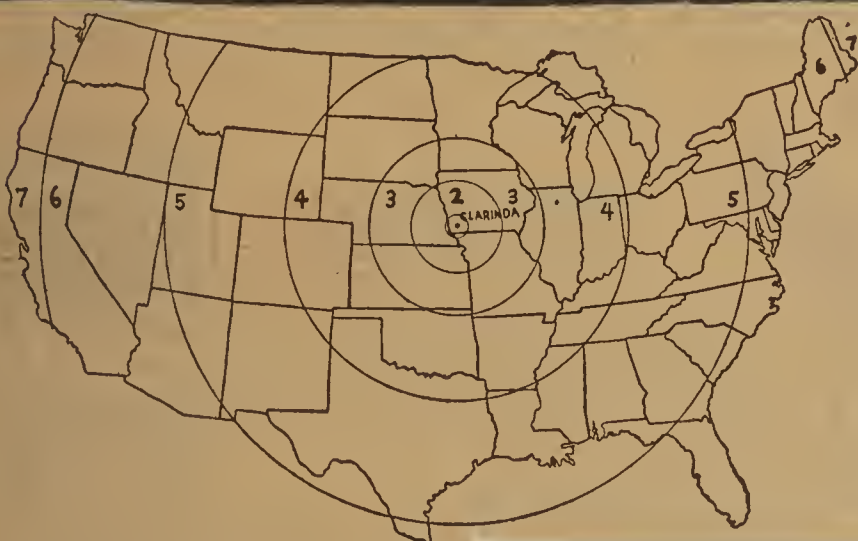

We urge all of our friends to purchase their farm seeds early this year. Our early purchased stocks were obtained on low markets. The extra savings to early buyers should be large this year.

Our stocks of seed at the time this catalog goes to press are quite large. We will be able to take care of early orders at prices given in this book. These quotations are made so low that we know the seed will move rapidly.

We consider that markets will advance as the season for seeding approaches and do not believe stocks can be replaced at equal figures. Therefore, prices are quoted subject to change after original stocks are sold out.

There will be no changes unless conditions make it absolutely necessary and then our prices will be guaranteed to save you money on the basis of existing markets.

To assure yourself of the biggest savings, order just as soon as you can. Please do not think this is high pressure sales talk. We are simply trying to help you make an extra saving.

## BERRY'S SEED GRADES

In several lines our seeds are graded according to color, size of berries and general appearance. Thus in our better grades you get a finer quality than from the dealer who mixes all kinds together.

### World Brand

This is our Extra Fancy grade. It is our purest and highest testing stock. For years it has been the choice of our most exacting and critical trade. We recommend this quality to those who demand the best and invite comparisons to any highest quality grade sold by any dealer.

### Dealers Fancy

A high quality. Not quite as fine as the World Brand. It is still a very desirable grade and will pass for the best in many cases.

### Planet Brand

The extra choice grade that gives very good service. Not quite so bright but gives good seedings at low cost.

### Square Brand

Our lowest priced grade. Smaller berried. A little lower germination but more seeds per pound, so it performs well.

### Special Lots

Some seed does not exactly fit into a regular grade or is secured for special prices. These are listed by name such as Lot Leader Red Clover, Honest John Alfalfa, etc.

## Parcel Post Rates

Any package up to 70 lbs. in weight and not exceeding 100 inches in length and girth combined can be sent by parcel post. If you want anything shipped by parcel post that is not quoted post-paid be sure to remit to cover postage.

First find the zone you are in and then figure the amount of postage from the following table:

	1st Lb. Costs	All Additional Pounds
Zone 1	8c	1c
Zone 2	8c	1c
Zone 3	9c	2c
Zone 4	10c	3½c
Zone 5	11c	5½c
Zone 6	12c	7c

For example, a 10-lb. package to the 3rd zone costs 9c for the first pound and 2c a pound for the next nine pounds. 9 + 18 = 27c total. For short distances or for small packages parcel post is cheaper. Otherwise express. Freight, of course, is cheapest excepting on packages of 35 lbs. or less.

# BERRY'S GARDEN SEED

## AMERICAS OUTSTANDING VALUES

**PLANT MORE VEGETABLES at BERRY'S LOW PRICES**

**HIGH QUALITY, GUARANTEED  
TESTED SEEDS at LOWEST PRICES**

Berry's have greater values for you this year than ever before. Prices are still lower; but we guarantee the same high quality we have always furnished our thousands of customer friends.

In raising a garden you like to have the best. The cost is so little that you can not afford to trust every source of supply to have fresh, high testing, true to type seeds. We have always furnished just that, and always will.

### ORDER DIRECT OF BERRY'S—BEST SEED—LOW PRICES

When you order garden and flower seeds of us, you are buying direct from a known reliable source. Our growing contracts from which we supply you with fresh seed each year are in the hands of experts all over the world. From then until your order is packed for shipment, every detail is properly supervised to insure you getting just what you ordered as quickly as possible.

### 24 HOUR SERVICE ON ALL ORDERS

All orders are shipped by mail or Express Prepaid within 24 hours after received, usually the same day to arrive 1 or 2 days later. If we can't ship immediately for any reason, you will be notified at once.

Take advantage now of the lowest prices we have ever made on the highest quality stocks.

**BULK PRICES  
SAVE YOU MONEY**

SEE PRICE LIST PAGE 9

Our bulk seed or quantity price list on opposite page is strictly wholesale for large farm or market gardeners. Seeds are guaranteed to be strictly new crop, high germinating and true to type, and priced to save you money.

For smaller quantity prices postpaid on any variety, see the item as listed in our garden seed section pages 10-24. All vegetables listed in our catalog not priced on this page are at the one price listed for standard varieties.

Special low wholesale prices page 9 are not prepaid. Shipment will be made by Express or Freight Collect whichever is cheapest. Specify on ordering from this list your freight and express station. Usually transportation charges will be between 1 and 2 cents per pound depending on distance to be shipped and weight of order.

### GUARANTEE

If any of our garden or flower seeds fail to grow due to poor germination we will replace them free of charge.

**PACKETS for**

**6**

Any six packets from our regular 5c groups, your selection of all vegetable and flower offerings are 25c. 12 packets would be 50c, etc. This offer does not apply to any packet not selling for 5c.

**Germâco  
Hotkaps**

**25¢**

Hotkaps, Slug Shot and Stim U Plant should be used by every gardener. Guaranteed satisfactory.

# BERRY'S

## GARDEN SEEDS

*Famous for their Tested Quality*

### BERRY'S GARDEN BEANS ARE BETTER

Our beans are grown in mountain areas to make them free from disease and extra hardy. They are all handpicked and polished, with highest germination guaranteed.

Buy your garden beans direct from us—get the best and save money. Berry's hardy, adapted varieties will withstand unfavorable conditions. Our beans are vigorous growers and heaviest yielders.

### GREEN PODDED BUSH BEANS

All 6 varieties postpaid: Pkt., 5c; ½ lb., 16c; 1 lb., 25c; 3 lbs., 70c; 5 lbs., \$1.00. Not prepaid: 10 lbs., \$1.20.

**134 Burpee's Stringless Green Pod.** The old favorite garden beans for home, market or canning. Plants sturdy, very prolific. Pods round, fleshy, perfectly stringless and of excellent quality.

**132 New Bountiful.** An extra early green podded variety ready to pick in six weeks. Vines vigorous and productive. Brittle, meaty and tender, absolutely stringless, and of fine flavor.

**133 Giant Stringless Green Pod.** One of the favorite stringless green podded sorts. Pods round, meaty, brittle. Stringless throughout entire growth. Heavy producer.

**125 Tennessee Green Pod.** One of the earliest snap beans. Pods long, flat, dark green, of excellent flavor. Plants hardy and productive.

**122 Full Measure.** A well known variety for market and canning purposes. Pods are round, straight, very fleshy, stringless and tender.

**116 Tender Green.** A new variety of superior quality. Plants are upright and vigorous, heavy producers. Light green pods 7 in. long are round, meaty, tender, stringless.

# SWEET CORN

## EARLY SWEET CORN

All early varieties postpaid: Pkt., 5c; 1/2 lb., 16c; 1 lb., 25c; 3 lbs., 70c; 5 lbs., \$1.00. Not prepaid: 10 lbs., \$1.20.

**285 Black Mexican.** Most popular for home garden. Ears 8 rowed, matures about 88 days. Kernels tender, very sweet; white, changing to blue-black.

**277 Golden Bantam.** The favorite early yellow sweet corn. Ears 5 to 6 inches long, kernels broad, deep golden yellow, very sweet, juicy and tender.

**278 Delues Golden Giant.** Mid-season yellow variety, good for home and market garden. A week earlier than Bantam.

**281 Early Sunshine.** Four to five days earlier than Golden Bantam. Good sized ears, 10 to 12 rowed. Kernels golden yellow, sweet, tender.

**282 Howling Mob.** Early and productive. Large thick ears, 7 to 9 inches long. Kernels white and of good quality.

**283 Early Minnesota.** A very dependable productive variety, extra early. Ears are long, with large white grains, sweet and tender.

**276 Early Sensational.** We believe it has the finest flavor of any variety; extra sweet, juicy and tender, kernels creamy white. Early and very prolific.

### SWEET CORN "FLAVOR FAVORITES"

## LATE SWEET CORN

All 4 varieties postpaid: Pkt., 5c; 1/2 lb., 16c; 1 lb., 25c; 3 lbs., 70c; 5 lbs., \$1.00. Not prepaid: 10 lbs., \$1.30.

**289 Golden Evergreen.** A cross between Golden Bantam and Stowell's Evergreen combining the deliciously sweet flavor of Golden Bantam with the tenderness of Stowell's Evergreen. Ears with 14 to 18 rows, kernels rich golden yellow of finest quality.

**290 Early Evergreen.** The earliest of all Evergreens. Ears are fully as large as Stowell's and remain tender for a longer period. One week earlier.

**287 Stowell's Evergreen.** The best known standard main crop sweet corn, excelling all others. Ears 8 inches long, 16 to 20 rowed. Very productive. Kernels clear white, deep, medium width, sugary and tender.

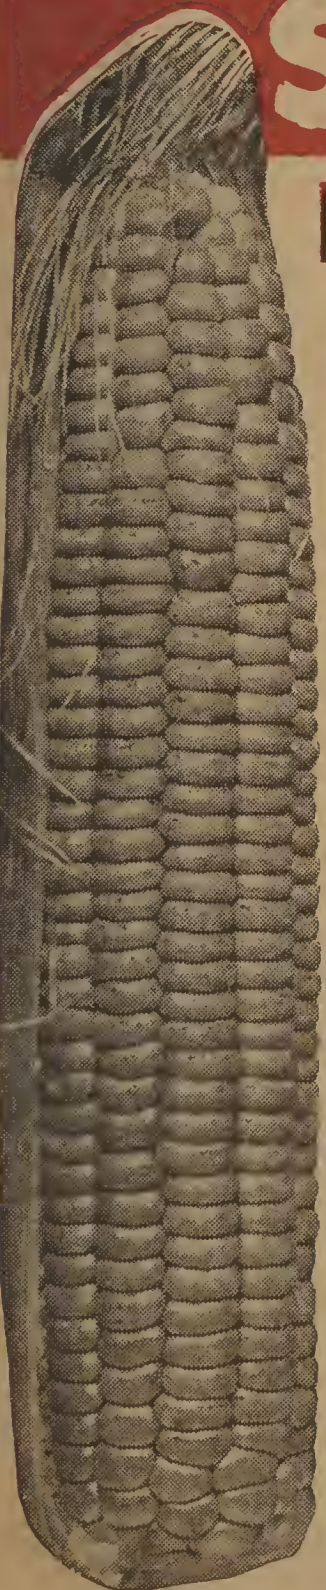

**284 Country Gentleman.** One of the best known late varieties, superior for home and market gardens and commercial canners. Stalks often with two ears. Ears 7 to 8 inches long, with narrow irregular grains of good quality, sweet and tender.

### HYBRID SWEET CORN

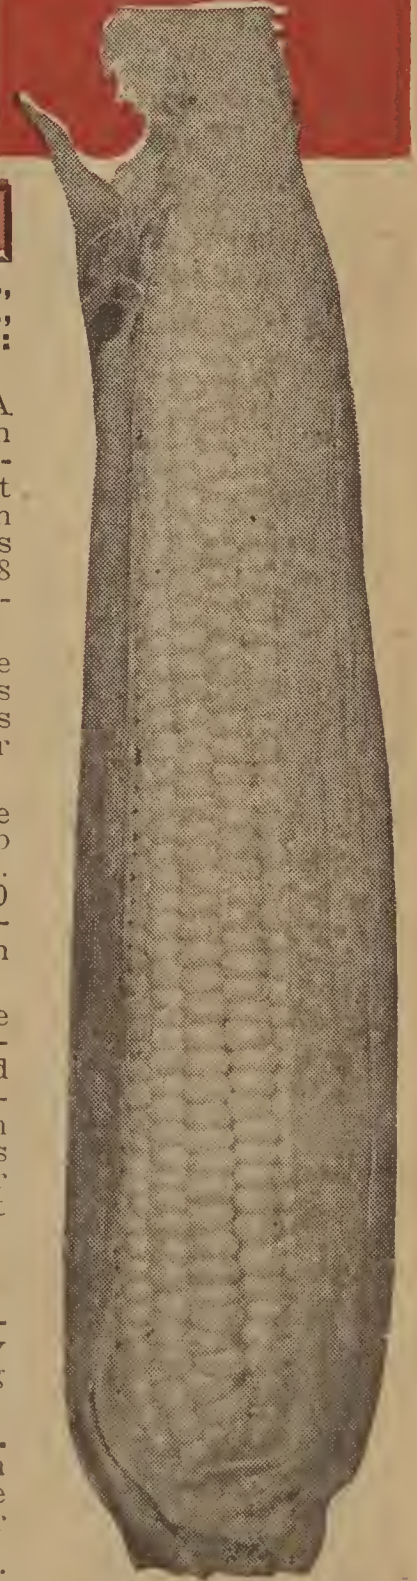

**284X Golden Country Gentleman.** A golden yellow country Gentleman, large ears, shoe peg Kernels, sweet, fine quality.

**277X Golden Bantam Hybrid.** Your favorite early Sweet Corn now better than ever. More hardy, finer flavor, heavier yielder.

These 2 varieties postpaid: Large pkt., 10c; 1/4 lb., 15c; 1/2 lb., 25c; 1 lb., 40c; 5 lbs., \$1.75. Other Hybrids—Page 2.

## CHOICE TABLE BEETS

The following seven varieties postpaid: Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c; 5 lbs., \$3.00.

**151 Crimson Globe.** An exceedingly fine table beet, of mid-season maturity. Large globe shaped roots. Flesh purplish-red with moderate zonings.

**153 Improved Extra Early Eclipse.** An early variety for home use. Globe shaped, medium dark red color, with zones of lighter color. A fine pickler; sweet, crisp.

**154 Early Blood Turnip.** Excels in flavor and appearance. A medium early variety, roots top shaped, dark red, retaining color even when cooked. Sweet and crisp. Matures quickly but is a splendid keeper.

**155 Crosby's Egyptian.** An extra early variety preferred by market gardeners, splendid for bunching. Roots globe shaped, slightly flattened, with small tap root. Finest quality, tender and sweet. Flesh purplish-red.

**157 Detroit Dark Red.** The outstanding variety for home use, truck gardeners, and canning. Fine quality, tender and sweet. Roots perfectly round. With small tap root, uniform. Flesh dark red with slight zone.

**167 Early Wonder.** Globe shaped with small tap root; tops medium small, erect. Flesh very dark red, and tender. Valuable as market gardener early variety, because of its smooth skin and uniform size.

**168 Improved Early Egyptian.** The earliest of all beet varieties, adapting it for first early crop and forcing. Firm, crisp and tender.

**158 Swiss Chard.** Makes continuous greens of delicious flavor throughout the summer. Grows anywhere. Plant from early spring till July. Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 65c; 5 lbs., \$3.00.

**152 Good For All.** A heavy yielding early maturing strain of Detroit Dark Red. An All-America winner. Smooth globe shape roots. Equally superior for table, canning or pickling. Pkt., 5c; oz., 15c; ¼ lb., 35c; 1 lb., \$1.00; 5 lbs., \$4.00.

## CELERY

These two varieties: Pkt., 5c; oz., 20c; ¼ lb., 55c; 1 lb., \$1.75.

**251 White Plume.** Earliest of all. A favorite for the table because of crisp tender quality. Stalks are uniformly large and solid.

**253 Giant Pascal.** An excellent variety for fall and winter use. Large, thick, crisp, stringless stalks with a delicious nut-like flavor. Blanches to a beautiful yellowish-white.

**252 Golden Self Blanching.** Most desirable for truckers. Stalks heavier than white varieties blanching into a rich golden yellow. Fine quality, crisp, tender, free from strings. Postpaid: Pkt., 5c; oz., 25c; ¼ lb., \$1.00; 1 lb., \$3.50.

**255 Celeriac or Turnip-rooted Celery.** Roots nearly globe-shaped, are used for flavoring soup, stews, etc. Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 55c; 1 lb., \$1.90.

See page 2 for the best varieties of all vegetable seed in the **BIGGEST BARGAIN VALUE OF THE YEAR.**

## MANGELS AND SUGAR BEETS

### Stock Feeders—Raise Mangels

The average yield of mangels per acre is 30 tons. Aside from the minimum feeding value of \$2.50 per ton, the mangel is a regulator that keeps stock in the best health.

Mangels are very easily grown. A loose or sandy loam type of soil is best to grow mangels on. Drill about 6 pounds of seed per acre in rows 2 feet apart. Cultivate right after planting down the drill rows.

The following varieties postpaid: Oz., 8c; ¼ lb., 18c; ½ lb., 30c; 1 lb., 45c; 5 lbs., \$2.00.

**159 Mammoth Long Red.** One of the most popular mangels. Enormous, weighing 25 pounds. High yielder. Color light red, flesh white with rose tinge.

**160 Golden Tankard.** Very large size and easily lifted. Skin deep orange, flesh yellow with white zones.

**166 Giant Half Sugar.** Heavy yielder, valuable for feeding. Flesh white, with good sugar content. Grows half out of the ground, making it easy to harvest.

## LATE VARIETIES

Postpaid price on following six varieties: Pkt., 5c; oz., 15c;  $\frac{1}{4}$  lb., 50c; 1 lb., \$1.75.

**186 Premium Late Flat Dutch.** Excellent for home and market garden use. Very solid, large, flat heads, 6 to 7 inches deep. High quality. Deserves its wide popularity.

**187 Drumhead Savoy.** Popular for its tasty flavor. Sweeter than ordinary cabbage. Has crinkled leaves. Round ball-like heads are very heavy. An excellent keeper.

**191 Danish Ballhead.** A superior variety, one of the finest late cabbages. Extremely hard heads, 8 to 9 inches across. Desirable for shipping, for storage, and for kraut.

**192 Volga.** Matures early, heads large and solid, disease and rot resistant. Stands long without bursting. A standard variety for market gardeners and shipping.

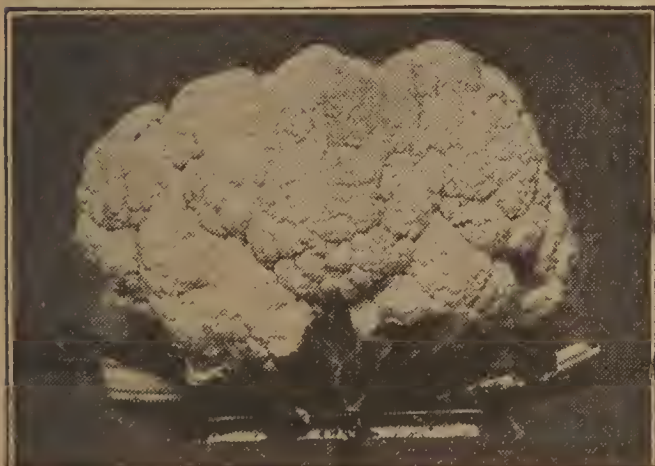

**194 Mammoth Redrock.** The largest and best red cabbage. It is fine for slaw, pickling or boiled. A sure header, heads weighing 10 to 15 lbs. An excellent keeper.

**173 Surehead.** A main variety of Late Flat Dutch type. They sell on sight in the market. Extra solid, fine grained, with a very small core and of excellent flavor.

**177 Penn State Ballhead** ("All-America" Award 1934). Handsome, hardy late cabbage for keeping qualities. For home garden or shipping. Plants vigorous, compact with few thick outside leaves. Postpaid: Pkt., 5c; oz., 25c;  $\frac{1}{4}$  lb., 75c; 1 lb., \$2.50.

## CAULIFLOWER

Choicest Imported Seed

Danish Giant

**220 Early Snowball.** Most widely used early variety, especially valuable for market. Dwarf habit. A sure header, medium size. Delicious, white and tender. Postpaid: Pkt., 10c;  $\frac{1}{4}$  oz., 25c; oz., 85c;  $\frac{1}{4}$  lb., \$3.00;  $\frac{1}{2}$  lb., \$5.50.

**221 Berry's Danish Giant.** Snow white heads, large and compact, of excellent quality. The finest late variety. Postpaid: Pkt., 10c;  $\frac{1}{4}$  oz., 25c; oz., 85c;  $\frac{1}{4}$  lb., \$3.00;  $\frac{1}{2}$  lb., \$5.50.

## EARLY VARIETIES

These two varieties: Pkt., 5c; oz., 20c;  $\frac{1}{4}$  lb., 65c; 1 lb., \$2.25.

**179 Golden Acre.** A new variety, sure header; heads round and very solid, few outer leaves. Used by truckers for earliest markets.

**176 Early Jersey Wakefield.** Small compact conical heads, broad base. Few leaves permitting close planting. A favorite of market gardeners and shippers.

These three varieties: Pkt., 5c; oz., 18c;  $\frac{1}{4}$  lb., 55c; 1 lb., \$1.85.

**182 Copenhagen Market.** Finest round-headed early cabbage. Heads uniform, solid, excellent quality. Few outer leaves. Short stem. Desirable likewise for early kraut.

**185 Norseman.** A good shipping variety, heads round, weigh 8 to 10 lbs. Superb quality.

**178 Extra Early Express.** Extra early sort, oval head, very large for an early cabbage. A fast grower.

## CELERY OR CHINESE CABBAGE

A vegetable well deserving its fast growing popularity. The leaves are highly palatable, although it heads in 55-60 days. Fine boiled or for cole slaw.

**175 Chinese PeTsai.** The most popular variety for the home garden. Cylindrical, tapering heads. Crisp and tender. Plant during July-August.

Pkt., 5c; oz., 18c;  $\frac{1}{4}$  lb., 55c; 1 lb., \$1.85.

Danish  
Ballhead

Postpaid prices on following two varieties: Pkt., 5c; oz., 15c;  $\frac{1}{4}$  lb., 50c; 1 lb., \$1.75.

## MEDIUM EARLY

**181 Early Flat Dutch.** A strain popular with market and home gardeners. Heads almost round, good solid quality, weigh about 5 lbs.

**180 Glory of Enkhuizen.** A variety from Holland. Used largely for kraut, also by truck gardeners and shippers. Heads globe shaped, solid, with few outer leaves, weigh 6 to 8 lbs. Remarkably fine flavor, splendid keeper.

## YELLOWS DISEASE RESISTANT VARIETIES

The most destructive and widespread cabbage disease found in all sections east of the Rocky Mountains "Yellows" is caused by minute organisms living in the soil indefinitely that thrive on living cabbage plants. The only control is to grow varieties that have been developed and are proven to be "Yellows Resistant."

These 4 best varieties postpaid: Pkt., 5c; oz., 35c;  $\frac{1}{4}$  lb., \$1.00; 1 lb., \$3.50, postpaid.

**174 Marion Market.** Heads are almost round, very solid. Similar to Copenhagen Market but about 10 days later.

**190 Wisconsin Hollander No. 8.** Similar to Danish Ballhead. Excellent for kraut and winter storage.

**183 Jersey Queen.** 55 days. Selected from Jersey Wakefield with which it remains identical in type and season. Leaves smooth and dark green. Heads pointed, small and compact, permitting close planting.

**188 Racine Market.** 60 days. Selected from Copenhagen Market. It is dependably early and uniform; heads are round, solid, and of superior quality. Fine for early kraut.

# BETTER SEED MEANS BETTER GARDENS

## TABLE CARROTS

The following varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.75.

**201 Oxheart.** A short thick variety, best for heavy soil where it can be easily lifted. Roots orange-scarlet, about five inches in length; very heavy yielder.

**202 Early Scarlet Horn.** One of the best for table use and liked by gardeners for early market. Crisp and sweet.

**204 Danvers Half Long.** None better for home gardens or market. Flesh bright orange in color and very tender. Grows six to seven inches long, tapered. Very productive.

**205 Chantenay.** A fine sort for bunching, market or home gardens. About 6 inches long, stump rooted, deep orange in color. A heavy yielder.

**212 New Coreless.** Valuable for home gardens; also a good shipper. Fine flavored, tender and sweet. Practically coreless. Tops are small, roots bright orange, uniform size, blunt ended.

## New Improved Danvers

**204X Supreme Half Long**—"All-America" award 1937. Slender, refined Danvers type. Excellent color, small red core, tops small, roots smooth, quality and flavor best to date. Pkt., 5c; oz., 12c; ¼ lb., 30c; 1 lb., \$1.00, postpaid.

## STOCK CARROTS

These two varieties: Oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.75.

**206 Long Orange.** Suitable for stock or table use. Roots red-orange, tapered to a point. A good winter keeper.

**208 Mastodon.** Flesh white, crisp, solid, very sweet in flavor. Roots frequently measure 15 to 20 inches in circumference. A heavy yielder.

## EGGPLANT

These two varieties postpaid: Pkt., 5c; oz., 40c; ¼ lb., \$1.50; ½ lb., \$2.50; 1 lb., \$4.50.

**310 Improved New York Purple.** Our strain of this leading market variety is unsurpassed. Skin glossy black purple, flesh white.

**312 Black Beauty.** Valuable to home gardeners and truckers for market. Ten days earlier than New York. Entirely spineless, sets fruit freely. Fruits are smooth, holding well after picking.

New York Purple

Carrot Chantenay

## JAP HULL-LESS HYBRID POP CORN

New Minhybrid 250 Japanese Hull-less Popcorn is the variety to grow this year. It will give you bigger yields, earlier maturity, better quality and a premium price.

Introduced by Minnesota Experiment Station, records since 1931 show: (1) 16% greater yield than average Jap. Hull-less; (2) 20% greater popping expansion; (3) earlier maturity; (4) it is practically free from smut; and (5) it is in popping condition 30 days earlier than regular Jap. Hull-less.

Last year there was not enough to supply the demand at 45c a pound. This year we offer it at new low prices postpaid: 1½ oz. pkt., 10c; ½ lb., 22c; 1 lb., 35c; 5 lbs., \$1.50.

## CUCUMBER

**225 Berry's Champion Pickler.** The best variety for home gardens. Excellent for slicing and pickling. Fruits dark green in color, uniform in size, straight and smooth. We recommend this variety very highly. Postpaid—Pkt., 10c; oz., 20c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.49.

The following 7 varieties postpaid: Pkt., 5c; oz., 12c; ¼ lb., 30c; ½ lb., 55c; 1 lb., 95c.

**226 National Pickling.** The finest early pickling type slightly larger than Early Green Cluster. Uniformly smooth and cylindrical with well rounded ends. Flesh thick preventing splitting in the center and hollow sides in the pickles. Size 7x3 inches, 1¼ pounds.

**228 Chicago Pickle.** One of the most popular pickling varieties; also good for slicing. Mid-season. Fruits medium green, uniform in size.

**230 Early Green Cluster.** A fine pickling variety and for early slicing. Very prolific, fruits small, pale green, borne in bunches.

**231 White Spine Evergreen.** Fine for home garden, and widely used for shipping. Dark green, holds color well. Crisp and tender.

**232 Cool and Crisp.** Extra early variety, medium sized fruits, crisp and tender, fine mild flavor.

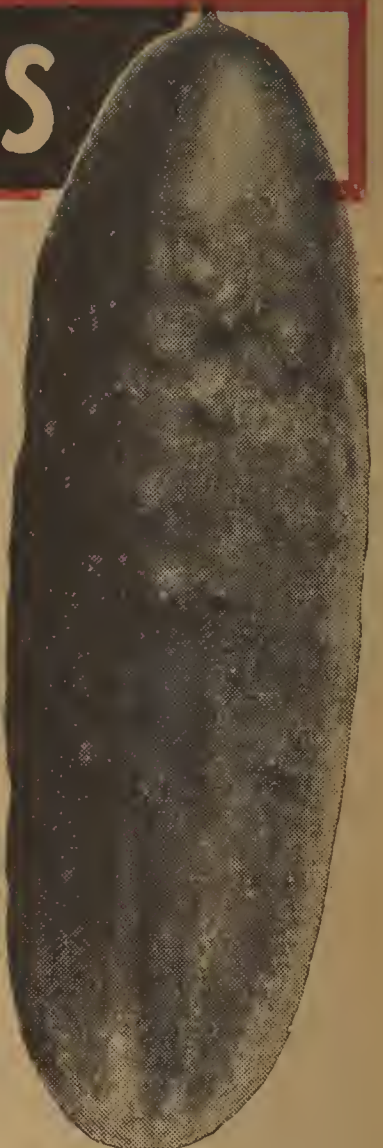

**233 Boston Pickler.** Very early and prolific; uniform size, slightly tapered, weigh about 1½ lbs. Dark green. Fine for table.

**234 Improved White Spine.** Vigorous and productive, fruit uniform, seven to nine inches long, very showy.

These two varieties postpaid: Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.15.

**239 Straight 8.** The highest award winner of the All-America trials in 1935. The best new cucumber. Fruits are of excellent quality, uniform size, dark green color. About 8 inches long, 2 inches wide. Vines vigorous and productive. Ideal for the home garden, local market, or shipping.

**236 Improved Long Green.** Standard late variety. Splendid for slicing, excellent quality. Fruits dark green, weigh 3 to 3½ lbs., flesh white, firm and crisp.

## POP CORN

All varieties postpaid: Pkt., 5c; ½ lb., 12c; 1 lb., 19c; 3 lbs., 50c; 5 lbs., 75c. Not prepaid: 10 lbs., \$1.00.

**301 White Rice.** Grains clear white, long and pointed at the top. Pops out large and tender.

**303 Japanese Hull-less.** Dwarf grower, small ears. Kernels hull-less, snowy white when popped; fine flavor.

**304 South American (Dynamite).** Kernels yellow, pop to immense size. Stalks grow larger than field corn, with two to three ears on a stalk.

# ONION SEED and ONION SETS

## PURE BRED SELECT STRAINS

Dealing in large quantities of onion seed has enabled us to furnish onion and onion seed growers fine strains of all standard varieties. We also have found seed grown in Idaho to run higher in germination normally than California grown seed. We can furnish seed grown in either state though.

We know there are many good onion seed growers for critical buyers. Trying to be of greatest service to growers we have complete stocks in the varieties listed from 3 to 4 of our best known growers in this country.

We can furnish you onion seed to fine advantage. Our stocks are new crop (1937) of high germination. If you desire a sample or further quantity prices kindly write us. We have the germination and grower to furnish on request. We are pleased to quote vegetable growers association the very lowest prices on high quality stocks guaranteed satisfactory.

**NOTE:** Our prices are low but quality is high. We guarantee new crop, high germinating, true to type seed or **YOUR MONEY BACK.**

These 14 varieties postpaid: Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

**425 Sweet Spanish.** The largest and mildest of all onions. American grown strain. Globular, with golden yellow skin; flesh white, very mild and of good flavor.

**426 Improved Large Red Wethersfield.** Bulbs large, well flattened, skin purplish-red, flesh white, tinged with pink, very firm. Keeps well; an excellent commercial variety.

**429 Berry's Gigantic Globe.** A handsome fine flavored yellow globe type. Flesh white, mild and tender.

**431. Early Yellow Globe.** 3 weeks earlier than Danvers or Southport Yellow Globe. Very hardy, heavy yielder. Beautiful yellow color. Globe shaped. Best for storage of early types.

**432 Southport Red Globe.** The finest of the red onions. Uniform in size, handsome, perfect globe type. An excellent keeper. Skin glossy red, flesh white, fine grained and tender.

**436 Southport Yellow Globe.** Grown for commercial purposes. Large, globe shaped, rich yellow color. Flesh white and mild. An excellent keeping onion.

**441 Mammoth Silverskin or White Portugal.** A large onion, skin and flesh white, mild flavored. Excellent for sets, pickling, bunching, and storage.

**427 Mammoth Prizetaker.** Produces handsome onions of very large size; sometimes weigh up to 6 lbs. Light yellow; flesh white, mild and fine flavored.

**428 Large Red Wethersfield.** One of the best winter keepers; also used largely for sets. Early ripening, but grows throughout the season. Skin deep purplish red, flesh white flushed with pink.

**430 Mammoth Silverking.** One of the largest onions in cultivation, averaging from 15 to 22 inches in circumference. Uniform in size, matures early. Skin is silvery white, and flesh tender, mild and sweet.

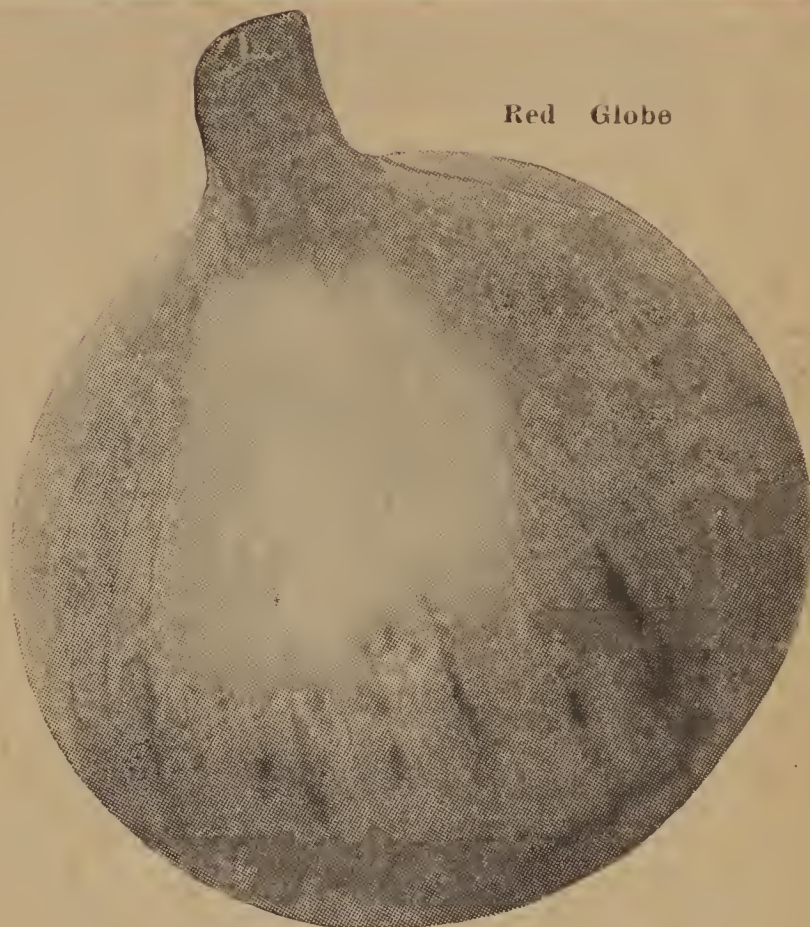

**435 Yellow Globe Danvers.** A splendid variety for home gardens and market. Nearly globe shaped with pure yellow skin, white flesh and mild flavor. Most productive with fine keeping qualities.

**438 White Queen.** A fine early maturing pickling onion. Small flat bulbs, pure white, very delicate in flavor. A favorite with market gardeners who desire bunching onions.

**443 Ebenezer.** An excellent variety for producing sets of exceptional keeping quality. Matured bulbs will keep in good condition all winter. Flesh white, tender and unusually mild.

**437 Australian Brown.** The best variety for home use in producing sets. Excellent keepers and fine for market. Bulbs flat, amber colored, strong flavor.

# MUSK MELONS

## SALMON FLESHED

**402 Berry's Favorite.** An oval melon, weighing about 3 lbs. Pink fleshed, with small seed cavity. Flesh is sweet and spicy. A very good shipper. Equally choice for home or market. Postpaid: Pkt., 8c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25; 5 lbs., \$5.75.

**411 Sugar or Honey Rock.** Medium to large; a good shipper. Golden skin with very fine netting. Flesh thick, orange-salmon, with fine flavor. Postpaid: Pkt., 5c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00; 5 lbs., \$4.50.

All other varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 80c.

**407 Bender's Surprise.** Largest pink fleshed, oval shaped melon. Early for its size, flesh of exceptionally high quality. For the home garden.

**406 Improved Large Yellow Cantaloupe.** Weighs 15 to 20 lbs., size about 9x6 inches. Flesh thick, light tan in color, very sweet and spicy.

**409 Golden Prince.** A fine mid-season variety for home or market. Will succeed on heavy soils where other varieties fail, and it holds its rich flavor better than other varieties.

**410 Shumway's Giant.** The largest of pink meated melons, weighing 15 to 20 lbs. Creamy yellow. Very early; a fine sort for the home garden.

**413 Hoodoo (Hearts of Gold).** Fruits practically round, weighing about 2 lbs., small seed cavity. Tender, juicy, sweet and delicious. A good shipper.

**414 Banana.** Resembles a banana in shape, growing 18 to 30 inches long. Flesh salmon color, with delicious banana-like flavor.

**420 Hales Best.** An early melon with very thick flesh of sweet flavor. A Rocky Ford type, but excelling all others for long distance shipping to markets.

**416 Tip Top.** Very productive, of fine appearance, showy. Fruits pale green, turning to yellow at maturity; flesh bright salmon, sweet and delicious. Weighs about 8 lbs.

**418 Osage.** The finest flavored "Queen" of salmon-fleshed melons. Flesh exceptionally thick, tender and sweet. Fruits distinctly ribbed and netted; weigh around 6 lbs.

**423 Mixed.** Give the boys a treat. Start them in gardening with something good. The best assorted varieties for a home melon patch and local markets. The biggest bargain on the page. Postpaid: 1 oz. Pkt., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c.

Osage

## GREEN FLESHED

The following varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c; 5 lbs., \$4.00.

**401 Extra Select Rocky Ford.** Probably the most widely known cantaloupe. Almost round, covered with netting. Green flesh of delicious flavor. Fruits weigh about 2½ lbs.

**408 Montreal Market.** Fruits very large, thick, green meated, delicious and sweet. Often weigh 18 lbs. Almost round, deeply ribbed, well netted.

**412 Early Hackensack.** A most popular variety for home use and truck gardening. Fruits large, globular, flattened. Flesh is thick, very sweet and spicy.

**417 Gold Lined Rocky Ford.** In delicious flavor Gold Lined far excels the regular Rocky Ford. It is

slightly longer and a few days later. Oval in shape, small seed cavity. Flesh thick and firm.

**403 Honey Dew.** 6 to 8 lbs. Round and sweet. Skin white and smooth, flesh light green, fine grained and sweet.

**421 Imperial.** A white melon of the Honey Dew family. Perfectly round with heavy netting. Flesh a bright golden yellow is very thick and fine flavored. Very early.

Kleckley Sweet

## WHITE SEEDED

The following 12 varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50.

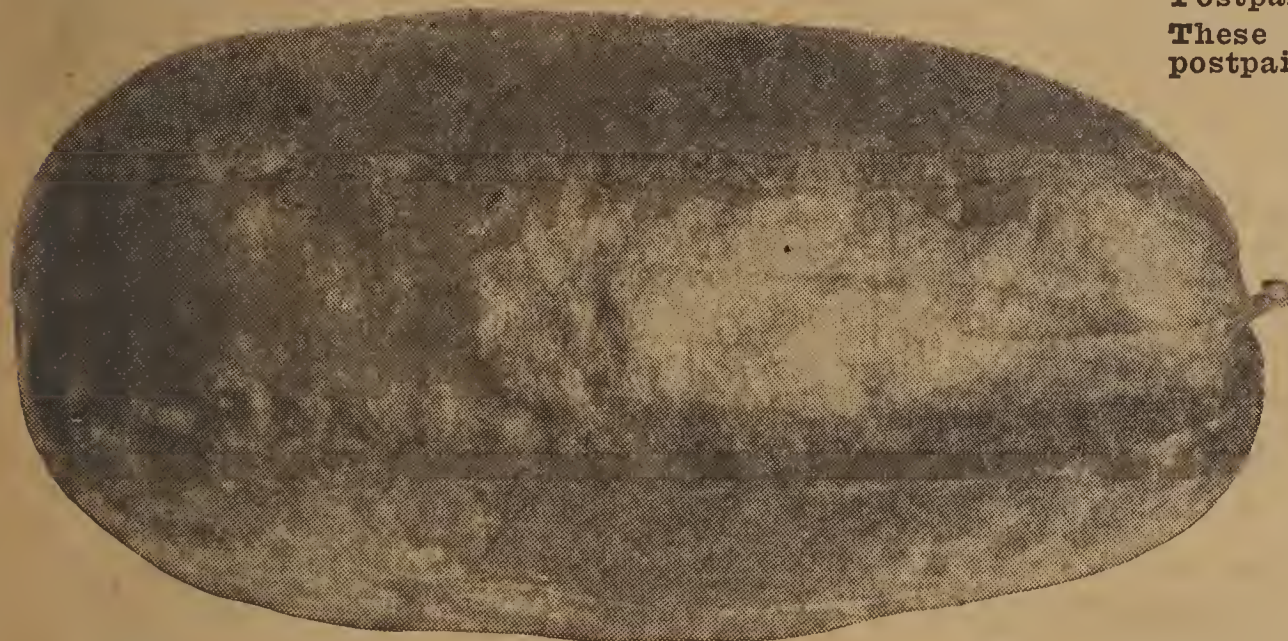

**352 Halbert's Honey.** One of the best for home and local markets; not a good shipper. Color dark green. Thin rind, rich red sugary flesh of fine texture.

**354 McIver's Sugar.** A very hardy grower, most productive. Firm, bright red flesh of finest quality. Elongated and a good shipper.

**355 Peerless or Ice Cream.** Flesh bright scarlet, sweet and of excellent flavor. Medium sized. One of the best early melons for the home garden.

**356 New Irish Grey.** Large, long grey melon of excellent quality. Rich red flesh of good texture. Rind thin but very tough. Good shipper.

**377 Stone Mountain.** Light veined with dark green. Fruits round, weigh about 45 lbs. Flesh rich red of fine texture, tender, sweet, luscious.

Halbert Honey

**359 Monte Cristo.** Northern strain of Kleckley's Sweet. Grows large; very sweet and luscious.

**360 Tom Watson.** Very popular shipping melon of the long type. Early; keeps well. Flesh bright red, of excellent flavor.

**362 Light Icing.** A long greenish grey melon of medium size. Rich red flesh of delicious flavor and sweetness. Poor shipper.

**368 Berry's Improved Kleckley Sweet.** A good melon, excellent for home and market gardens. Good for shipping short distances. Dark green, medium sized; flesh rich red, crisp, tender, delicious.

**369 Golden Honey.** Dark green, medium sized, long oval shape. Cream colored flesh, which is very tender and delicious.

**370 Georgia Rattlesnake.** A large long melon, striped light and dark green. Rind rather thick; flesh red, of good quality. Very prolific and drought resistant.

**372 Phinney's Early.** Small, long type, light and dark green striped. An early melon. Very prolific. Flesh pinkish red.

## Berry's "Sweet As Honey" Melons

1 oz. Halbert's Honey No. 170 **25c** pp.  
1 oz. Golden Honey only  
1 oz. Mammoth Melting Sugar (page 3)  
Regular Catalog Value 41c.

¼ lb. Halbert's Honey No. 171 **59c** pp.  
¼ lb. Golden Honey only  
¼ lb. Mammoth Melting Sugar  
Regular Catalog Value \$1.00

**374 Dixie Queen.** A recent introduction of finest quality. Early, it attains an average size of 15x12½ inches, weight 32 pounds. Color light green striped with darker green. Flesh dark pink with very few seeds—white. Deliciously flavored. Postpaid: Pkt., 8c; oz., 15c; ¼ lb., 40c; 1 lb., \$1.00.

**375 Mixed.** Finest for the boy's melon patch. Old favorite varieties—something to please everybody. 20c for ¼ lb. will pay big returns. Will plant 120 hills of about 30 varieties. Postpaid: 1 oz. Pkt., 8c; ¼ lb., 20c; 1 lb., 60c.

## BLACK SEEDED

These 3 varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50.

**357 Harris Earliest.** Fine for climate where seasons are short. Fruits round, medium sized, dark green striped with light green. Good flavor.

**358 Sweetheart.** Vines vigorous and productive. Fruits large, oval. Rind thin, flesh bright red, firm, sweet and tender. A very fine shipper.

**365 Coles Early.** A very early round melon of good quality. Dark green with lighter stripes, thin rind. Flesh bright red. Good for planting in north.

**371 Berry's New Winter.** A melon of finest quality that will keep until Christmas. Nearly round, pale yellow. Flesh is bright red and sweet as honey.

Postpaid: Pkt., 10c; ¼ lb., 50c; 1 lb., \$1.50

These two outstanding newer varieties postpaid: Pkt., 8c; oz., 15c; ¼ lb., 40c; 1 lb., \$1.00.

**376 Early Kansas Red Seeded.** A remarkably early melon for its large size. Finest quality, flesh rich red of delightful flavor.

**379 Early Northern Sweet.** A new fine first early variety for home gardens. From Minnesota it is nearly round. Color green, flesh of best quality, dark pink in color. Seeds light brown.

# SAVORY GARDEN PEAS

## EXTRA EARLY VARIETIES

These wrinkled varieties postpaid: Pkt., 5c; ½ lb., 17c; 1 lb., 27c; 3 lbs., 75c; 5 lbs., \$1.00. Not prepaid: 10 lbs., \$1.30.

**451 New Laxtonian.** (1½ ft.) The best known of the early dwarf, large podded sorts. Large telephone like pods of finest quality. Requires no support, making it one of the most popular varieties.

**478 Laxton's Progress.** An excellent and standard dwarf early variety for home gardens. Bears heavily, producing straight, plump deep green pods. Each pod contains 8 to 10 large sweet deep green peas.

**450 World's Record.** (2 ft.) A sure cropper uniform in maturing for home gardens and early markets. An improved Gradus, a little earlier, more dwarf and prolific.

**459 Berry's American Wonder.** (1 ft.) Vines bear in greatest abundance. Pods large, containing 5 to 8 delicious peas. Very early.

**460 Thomas Laxton.** (2½ ft.) A great favorite of home and market gardeners. Pods single, plump and square ended, containing 7 to 8 large tender peas of good quality.

**464 Nott's Excelsior.** A very popular and profitable pea for home gardens. Prolific bearer of dark green pods. Pods contain 5 to 8 tender, sweet flavor peas.

**458 Premium Gem.** (1½ ft.) A new development, wilt resistant, for the home garden. Early and prolific of good quality.

**479 Hundredfold.** (1½ ft.) A little earlier than other large dwarf podded peas. Peas are of excellent quality, very productive and the best of its class for home gardens.

Three smooth varieties postpaid: Pkt., 5c; ½ lb., 15c; 1 lb., 24c; 3 lbs., 65c; 5 lbs., \$1.00. Not prepaid: 10 lbs., \$1.25.

**455 Early Alaska.** Smooth seeded, and earliest of all. Hardy, vigorous grower maturing well filled pods of finest quality. Ideal for first markets and home gardens.

**480 Early Bird or Laxton's Superb.** (2 ft.) The earliest large podded semi-wrinkled pea, bearing pods containing 7 to 9 large peas of finest quality. Hardy enough to plant a week ahead of wrinkled varieties.

**457 First and Best.** Favorite home garden variety for early crop. Very hardy and abundant yielder. Yellow seeded peas 6 to 8 to a pod.

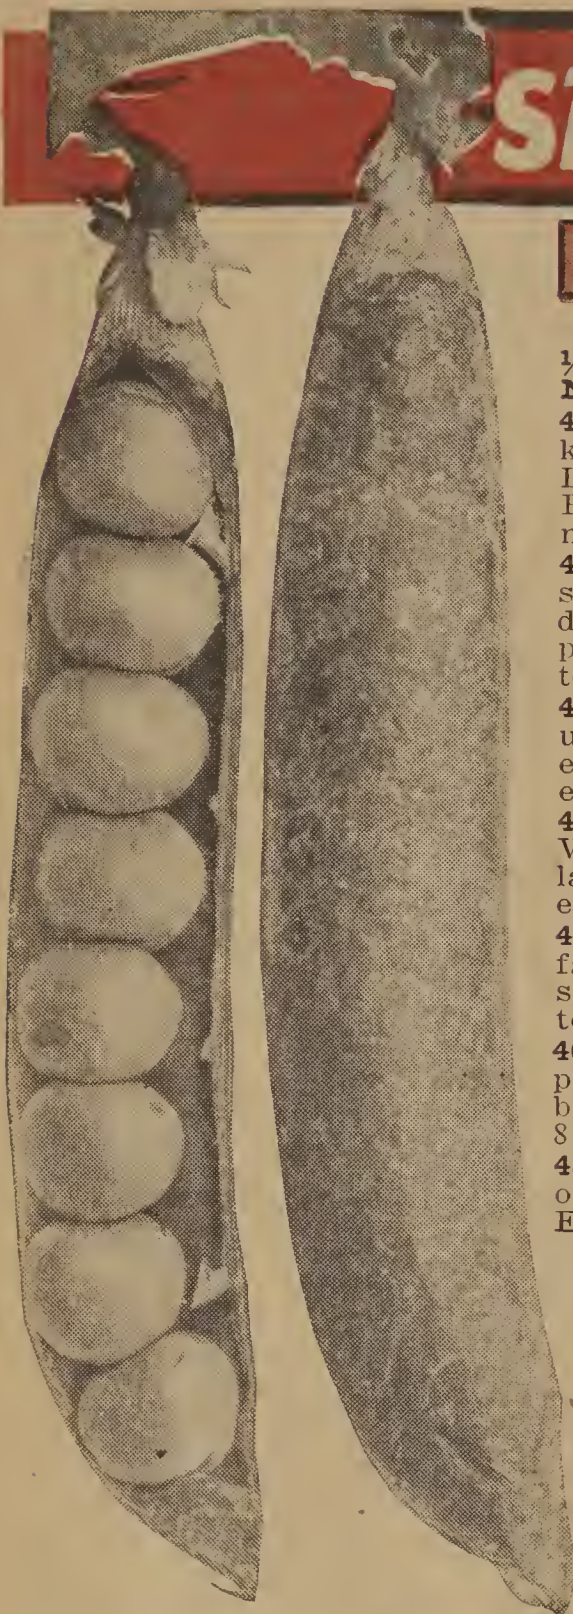

## Pea Culture

Peas thrive best in a rich soil and moderate temperature. Smooth seeded varieties are most hardy and can be planted quite early 2 to 3 inches deep. Don't plant wrinkled varieties until ground is warm and dry. 1 lb. to about 50 feet of row.

## SPECIALS

**463 Little Marvel.** (18 in.) Home gardener's favorite. Exceptional in quality and yield. Pods well filled with tender peas. Extra early. Postpaid prices: Pkt., 5c; ½ lb., 17c; 1 lb., 27c; 3 lbs., 75c; 5 lbs., \$1.10. Not prepaid: 10 lbs., \$1.30.

**468 Berry's Everbearing.** A prolific and continuous bearing variety. Pods 3 to 4 inches long containing 6 to 8 large wrinkled peas of superior flavor. The best main crop or mid-season variety. Postpaid: Pkt., 5c; ½ lb., 17c; 1 lb., 27c; 3 lbs., 75c; 5 lbs., \$1.10.

Little Marvel

## BERRY'S "BEST 4" HOME GARDEN PEAS

**Early Alaska.** Earliest of all. Smooth seeded. 56 days.

**Little Marvel.** Finest early dwarf wrinkled pea. 62 days.

**Berry's Everbearing.** Delicious, prolific, mid-season. 70 days.

**Fillbasket.** Superior late variety (Pole). 75 days.

**No. 14C** ½ lb. above 4 varieties—2 lbs. Postpaid, 49c.

**No. 14CC** 1 lb. above 4 varieties—4 lbs. Postpaid, 79c.

## MID-SEASON VARIETIES

These 2 wrinkled varieties postpaid: Pkt., 5c; ½ lb., 18c; 1 lb., 29c; 3 lbs., 79c; 5 lbs., \$1.20. Not prepaid: 10 lbs., \$1.50.

**471 Telephone.** (4 ft.) A standard variety of high quality, excellent for home and market garden and shipping. Pods filled with peas of fine flavor.

**477 Dwarf Telephone.** (22 in.) Vines light green, stocky and productive. Pods large, filled with 8 to 10 wrinkled peas of excellent quality. Excellent for home gardens, truckers and shipping.

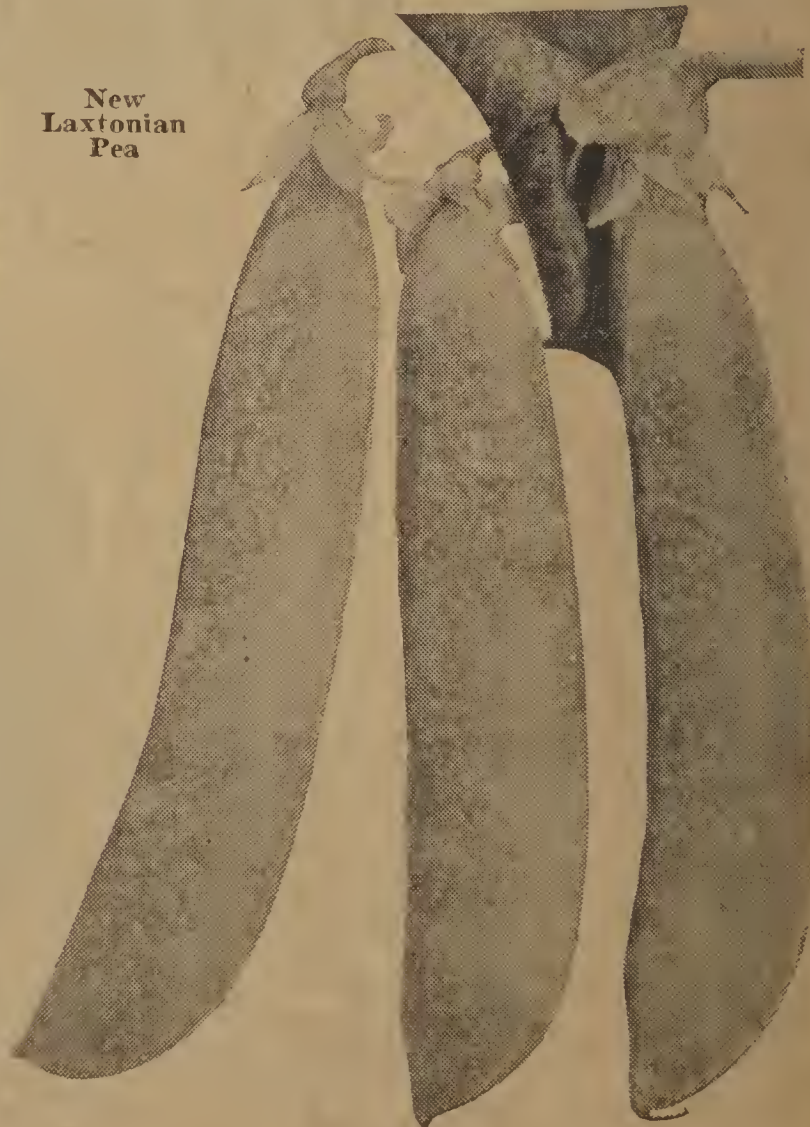

These 2 smooth varieties same price as above 2 wrinkled ones.

**462 Surprise.** (2 ft.) A large podded extra early variety popular for canning. Excels in tenderness of skin and sweetness of flavor.

**476 Dwarf Grey Sugar.** (2-2½ ft.) An edible podded variety; sweet, tender and delicious. Very productive; resistant to Fusarium wilt.

**475 Mammoth Melting Sugar.** (4-5 ft.) The best of the edible podded sorts for home and market garden use, wilt resistant. Very tender and richly flavored. Postpaid: Pkt., 5c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c; 5 lbs., \$1.40.

# PEAS AND LETTUCE

## Heading Varieties

The following 6 varieties postpaid: Pkt., 5c; oz., 10c;  $\frac{1}{4}$  lb., 30c;  $\frac{1}{2}$  lb., 50c; 1 lb., 90c.

**330 May King.** An extremely early, fast growing type. Heads small and compact, with a fine, rich, buttery flavor.

**331 Crisp as Ice.** Attractive bronze, glassy leaves. Heads solid, medium sized, well blanched and of delicate flavor. Popular for the home garden.

**332 Improved Hanson.** Unsurpassed for home and market garden use. Heads large and compact, tender and sweet, light yellow-green color.

**333 Selected Big Boston.** A very popular variety for forcing; splendid shipper. Very solid heads, extremely tender. Leaves tinged with brown, heart light golden yellow.

**334 California Cream Butter.** A fine early heading variety. The solid heads are a rich golden yellow with a most agreeable and delicate buttery flavor. A good shipper and ready seller on the market.

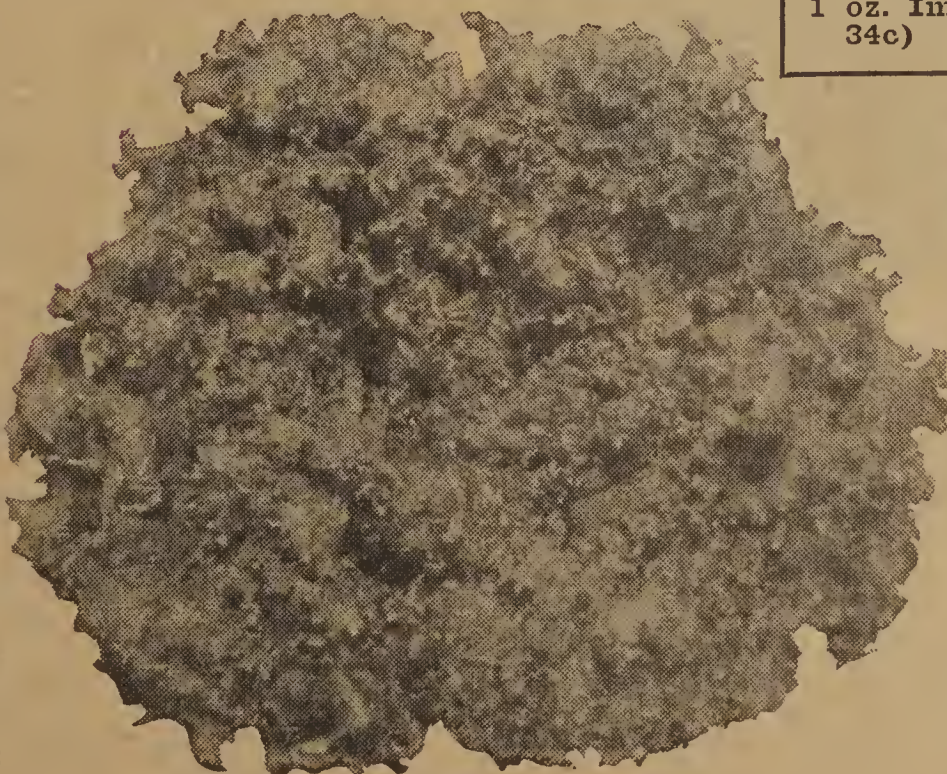

**336 Iceberg.** A large late variety. Conical shaped heads, of medium size, crisp and sweet, white interior. Outer leaves light green tinged with brown, crinkled.

Postpaid, Berry's Bountiful and New York Wonderful. Pkt., 5c; oz., 14c;  $\frac{1}{4}$  lb., 40c;  $\frac{1}{2}$  lb., 70c; 1 lb., \$1.20.

**335 Berry's Bountiful.** Grows beautiful compact heads, weighing 2 to 3 lbs. Exceedingly tender, creamy flavor. A splendid variety for shipping. None excels.

**337 New York Wonderful.** The outstanding shipping variety. Leaves dull green, heads large and solid, crisp and of excellent quality, fine flavor.

## Grand Rapids Lettuce

New York  
Wonderful

## LOOSE LEAF VARIETIES

These 4 varieties postpaid: Pkt., 5c; oz., 10c;  $\frac{1}{4}$  lb., 30c;  $\frac{1}{2}$  lb., 50c; 1 lb., 90c.

**326 Black Seeded Simpson.** A popular variety, leaves large, light green in color. Best for forcing. Tender.

**327 Early Curled Simpson.** One of the most widely used for home gardens. Very early, non-heading, of excellent flavor.

**328 Grand Rapids.** Excellent for early planting outside, and for forcing. Superior quality, beautiful appearance, leaves light green, heavily fringed.

**329 Early Prizehead.** An early non-heading variety. Remains tender and crisp. Leaves medium green, light brown edges.

## LATE VARIETIES

Postpaid price of following 3 varieties: Pkt., 5c;  $\frac{1}{2}$  lb., 18c; 1 lb., 29c; 3 lbs., 79c; 5 lbs., \$1.20.

**465 Potlatch or Fillbasket.** (26 in.) A superior late variety for home and market. Peas tender, fine flavored.

**472 Champion of England.** An old standard favorite for home gardens. Vines dark green 4 to 5 ft. tall. Pods borne in pairs contain 5 to 7 fine flavored, wrinkled peas.

**473 Improved Stratagem.** A favorite with home gardeners because of its large, handsome pods. Very productive. Pods long, well filled with large peas of delicious flavor.

**474 White Eyed Marrowfat.** (5 ft.) Vines hardy and productive. Pods large, peas of fair quality. Grown extensively for dry use. Postpaid: Pkt., 5c;  $\frac{1}{2}$  lb., 15c; 1 lb., 24c; 3 lbs., 60c; 5 lbs., 95c.

# LARGER YIELDS-BETTER QUALITY

## PUMPKIN

**481 Mammoth Prize.** The largest of all Pumpkins. Valuable for stock feeding, but is also fine for pies. Flesh is thick of a beautiful bright yellow, fine grained, solid and tender. **Postpaid: Pkt., 5c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c; 5 lbs., \$4.00.**

**483 Sweet, or Sugar Pie.** Standard variety for pies. Flesh thick, dry and sweet, orange-yellow, and of superior quality. Fruits weigh 6 to 8 lbs., keep well. Will make pies that will melt in your mouth. **Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c; 5 lbs., \$3.00.**

**485 Kentucky Field.** Used largely for canning. Grow large, flat, weigh 10 to 15 lbs. Flesh deep yellow, coarse, thick and nutritious, and of good flavor. Also used for stock feeding. **Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 18c; ½ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25.**

**486 Connecticut Field.** The standard cornfield pumpkin. Fruits grow large, weigh 15 to 25 lbs. Smooth, hard, orange-red skin; flesh orange-yellow, thick, coarse, and sweet. Fine for pies, canning, or feeding to stock. **Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 18c; ½ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25.**

**487 Cushaw or Crookneck.** Very popular variety. Very large, often 2 ft. long, crookneck shape. Creamy white shell; flesh yellow, solid, sweet. Excellent for pies; used also for stock feeding. **Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c; 5 lbs., \$3.00.**

**488 Large Cheese.** Exceptionally early and uniform for early canners and market gardeners. An excellent keeper, making fine pies. **Postpaid: Pkt., 5c; oz., 8c; ¼ lb., 18c; ½ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25.**

**489 Mixed.** A combination filling all practical purposes: for pies, local markets and stock feed. The boys will find just the right size for Hallowe'en too. **Postpaid: 1 oz. Pkt., 8c; ¼ lb., 20c; 1 lb., 60c.**

Connecticut Field Pumpkin

## PEANUTS

Should be shelled before planting. Plant in rows 2½ to 3 ft. apart, 10 inches apart in the row. Cover one to two inches. A sandy soil is best.

**621 New Mammoth Virginia.** Of upright growth. Large pods and kernels. Always yield less imperfect pods than any other variety. Vines good for stock. **Postpaid prices: ¼ lb., 12c; ½ lb., 17c; 1 lb., 30c; 10 lbs., \$2.50.**

## PEPPERS

**Postpaid prices on any of following 7 varieties: Pkt., 5c; ½ oz., 12c; 1 oz., 20c; ¼ lb., 65c; 1 lb., \$2.00.**

**510 Sweet Mountain.** Plants very productive, growing upright, about 2 ft. tall. Fruits large, smooth, handsome. Green turning to rich red, when ripe.

**511 Large Bell or Bull Nose.** Plants small, erect, prolific, early. Large fruits bell shaped, deep green turning to scarlet, mild and sweet in flavor.

**515 Ruby King.** Excellent for home and market garden and shipping. Plants medium dwarf, erect, productive. Fruits dark green turning to ruby red. Flesh thick, mild and sweet. Used for mangoes.

**517 Pimiento.** A good canning variety. Fruits heart shaped and very smooth; color dark green changing to crimson. Flesh thick, sweet and mild.

**512 Cayenne.** A favorite hot variety used largely for canning, pickles, and drying. Plants large and productive. Fruits long, tapering; deep green changing to brilliant red.

**516 Neapolitan Sweet Salad.** A very early, medium large, prolific variety. Fruits yellowish-green changing to bright red. Flesh extremely mild and sweet.

**519 Chili.** Used for canning and drying. Fruits long and tapering, deep green changing to bright scarlet; extremely hot.

**518 California Wonder.** One of the finest mild sweet flavored peppers, with thicker flesh than other varieties. Upright, prolific, vigorous grower. Very attractive, smooth, uniform and deep green. Excellent for shipping, home or market gardening. **Postpaid: Pkt., 5c; ½ oz., 15c; 1 oz., 25c; ¼ lb., 75c; 1 lb., \$2.50.**

**Postpaid prices on each of following 2 varieties: Pkt., 5c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.25; 1 lb., \$4.00.**

**513 Chinese Giant.** One of the best mango peppers. Plants short, stocky. Fruits large, thick, meaty, of sweet flavor; color deep green changing to scarlet.

**514 Golden Dawn or Oshkosh.** Of a beautiful golden yellow color. Very sweet, without the fiery flavor. Very productive.

Ruby King Pepper

## PARSNIPS

**Postpaid prices on all Parsnip: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 55c; 5 lbs., \$2.45.**

**501 Magnum Bonum.** Smooth roots, thick shoulder. Tender and of fine flavor.

**502 Improved Hollow Crown.** Roots long, white and smooth; hollow crowned. Tender and of excellent flavor. Keeps well.

**503 Improved Guernsey.** Roots white, uniformly tapered. Extra thick crown. Flavor delicious.

## PARSLEY

**Postpaid prices on all Parsley: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 55c; 5 lbs., \$2.45.**

**495 Champion Moss Curled.** Very compact plant, with very dark green leaves. Used for garnishing.

**496 Double Curled.** Fine cut, crumpled leaves; dwarf variety, fine for garnishing dishes.

**497 Hamburg or Turnip Rooted.** Leaves can be used like ordinary parsley. Roots grow thick and fleshy and are used for flavoring.

Hollow Crown Parsnip

# ALL TESTED AND GUARANTEED SEED

## RADISHES

The following 11 varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 55c; 5 lbs., \$2.25; 10 lbs., \$4.00.

**526 Crimson Giant.** The largest of early radishes. Suitable for early forcing or planting out-of-doors. It is always crisp, tender and of fine flavor. Never gets pithy.

**528 Early Scarlet Turnip.** An early maturing variety. Roots small, round, skin red. Flesh very white, mild and crisp.

**529 Early Round Dark Red.** A market gardener favorite. Makes rapid growth and is one of the sweetest, most tender radishes on our list.

**530 Early White Turnip.** The earliest white radish. Flesh pure white, crisp and tender. Has a short top and is a quick grower.

**531 Early Long Scarlet Short Top.** Excellent for home or market garden. Roots long and slender, of rich scarlet color. Extra short tops. A quick grower.

**532 White Strasburg.** A variety popular with market gardeners. Roots about five inches long, thick at the shoulder, tapering to a point. Crisp and tender.

**533 French Breakfast.** One of the most popular varieties, excellent for home garden, forcing or early outdoor planting. Excels in appearance and quality. Medium sized, olive-shaped. Scarlet with a white tip. Flesh white, crisp and delicious.

**535 Early Scarlet Turnip, White Tipped.** A favorite for early outdoor planting. Fine in quality and appearance. Roots nearly round, carmine red, white tipped, crisp and mild.

**538 Improved Scarlet Globe.** Our seed is extra select. One of the best forcing varieties. Roots bright scarlet, globular, crisp, tender and of fine quality.

**541 New Icicle.** The most popular white radish. Grow long and slender, free from side roots. Flesh clear white, brittle, mild flavored.

**525 Sparkler.** Resembles Scarlet Turnip White Tip, but more white and somewhat flattened on lower side. Very solid, crisp, tender and sweet flavored. Has short tops and does not become pithy when ready for table use. Excellent for the home garden.

**540 Mixed.** We offer an excellent assortment of the best varieties of radishes, early, medium and late. Postpaid prices: Pkt., 5c; oz., 7c; ¼ lb., 15c; ½ lb., 25c; 1 lb., 45c; 5 lbs., \$2.00.

**725X Berry's Beat-em-all.** (Illustrated page 3.) The crisp, snappy radish we all like. Extra early—ready to eat in 15 to 18 days after planting. Sparkling red top with dainty white tip. A most superior quality radish for home gardens. Postpaid: Pkt., 10c; oz., 20c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

## 3 DELICIOUS SNAPPY RADISHES

The 3 best radishes for the home garden. Extra early, tender, snappy, delicious. Each one a superior variety. No. 21C—36c value—only 25c, postpaid.

1 oz. Berry's Beat-em-all	<b>25¢</b> Postpaid

## HERBS

**683 Caraway.** Seeds used for flavoring bread, pastry, meats and sauces. Postpaid: Pkt., 5c; oz., 10c; ¼ lb., 25c.

**684 Chives.** Belongs to onion family. Tops used for flavoring soups and salads. Postpaid: Pkt., 5c; oz., 50c; ¼ lb., \$1.50.

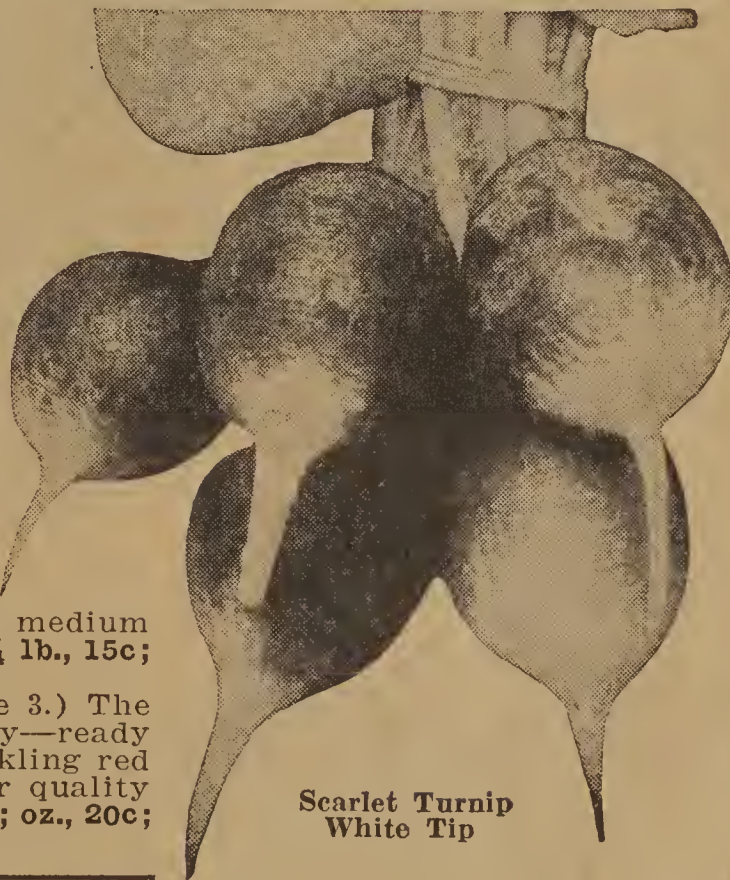

**685 Dill.** Leaves are used in pickles and flavoring soups and sauces. Postpaid: Pkt., 5c; oz., 10c; ¼ lb., 25c.

**686 Horehound.** Leaves used for flavoring, also in manufacturing a cough remedy. Postpaid: Pkt., 5c; oz., 25c; ¼ lb., 90c.

**687 Sage.** Leaves and tops used for seasoning and stuffing. Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 65c.

**691 Lavender.** Grown mostly for its sweet scented, light blue flowers, which when dried are placed in linen closets, as its perfume is moth repellent. Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 70c.

**693 Sweet Marjoram.** Used for seasoning soups, sauces, etc. Can be used either fresh or dried. Postpaid: Pkt., 5c; oz., 25c; ¼ lb., 75c.

Scarlet Turnip  
White Tip

## ORNAMENTAL GOURDS

Gourds are ornamentals but also have some utility values, and are especially attractive to children.

**1258 Dipper.** The ripened fruits hold about 1 qt. each. Pkt., 5c; oz., 10c; ¼ lb., 40c.

**1256 Finest Mixed.** All of the popular varieties: Calabash, Orange, Jap Nest Egg, Dipper, Dishcloth, etc. Many sizes and colors. Postpaid: Pkt., 8c; oz., 20c; ¼ lb., 50c.

# LOWER PRICES

## WINTER SQUASH

These 7 varieties postpaid: Pkt., 5c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., 95c; 5 lbs., \$4.25.

**551 Chicago Warty Hubbard.** Fruits weigh about 14 lbs. Very dark green, heavily warted. Flesh deep orange-yellow, dry and sweet. A prolific, good keeping variety.

**552 Red or Golden Hubbard.** Similar to Green Hubbard, only smaller. Fruits weigh 8 to 10 lbs., orange-red with faint cream colored stripes. Flesh very thick, orange-yellow, dry and sweet.

**553 Mammoth Chili.** The giant among squashes often weighing 150 pounds. The flesh is yellow, very thick, of good quality for stock feed. Also excellent for exhibition.

**554 Improved Hubbard.** Standard winter variety for home, and market gardeners and the best for shipping. Our strain is very early. Dark bronze-green, rind hard and tough, slightly warted. Fruits weigh about 12 lbs., flesh very thick-orange-yellow, fine grained, sweet and dry.

**557 Table Queen or Des Moines.** Desirable for home and market garden; also good shipper. Fruits acorn-shaped, smooth, thin-shelled, dark green, mature early. Six inches long, 3 inches thick. Flesh light yellow, with sweet flavor. Makes splendid pies, bakes well.

**558 Banana.** A late variety, cylindrical. Flesh thick, fine grained, orange-yellow, and of sweet flavor. A great favorite.

**559 Kitchenette.** Sometimes called Baby Hubbard, being about two weeks earlier. Color of shell a dark glossy green, weight about five pounds and a fine keeper. Flesh fine grained, delicious, golden yellow.

**550 Blue Hubbard.** Fruits blue, shell hard and thick. Flesh yellow, fine grained, of fine flavor. Good for pies. Keeps well. Postpaid price: Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25; 5 lbs., \$5.00.

**556 Buttercup.** A new introduction just the right size for baking. Of excellent quality; flavor is similar to sweet potato. Flesh dry, deep rich orange, texture and keeping qualities the best. Postpaid: Pkt., 8c; oz., 15c; ¼ lb., 40c; 1 lb., \$1.25.

## SUMMER SQUASH

These 2 varieties postpaid: Pkt., 5c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 80c; 5 lbs., \$3.50.

**561 Mammoth White Bush Scallop.** A favorite with all our trade. An early maturing round flat squash, largest of the summer varieties. Fruit a clear white, and excellent for stewing.

**563 Giant Yellow Summer Crookneck.** Widely used by market gardeners and shippers. Weight about 5 lbs. Flesh thick and yellow, of rich, meaty flavor.

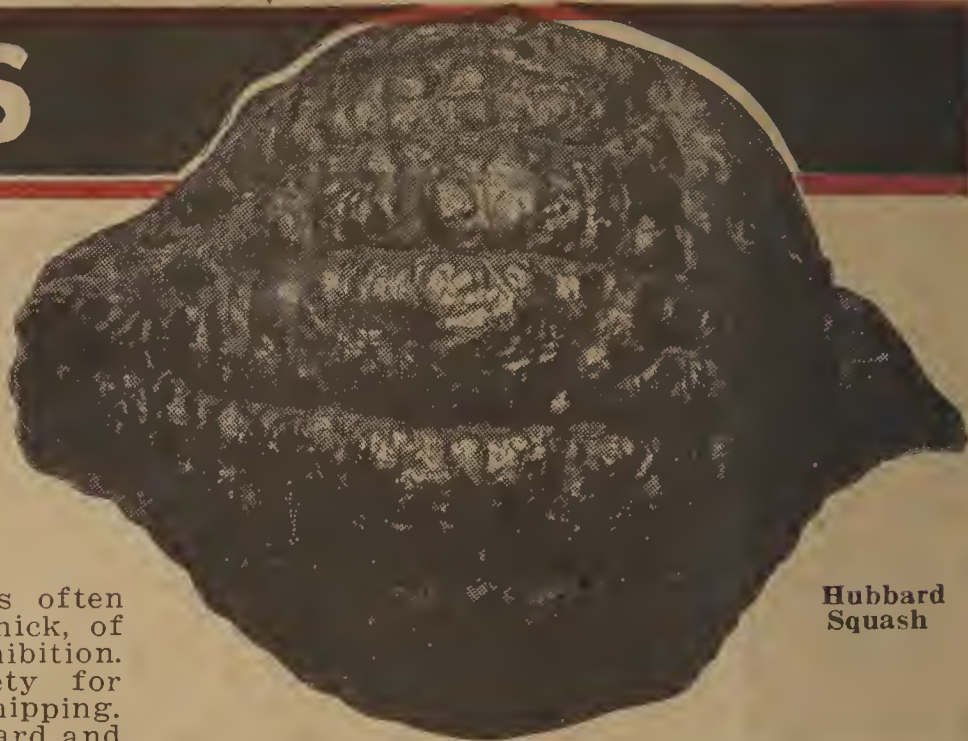

**565 Mixed Squash.** The assortment you want. Has all standard varieties in our regular quality seed, both summer and winter varieties. Postpaid: 1 oz. Pkt., 8c; ¼ lb., 20c; 1 lb., 70c.

## SALSIFY

**571 Mammoth Sandwich Island.** Vegetable Oyster. An improved variety with roots 6 to 8 inches long, thick, tapering, smooth. Decided oyster-like flavor. Fine for soups, etc. Postpaid price: Pkt., 5c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.10.

## MAMMOTH SUNFLOWER

The sunflower seeds have a very high feeding value and are greatly relished by poultry. The Mammoth Russian is the largest of Sunflowers. Plant about the same as corn. If you have no field space to spare, plant them in corners, along fences, etc. Postpaid prices: ¼ lb., 8c; ½ lb., 12c; 1 lb., 18c; 5 lbs., 75c. Write for special prices on larger amounts.

Hubbard Squash

Table Queen

## SPINACH

**581 New Zealand.** It thrives in hot, dry weather, and almost any soil. May be cut throughout the summer, but cannot stand frost. Leaves small, broad and pointed, while plants are large and spreading. Postpaid price: Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c; 5 lbs., \$3.25.

These 4 varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 15c; ½ lb., 25c; 1 lb., 40c; 5 lbs., \$1.75.

**582 Long Standing.** A quick-growing, long-bearing variety for mid-summer use. Plants grow low and spreading, with pointed, dark green, intensely crumpled leaves. May be sown in spring or fall.

**583 Bloomsdale Savoy.** An early variety. Popular for local and long distance markets, for canning, and home use. A long keeper after cutting. Leaves medium size, crumpled, glossy dark green.

**584 King of Denmark.** Very desirable for canning and for market gardens. Leaves broad, rounded, very dark green, somewhat crumpled. An exceptionally long standing type, remaining in condition from one to two weeks.

**586 Summer Savoy.** An improved long standing Bloomsdale. Well savored, dark green and slow seeding, for warmer weather or later spring plantings.

## MUSTARD SPINACH

**580 Mustard Spinach.** A new delicacy for the table. It combines the flavors of Spinach and Mustard. Prepared like Spinach or Mustard greens. More resistant to heat. Pkt., 5c; oz., 8c; ¼ lb., 18c; ½ lb., 30c; 1 lb., 55c.

King of Denmark

Vegetable Oyster Salsify

# RICH TOMATOES

Marglobe

## LATE or MAIN CROPS

**661 Matchless.** One of the best in its class. A midseason variety. Plants strongly productive. Fruits cardinal red, uniform in size and shape, quite smooth; well adapted to canning. **Postpaid: Pkt., 5c; oz., 28c; ¼ lb., 80c; ½ lb., \$1.50; 1 lb., \$2.75.**

**663 New Stone.** A favorite canning variety. Vines large, very productive. Fruits large, smooth, attractive scarlet-red, of fine flavor. **Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.00; 1 lb., \$1.80.**

**These 5 varieties postpaid: Pkt., 5c; oz., 30c; ¼ lb., \$1.00; ½ lb., \$1.85; 1 lb., \$3.40.**

**662 Golden Queen.** The standard large yellow variety for main crop planting. Fruits are smooth and large, uniform in size, and of attractive golden yellow color. They are solid and meaty, mild and delicious in flavor.

**666 Berry's Improved Ponderosa.** This is a variety popular with market gardeners. Vines large and spreading; bear until frost. Fruits are purplish-pink and grow to immense size. They are solid, meaty and of inviting flavor.

**675 Beefsteak.** Bred from the original Ponderosa, and resembles it closely. A brilliant crimson scarlet, wilt resistant, the large fruits are carried in clusters. Flesh is very solid and meaty, making it excellent for table use.

**667 Yellow Plum.** Oval yellow plum-shaped fruit about 2 inches long. Used for pickling and preserves. Very productive.

**669 Ground Cherry or Husk Tomato.** Fruits small, round, yellow, of delicate flavor. Used for preserves.

## 3 NEW FAVORITES

**23X Rutgers.** A fine new early globe type. Flesh is firm, uniform deep red color. Heavy yielder, disease resistant.

**22XX Burpee's Globe.** Bright pinkish-red skinned, globular, medium to large sized, prolific garden variety. Tall plants bear large clusters of fruits.

**22XXX Penn State.** Globular, rich scarlet fruited. Yields heavily on small compact vines. Fruits perfect, evenly colored and free from blemishes.

**Any of these 3 postpaid. Pkt., 5c; oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.25; 1 lb., \$4.00.**

## EARLY TOMATOES

**These 6 varieties postpaid: Pkt., 5c; oz., 25c; ¼ lb., 75c; ½ lb., \$1.40; 1 lb., \$2.40.**

**653 Earlibell.** Fruits are beautiful deep glossy red, remarkably large for extra early. Solid and meaty, of fine flavor. Vines vigorous and productive.

**655 Earliana.** Standard early variety for home or market garden. Vines medium small, very productive. Fruits deep scarlet, medium to large, exceptionally smooth.

**656 Field's Early Redhead.** Globe shaped, slightly flattened. Color deep blood-red. Extra smooth, seldom cracks open. Good thrifty grower, producing abundantly.

**674 Bonny Best.** Splendid large second early tomato. Valuable for shippers, market gardeners, canners. Fruits medium large, apple shaped, smooth, solid, bright scarlet in color, of excellent quality.

**665 New Marglobe.** A most popular all-purpose variety introduced by the U. S. Department of Agriculture. Very vigorous and productive, resistant to disease, wilt and rust.

Uniformly large solid fruits, bright scarlet in color, of delicious quality and flavor.

**659 Chalk's Early Jewel.** Produces the largest, smoothest tomatoes in its class. Color bright red, flavor delicious, fruits solid and meaty. A second early variety. Prolific yielder.

**These 3 varieties postpaid: Pkt., 5c; oz., 28c; ¼ lb., 80c; ½ lb., \$1.50; 1 lb., \$2.75.**

**673 Pritchard or Scarlet Topper.** Fruits large, smooth, and solid, bright scarlet. Heavily productive; fine for home use or market. A disease-resistant variety.

**652 John Baer.** An excellent early variety for truck gardening or can-

ning. Vines of medium height. Fruits medium sized, scarlet red, will not burst when ripe.

**670 Breakaday.** A Wilt Resistant variety, developed by U. S. Department of Agriculture. Outstanding for early maturity and productiveness. Fruits orange-red, medium large, smooth, solid and heavy.

**671 Oxheart.** A newer and distinctly attractive variety that sells well on the market. Fruits grow extremely large, heart-shaped, pink. Very solid, meaty

and of a delicious subacid flavor. It is almost seedless. We urge you to raise some Oxhearts. **Postpaid prices: Pkt., 5c; oz., 50c; ¼ lb., \$1.85; ½ lb., \$3.50.**

**23XX Berry's Early Scarlet Globe.** Earliest, wilt-resistant globe shaped variety. Bears heavy, meaty, scarlet fruits. **Postpaid: Pkt., 10c; oz., 40c; ¼ lb., \$1.50.**

# LIVE VIGOROUS SEED

Brussels Sprouts

## MISCELLANEOUS

**676 Brussels Sprouts.** Of the cabbage family highly desirable for home and market garden. Plants thickly set with firm cabbage-like balls, maturing successively. Postpaid price: Pkt., 5c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.

**690 Kale, Dwarf Green Curled Scotch.** A member of the cabbage family, used for greens. Leaves large and crimped. One of the most palatable of vegetables. Postpaid price: Pkt., 5c; oz., 8c; ¼ lb., 28c; ½ lb., 45c; 1 lb., 85c.

**701 Leek, London Flag.** Belongs to the onion family; used for soups and stews. Postpaid price: Pkt., 5c; oz., 15c; ¼ lb., 55c; ½ lb., \$1.00.

**715 Vegetable Orange, or Vine Peach.** Fine for pickles, preserves, etc. Postpaid price: Pkt., 5c; oz., 12c; ¼ lb., 35c; ½ lb., 65c.

**720 Okra, Long Green Podded.** The best variety that you can plant. Plants dwarf and very productive. Valuable for soups and stews. Postpaid price: Pkt., 5c; oz., 8c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 50c.

**705 Collards, Georgia.** A good substitute for cabbage which succeeds on poor soil, grown especially in the south. Can be boiled like cabbage or used as cole slaw. Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 35c; 1 lb., \$1.00.

**706 Broccoli, Italian Green Sprouting.** Forms large head consisting of a cluster of small heads. Both stems and heads are cooked and served like cauliflower, but is of a more delicate flavor. Postpaid: Pkt., 5c; oz., 35c; ¼ lb., \$1.15.

## TOBACCO

Postpaid price on each of the following 2 varieties: Pkt., 5c; oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.10.

**727 Havana.** An early variety used largely for cigar wrappers, on account of the thinness and fine quality of the large leaves. Rich flavor.

**728 White Burley.** Broad attractive leaves. Easy to cure. Used for fillers and wrappers.

## KOHL-RABI

Postpaid: Pkt., 5c; oz., 15c; ¼ lb., 45c; ½ lb., 75c; 1 lb., \$1.25.

**695 Early White Vienna.** Dwarf variety. Excellent for home and market garden use. Bulbs 2 to 3 inches in diameter, globular, very light green; flesh white, tender and crisp.

**696 Early Purple Vienna.** Desirable early dwarf variety. Bulbs globular, purple, with white, tender flesh.

## "ALL-AMERICA" FLOWERS—NOVELTIES

### 1938-1939 Winners

**Scarlett O'Hara Morning Glory.** (GOLD MEDAL OR HIGHEST AWARD WINNER IN 1939 ALL-AMERICA TRIALS.) Scarlett O'Hara is an entirely new color in this popular garden flower, rich dark wine red or deep rosy crimson. Flowers are good size about 4 inches in diameter, freely produced on fast growing vines which start blooming within 65 days after seed is sown and last until frost. They are very showy for covering a fence or trellis. The dark green foliage does not make a heavy growth leaving the plants graceful in appearance. This most beautiful morning glory flower is easy to grow. Pkt., 25c.

**Topaz Rose Petunia.** Winner of the 1938 All-America trials. The color is a fiery velvety rose of a brilliancy seldom seen. It is slightly suffused with gold which gives it its fiery appearance and the throat is the color of topaz. Early blooming and very prolific all season until killing frost. Nothing else like it. Most popular for pots, boxes, cutting and bedding. Pkt., 25c.

Top  
White  
Globe

## TURNIPS

These 7 varieties postpaid, and Rutabaga: Pkt., 5c; oz., 8c; ¼ lb., 19c; ½ lb., 35c; 1 lb., 49c; 5 lbs., \$2.20.

**601 Purple Top Strap Leaf.** Fine for table use or stock feeding; one of the most widely planted varieties. Tops medium small, roots four to six inches across, flat. Purple-red at the top; flesh white, fine grained and tender.

**602 New White Egg.** Fine for market gardeners. Roots egg-shaped, smooth. Skin is thin. Flesh is white, finegrained, cooks mealy and tender. Quality excellent.

**603 Red Top Strap Leaf.** A medium early, productive variety. Roots slightly flattened; upper part reddish, white below. Flesh mild, sweet and tender.

**605 Large White Globe.** A very productive type. Large, globe-shaped, skin white and smooth. Valuable for home garden and market trade.

**607 Purple Top White Globe.** Unsurpassed for home planting or truck gardening. Attractive in appearance, fine in quality. Roots large, globe shaped, lower portion white, upper-part purple-red. Flesh is of fine flavor, white, crisp and fine grained.

**609 Cowhorn.** Grown largely for stock feeding. Roots 12 to 15 inches long, tapering, often crooked. Flesh tender and mild flavored. A good keeper.

**608 White Milan.** An extremely early variety, used for forcing or planting outdoors. Roots pure white, flat, flesh sweet and tender.

## RUTABAGA

These 2 varieties postpaid: Pkt., 5c; oz., 8c; ¼ lb., 19c; ½ lb., 35c; 1 lb., 49c; 5 lbs., \$2.20.

**611 New Monarch or Elephant.** Yields larger roots and more per acre than any other sort.

**612 Improved Purple Top Yellow.** A dependable variety. Roots large, round, yellow with purple top; flesh light yellow, firm, sweet and tender.

### 5 Best Flower Novelties of Recent Years

**Fantasy Star Dust Zinnia.** (All-America Winner 1937.) Star Dust is a lovely golden yellow variety with the characteristic informal, shaggy-petaled flowers. Stems good length for cutting—plants free blooming. Blooms 45 to 50 days after planting seed. Pkt., 15c.

**Clarke's Earliest Heavenly Blue Morning Glory.** A most lovely shade of beautiful sky blue color which shades at the center to a golden throat. Early flowering—heavily covered with very large flowers. Ideal as a climber for fence, trellis, or small building. Pkt., 15c.

**Crown of Gold Marigold.** (Gold Medal Winner 1937.) A new odorless Marigold. A beautiful golden orange shade. Early blooming, flowers for weeks and stems good length for cutting. Pkt., 15c.

**Antique Gold (Half Dwarf) Snapdragon.** A beautiful new and distinct color in this favorite garden flower. Shades of old gold, copper, terra cotta, fawn and orange blended in a delightful combination. Pkt., 15c.

**Maytime Sweet Pea.** Summer flowering. A rich golden cerise color, producing four and five immense flowers on long, husky stems. A very strong grower, ideal for the home garden. Pkt., 15c.

All 5 varieties 1 pkt. each 49c, postpaid.

Giant Comet Aster

**FINE SEEDS AT SUCH LOW COST**

You may wonder how we can give you the best quality seeds in colored packets at such a low cost of 5c each, 6 for 25c. Our packets are liberally filled, too, with planting instructions given for each variety ordered. We hope you desire to save money—because by not listing many varieties in picture and colors in this catalog as some do—enables us to furnish you the same quality and amount of seed in our 5c packet that sells in other catalogs for 10-25c.

Each flower is marked (A.) or (P.).

**Annuals.** (A.). Produce flowers in one year and die. Easy to grow and continuous bloomers.

**Perennials.** (P.). Plants which usually start blooming the second year and continue for many seasons.

**Varieties for Cut Flowers or Bouquets**

**1102 Aster Giant Comet.** (A.) Produces an abundance of large, beautifully colored blooms.

**1103 Aster. Berry's Late Branching.** (A.) Large, deep, double blossoms on long stems.

**1104 Aster. California Giant.** (A.) Large shaggy petaled or ostrich feather type.

**1105 Aster. Dwarf Chrysanthemum Flowered.** (A.) Large double flowers.

**1106 Berry's Special Mixed Giant Wilt Resistant Asters.** Large pkt., 15c.

**1108 Aster Super Giant El Monte.** The finest extra large flowered Crimson Aster. Unusually early. Pkt., 10c.

**1122 Bachelor Button, Double Blue.** (A.) A delightful cut flower blooming all summer.

**1145 Calendula Orange Shaggy.** (A.) New beautifully fringed long narrow petals. Pkt., 10c.

**1150 California Poppy.** (A.) Finely cut flowers; yellow, orange and crimson.

**1155 Calliopsis Golden Wave.** (A.) Hardy. Free bloomer, beautiful golden blossoms. Pkt., 10c.

**1160 Candytuft.** (A.) Lovely colored, flower clusters.

**1165 Carnation. Giant Marguerite Mixed.** (A.) Large double flowers, fragrant, beautifully colored.

**1166 Carnation. Pink Marguerite.** (A.) Beautifully mixed, striped colors.

**1180 Celosia Globosa.** (A.) Large globe-shaped flowers, crimson scarlet.

**1177 Centaurea Imperialis.** (A.) Large double, sweet scented.

**1175 Centaurea Cyanus. (Bachelors Button).** (A.) Easy to grow and blooms continuously.

**1185 Chrysanthemums.** (A.) Large, daisy shaped blooms. Beautiful colored rings surrounding centers.

**1168 Clarkia.** (A.) Flowers of pink and rose in clusters.

**1205 Columbine.** (P.) Beautiful spring blooming perennials.

**1190 Coreopsis.** (P.) Brilliant golden yellow and orange.

**1200 Cosmos, Single Mixed.** (A.) Daisylike flowers in all shades lavender, pink, red, on tall feathery green stalks.

**1201 Cosmos Double.** (A.) Double crested flowers in center of rare beauty.

**1202 Cosmos, Orange Flare.** (A.) Gold Medal Winner in 1935. Blooms a deep vivid orange, foliage light green. Pkt., 10c.

Guinea Gold Marigold

**1215 Dahlia Berry's Special Mixture.** (A.) Embraces all strains of double-flowering Dahlias, also the single flowering and striped sorts. Large pkt., 15c.

**1220 Single Dianthus or Pink.** (A.) Brilliant coloring. Hardy, easy to grow.

**1221 Berry's Double Dianthus.** (A.) Flowers are fragrant with fringed petals and brilliant colors.

**1208 Didiscus (Blue Lace Flower).** (A.) Large lace-like blooms of a delicate heavenly blue color.

**1210 Double Daisies, Mixed.** (P.) The popular English Daisies. Hardy, easy to grow. Ideal for cool shady places. Pkt., 10c.

**1212 Feverfew.** (P.) Small, double white flowers, well adapted for borders, beds and cutting.

**1234 Gaillardia (Blanket Flower), Double Mixed.** (A.) Flowers red, lemon, orange, and white.

**1235 Gaillardia Single.** Flat petal flowers, scarlet and orange colors.

**1246 Gilia (Blue Thimble Flower).** (A.) Beautiful bushy plants. Covered with lavender-blue flowers.

**1247 Godetia.** (A.) Flowers of satiny texture in many rich colors.

**1250 Gypsophila (Baby's Breath).** (A.) Graceful plants of light fairy-like texture, used in dressing bouquets.

Except New Introductions and Special Mixtures (Larger Packets)

**1120 Helichrysum (Straw Flower).** (A.) Hardy, for winter bouquets.

**1275 Larkspur (Delphinium).** (P.) Finely cut, feathery foliage, set with long floral spikes of double blossoms. White.

**1276 Larkspur. Rose. Hardy.**

**1277 Larkspur. Mixed colors.**

**1281 Leptosyne (Sea Dahlia).** (A.) Large dahlia yellow flowers.

**1285 Lobelia.** (A.) Produces a wonderful variety of flowers brightly colored.

**1283 Lupin.** (A.) Long spikes with various colored flowers, blue, white, yellow and rose.

**1290 Marigold, French.** (A.) Dwarf, compact grower. Small bright blooms of gold and brown.

**1291 Marigold, African.** (A.) Large double flowers on long stems.

**1292 Marigold Guinea Gold.** (A.) A brilliant orange flushed with gold. 100% double. Pkt., 10c.

**1293 Marigold Gigantea Sunset Giants.** (A.) The new giant sweet scented marigold. Average about 5 inches in diameter. Plant 3 1/2-4 ft. high. Wide color range from deep orange to primrose. Most blooms are full doubles. Pkt., 10c.

**1295 Mignonette.** (A.) Fragrant cone-shaped flower spikes.

**1305 Berry's Dwarf Nasturtiums.**

**1306 Berry's Mixed Tall Nasturtiums.**

**1304 Golden Gleam Nasturtium.** The new sweet-scented variety of gorgeous yellow.

**1303 Double Glorious Gleam Hybrid Nasturtiums.** Gorgeously colored, large, well formed flowers of dazzling beauty. Pkt., 10c.

**1302 Scarlet Gleam Nasturtiums.** Largest blooms of any nasturtium. A fiery orange-scarlet.

**1308 Nigella (Love-in-a-Mist).** (A.) Flowers blue. Blooms profusely. Grows almost anywhere.

**1329 Poppy, Oriental.** (P.) One of the showiest, most brightly colored flowers grown. 2-3 ft. Shades of red, scarlet and orange.

**1330 Poppy, Double Carnation Flowered.** (A.) Large flowers with fringed petals, many colors.

**1331 Poppy, Shirley.** (A.) Large, graceful, satiny flowers borne on tall stems.

Straw Flower—Helichrysum

# BEAUTIFY at LOW COST

Some flower varieties are listed under more than one group heading such as "Cut Flowers," "Vines and Climbers." The description of any variety is given under the first group in which it is listed. Where listed again no description is given but the abbreviation such as (C. F.) Cut Flowers or (S. F.) Special Fragrance indicates it is listed and described under that group.

## Cut Flowers—Continued

**1332 Berry's Special Mixture Double Poppies.** Includes best double large flowering varieties. Pkt., 10c.

**1348 Salpiglossis.** (A.) One of the easiest flowers to grow. Rich in color.

**1349 Shasta Daisy.** (P.) Hardy border plant. Large daisy-like flowers.

**1350 Berry's Half-dwarf Mixed Snapdragon.** (A.) Their beautiful color and fragrance are wonderfully pleasing.

**1351 Berry's Tall Mixed Snapdragon.** (A.) Best for cut flowers.

**1355 Eckford Mixture Sweet Peas.** (A.) Large flower kinds, fine assortment of colors.

**1356 Berry's Superb Spencer Mixture.** (A.) Flowers are more open, have longer stems, produce more flowers and for longer time.

**1370 Sweet William.** (P.) Excellent border plants. Hardy, free blooming.

**1385 Vinca.** (A.) Ornamental. Free bloomer till frost.

**1389 Zinnia, Colossal Crimson.** (A.) Large blooms, crimson colored.

**1331 Poppy, Shirley.** (A.)

Spencer's Sweet Peas, Mixed

# BARGAIN PRICES SEED POTATOES

NORTHERN GROWN

SELECTED QUALITY

## Better Seeds—Better Crops

Most experienced potato growers have learned that it pays them to plant new northern grown seed potatoes every year. The extra yield and finer quality generally makes it profitable to get new northern grown seed each year. It pays to plant better seed. The difference in cost is not a big item. The satisfaction of heavier yields and better quality makes the investment a wise one.

### NORTHERN GROWN SEED DESIRABLE

Our experience has been that our customers are best satisfied with northern grown seed stock. Practically all of our seed comes from Minnesota and is a type of seed that we can guarantee to show up to your satisfaction. If you are not thoroughly pleased with your shipment, write up for shipping instructions and a refund. Our potatoes are all secured for seed purposes only. We endeavor to obtain the finest quality to sell at the low price we make.

### WARBA—AN EXTRA EARLY POTATO An Extra Heavy Yielder

It is a creamy white potato yet earlier than the earliest red variety grown in Minnesota at the time of this writing. It is roughly about eight days earlier than the early Ohio. Warbas are fine for earliest market or for home gardens.

The Warba is a blocky type of potato similar to the Irish Cobbler. The Creamy skin is suffused with pink around the eyes. Eyes somewhat deep. The foliage is very resistant to disease such as mild and crinkle mosaic. This potato has a wide adaptability, producing its finest texture and quality on soils that are not extremely heavy.

This variety has certainly come up fast in popular favor because of its earliness, yield, color and quality. If you want something extra early be sure to order some of Berry's Warbas.

### BERRY'S EARLY RED RIVER OHIO

This is a standard early potato. We know of no early potato in bigger demand as a table variety. They have a fine quality and an enormous producing ability. Early Ohios are well suited to heavy gumbo soils as well as to sandy areas. Its wide adaptability makes it a great favorite.

The color of the skin is pink to light red. Flesh white. The tubers are oval in shape and slightly flattened. Eyes are moderately shallow. Very little waste in peeling. They are easy to dig. Northern grown seed generally matures earlier which is another reason for getting such seed stock. As an all around early, heavy yielding fine quality potato you will find early Red River Ohios hard to beat.

### BERRY'S IRISH COBBLER

Also an early potato although about a week later than the Ohios. It is a great potato and the results our customers have secured from our seed has brought us most enthusiastic letters. They report enormous yields and fine flavored quality.

Both skin and flesh are white. It is a blocky type, roundish and slightly flattened. Eyes are relatively deep. Plants are sturdy. An excellent potato for clayey type soils.

The Cobbler cooks dry and mealy. Tubers grow to good size and are good keepers. It is truly a fine potato. You may have grown Irish Cobblers before but we urge you to plant some of Berry's Cobblers this year. Our prices are low and we believe you will harvest a crop that you can really brag about.

### BERRY'S GREEN MOUNTAIN

A medium late variety of exceptional quality and fine flavor. Produces heavy crops and is a good keeper. It has a creamy white skin that is slightly netted which is a general indication of fine quality. The tubers are round to oblong and slightly flattened. Eyes are few and shallow. The plant is a very vigorous grower and produces well on both heavy and lighter soils.

The flesh is white and fine grained. Cooks dry and mealy. Retains its fine quality during the winter. It certainly is a dandy main crop variety. For big quantity and fine quality production it is hard to excel.

### BERRY'S RUSSET BURBANK

We classify this with the Green Mountain as a medium late variety. Also a quality potato and one of the very best for baking. A moderately long potato slightly flattened with rounded ends. Color of skin is yellowish or golden brown. The eyes are shallow. Flesh is pure white and solid. It is a stronger grower and we consider it better than the average in disease resistance. The Russet Burbank is a heavy yielder. It keeps well and is a very fine medium late potato.

### BERRY'S RURAL NEW YORKERS

This is a late potato. One of the best keepers. Has white skin and flesh. The tubers are round to round oval and somewhat flattened. Eyes are shallow. Stems and foliage are dark green.

This variety is exceptionally drought resistant. It is a great yielder and is our choice as the best of the late varieties. It has a wide adaption. We recommend Berry's Rural New Yorker to those wanting a good all around late potato for market or home garden. It combines big yields with fine quality and excellent keeping characteristics. They're good till new crop comes on in the spring.

Small lots, any variety. Postpaid to 4th Zone: 1 lb., 20c; 5 lbs., 65c; 10 lbs., \$1.00.

\$1.30  
PER BU.  
10 BU. FOR  
\$12.00

### POTATO TREATMENT Corona P. D. 7 Costs only 2½¢ bu

The modern method of checking disease on potatoes. No soaking necessary. Just mix, dip, drain and dry and your potatoes are ready to plant. Controls such costly diseases as scab, rhizoctonia and black leg. Increases yield 15 to 25%. One pound treats 30 to 35 bushels.

Prices: Prepaid, 4 oz. size, 25c; 1 lb., 75c.

Twinbrook  
Farm,  
Emaus,  
Penna.

Dear Sirs:

I have been using your seeds for thirteen years which in itself means

quite a lot. I have found your seeds satisfactory and always saved money by buying from your Company. My Sudan was wonderful and your Dakota No. 12 Alfalfa was the only field in the neighborhood that did not show bare spots after the first winter.

Yours,

P. G. Lichtenwalner.

# 3 SPECIAL VALUES IN HULLED AND SCARIFIED SWEET CLOVER

## LOT WONDERFUL WHITE SWEET CLOVER

**\$3.90**  
PER BU.  
60 LBS.

Those who wish a fancy, higher colored and larger berried grade of Big White Sweet Clover will find a very attractive bargain in Lot Wonderful. The seed is plumper and brighter colored than the sample of Lot Do-More enclosed with the book. In fact it comes very close to our World Brand grade. You can see what that is like by examining the sample of World Brand Red Clover which is also enclosed.

### A Quality Seeding

Lot Wonderful is just a shade under this grade and therefore we can sell it at a lower figure. For all practical purposes this lot should do everything that the higher priced seed can do. It is recleaned, hulled and scarified with care. We'll gladly send you a sample of it. You can compare it with the best grade of other dealers and in many cases you may be unable to detect any difference. But when you then compare prices you should find in Lot Wonderful an opportunity to save from \$1.00 to \$1.50 per bushel.

### Judge for Yourself

Don't be misled by propaganda tending to discourage mail order buying. Our seed is sold subject to your state or government test. See our guarantee on page 6. We invite you to have your seed tested. Our business has grown and grown because our customers were satisfied with the quality received and savings made. Customer satisfaction means most to us and to you. In this Lot Wonderful you have a value, a lot that will sell fast, for our customers sure know how to pick 'em.

## WHITE SWEET CLOVER Lot DO-MORE

### SEE SAMPLE ENCLOSED

This lot stretches your money over more acres than any other. It is our lowest priced grade. It is a quality that has been giving our customers satisfactory results. It isn't the finest for looks but the favorable reports we get on it indicate its real value and after all, seed is sown for results.

Lot Do-More is the Big White or Common Sweet Clover. It has been scarified. It comes from recleaned stocks. The crop from this seed is exactly the same variety as will be secured from any of the higher priced grades. This Big White Sweet Clover is the greatest of all soil builders and the most productive pasture crop. See page 36 for further information on the value of this crop.

### This Grade in Big Demand

Every year we sell large quantities of this grade and this year the quality is improved. As mentioned above it is not the finest looking seed. It has some off-colored seeds in it. The berries are smaller and therein lies the secret of its performance in the field. While the germination per hundred seeds is lower than in the average larger berried grades, there are so many more seeds in a pound of Lot Do-More that this helps to compensate for the lower test per hundred seeds. The true value of a lot of seed, in our opinion, is the number of sprouts per oz. or per pound. You sow your seed by weight or measure and not by counting it out.

### Reduced Seeding Costs

You do not have to sow Lot Do-More at any heavier rate than the higher priced seed. This lot is a real value. It costs you only around 65c an acre to sow this seed. Compare that with the cost of sowing any other clover seed. Our customers who use this quality are our best and most enthusiastic boosters. They report excellent results and come back for more.

You will find enclosed a sample showing the representative quality of this lot. That shows what you may expect when you buy this grade. You may order this seed with perfect assurance of receiving seed of this character. You can have 60 days to test it after you get it. Then, if for any reason you are not entirely pleased you may return it and your money plus freight will be refunded. We cannot emphasize this value in a fairer or stronger way.

**\$3.30**  
BU.  
60 LBS.

## YELLOW SWEET CLOVER Lot SAV-MOST

**\$3.90**  
PER BU.  
60 LBS.

This is the biennial or two year yellow blossom Sweet Clover. It is somewhat leafier than the White. Does not grow as tall or coarse. Matures 10 days to two weeks earlier. Preferred by many especially when a hay crop is desired. Some customers report it is easier to get a stand of yellow. It is a fine soil builder and pasture crop.

### Our Lowest Priced Yellow

Lot Sav-Most gives you a very low cost on this fine stemmed leafy sweet clover. Yellow generally sells at a premium over white and this lot gives you a lot of value at a low cost. The quality is better than Lot Do-More, described above. At our low direct-to-you price you can make a seeding of this fine clover at a real low cost. Sow it alone or use it in mixtures for pasture, soil building and soil erosion work. All of our Sweet Clover seed is of adaptable origin for the soil conservation program.

You will find other grades of Yellow Blossom Sweet Clover described on page 38 of this book. Every lot is a good value but if you wish serviceable seed at the lowest seeding cost, Lot Sav-Most is the one to buy. It is sold under the same guarantee that gives you protection on any seed you may buy from us. See page 6.

### Inoculate All Clover Seed

Inoculate with Berry's Nodule Germ. Inoculation helps make more vigorous growth, better stands and yields. Costs only 30c, 1/2 bu.; 50c, 1 bu.; 90c, 2 1/2 bu. Easy to apply. Read page 41. It pays to use it.

# A GREAT ALFALFA BARGAIN for 1939

**LOT**  
**HONEST JOHN**  
FOR FINE STANDS  
BIG CROPS ~ LOW COST

Only  
**\$11.90**  
BU.  
60 lbs per bu.

**GENUINE HARDY CORN BELT STOCK**

Origin qualifies for agricultural conservation program. Serviceable seed priced extremely low. We believe this to be absolutely the lowest price at which you can buy seed of this character. It has purity and germination tests that we have found adequate to produce good heavy stands. And our customers have found it so. The saying "thick as hair on a dog's back" indicates the character of reports we have from many customers. People write us "we want some of your Honest John because we saw what it did for our neighbors. They had better stands than we did from much higher priced seed."

This Honest John is the same in hardiness as any of our Corn-Belt stock. It should yield as well and last as long. The appearance of the seed, however, is not as nice as the higher priced lots. The color is not as good nor the berries as large. If you do not object to a lack of uniformity so long as it can produce satisfactory results, then the seed should please you. It is a seeding that pleases thousands. Sow 15 lbs. per acre. There are more seeds per pound than in larger berried stock.

**TWO OUTSTANDING ALFALFA VALUES. BUY NOW!**

**GENUINE MINNESOTA GROWN**

**GRIMM ALFALFA**  
LOT NORTH  
99% CROP PURITY

**FROM THE "ORIGINAL" GRIMM FIELD STATE~SUPER HARDY STOCK**

This Lot North comes from Minnesota, the home of the original Lymans' Grimm field. In this northern state damaging extremes of weather kill out the weaker plants and leave only the most rugged ones to produce seed. That means an extremely hardy type of stock and we consider such Grimm especially desirable. It is in big demand and is selling at premium prices in many places.

Wherever conditions cause much trouble with winter killing, Grimm should be used. Here is a lot of fine quality seed that is priced to make it an extraordinary value. We secured this seed at a low figure. It is priced so you can secure a nice saving by acting promptly. Don't wait.

Lot North has the high quality characteristics. Good color. Smooth uniform berries, 99% pure including around 3% crop seed which is principally Red Clover and Sweet Clover. Good germination. A vigorous growing type. We'll gladly send you a sample. Compare it with the best grades. Consider the super-hardy character of this seed. Your saving on this lot should run around \$2.00 to \$4.00 per bushel.

This is not our lowest priced seed. Other lots are described on page 31, 42 to 45 and back cover. They are all fine values but this is such an outstanding bargain that we give it our special recommendation to all who want Genuine Minnesota Grown seed and do not object to a small percent of crop seed.

**EXTRA HARDY GRIMM**

**\$15.90**  
BU.

PER BU.

60 LBS. to BU.

**MEDIUM**

**RED CLOVER**

LOT

**BEAUTY**

99% PURITY

A STRICTLY HIGH GRADE LOT

PER BU. **\$10.50** 60 LB. BU.

**We Challenge the World With This Value**

**HIGH PURITY**

Carefully analyzed. Runs 99% pure. Test shows dodder free. Seed has been carefully processed.

**STRONG GERMINATION**

The nice plump berries have good germinating qualities in laboratory tests showing ability to give good stands.

This is a high quality lot of medium red clover. It has good color and germination. The purity test shows 99% pure clover. It is carefully cleaned seed and ranks World Brand in quality. It is priced very low as a special value for 1939.

**The Hardier Type of European Seed**

The U. S. Government, through the lowering of duty charges, has given additional incentive to the importation of this seed. Government regulations require that European seed which is known to be non hardy shall contain red stained seed and other seed to contain green stained berries. Green stained seed has therefore not been judged unhardy by this government department. Our Lot Beauty is green stained seed and obtained from sections that we believe to be of the hardier kind.

Millions of pounds of this European seed have been used in this country in years past. Millions of pounds have been shipped in during the past few years. The low seeding cost reduces expenses and customers say they are well satisfied. A number of years ago, 1924-5, when tests were made on imported seed, State reports showed comparative yields on Hungarian Red Clover as follows: New York 97%, Pennsylvania 118%, Wisconsin 129%, Michigan 99.25% and Ohio 95%.

**Big Saving in Lot Beauty**

You can buy this beautiful high testing seed for around \$1.50 to \$2.00 per bushel below the price of similar quality of Home Grown seed. That is a big difference and will have a strong appeal to farmers and especially those who are not participating in the soil program. You may see conflicting reports on European Clover. Generally the most unfavorable reports are the only ones published. Write for our Free Circular on Import Clover which gives some favorable reports on results obtained in state tests.

**HARDY STRAIN**

This is the hardier type of import seed comes stained green while the less hardy origins are stained red.

**BEAUTIFUL COLOR**

Nice looking seed. Plump berries. Fine quality. Shipment guaranteed to please you.

**A GREAT VALUE at a BARGAIN**

**WORLD BRAND**

**CORN BELT ALFALFA**

**\$15.60**

Per Bu.  
60 LBS. TO BU.

**A GREAT VALUE**

**World Brand Corn Belt Alfalfa**

The merits of Corn-Belt Alfalfa (our "registered" trade mark name) are described on page 42 of this catalog. It is the common alfalfa grown in "Adapted" sections. Considered as hardy as any common and origin qualifies for AAA payments in the north central region that takes in Minnesota, Wisconsin, Iowa, etc. Our Corn-Belt alfalfa is sown in every state in the nation. It is often heavier in production than Grimm. You will find our prices on it very low.

**World Brand Our Finest**

This quality represents our finest grade. For years it has been the selection of critical customers in all parts of the nation. The sample of World Brand Red Clover enclosed with this catalog shows the fine character of this grade. We ask you to compare it only with the finest. Check color, size, purity, germination and all points of quality. If our World Brand Corn-Belt alfalfa doesn't surpass any in value, don't keep it. Quality for quality and price for price we guarantee you a big saving. See guarantee page 6.

Send your orders for Alfalfa book but if you demand the high quality seed at a sub-

early. There are many fine values in this best grade order World Brand and get substantial saving in price.

**UNITED STATES GROWN**

**RED CLOVER LOT LEADER**

**99% PURE Including 4% Crop Seed**  
**A SEEDING MANY FARMERS PREFER**

Many farmers prefer it because it gives them a high quality seeding at a substantial saving in cost. This Lot Leader is very nice quality domestic grown seed. It is just as fine in looks as the sample of our World Brand Red Clover enclosed with this book. Just as bright in color and just as plump in berry. It is equally high in germination. Very few would notice there was any difference between the two.

But you know there must be a difference because of the lower cost. We bought this seed at a lower price because it contains some crop seed. By crop seed we mean seeds like those of Alfalfa, Alsike or Sweet Clover. There is only around 4% of these crop seeds in this lot and including that this seed shows a purity of right around 99%. That little crop seed does no material damage, yet because of it we can sell it to you at this unusually low price.

### Quality at Reduced Cost

Aside from the small percent of crop seed you do not sacrifice anything in quality under our World Brand Grade and World Brand is known to tens of thousands of farmers as a most dependable grade of high quality seed. We invite you to compare this value on a quality basis with any obtainable anywhere. Buy it, and if you do not believe you have saved \$1.50 to \$2.50 a bushel, quality considered, fire it back and get your money plus freight refunded. This is a value you will find it difficult to match.

### Suitable for Conservation Program

This is all hardy domestic grown seed and is adapted and suitable for A.A.A. benefit payment. You should be able to get a good stand from Lot Leader by sowing seven pounds per acre. We know of farmers who sow less and get good stands. In some sections farmers have become discouraged because of losing stands from high priced seed, but this may be just the year to get a fine stand. Clover is just half the cost of last year. Now is the time to seed a liberal acreage and get to growing red clover again.

### Seeding Suggestions

Do not use too heavy a nurse or companion crop. That is the cause of a lot of failures from stands that started out in nice shape. Sow only a half to a third as much grain as normal. Thin stands of grain produce surprisingly heavy yields. Pasturing grain instead of harvesting it often gives the best clover stands. Make sure your seed bed is firm and well settled. Use a roller after seeding wherever possible. Inoculate your seed. See page 41.

CROP SEED IS MOSTLY ALFALFA

Only \$ **11.25** PER BU. 60 LBS.

A MONEY SAVING SEEDING LOT **JUST-RITE RED CLOVER** WITH ALSIKE and TIMOTHY

Only \$ **8.40** PER BU. 60 LBS.

### All Home Grown

We have prepared this seeding because a number of our customers have given us enthusiastic reports on it. It also fills a very definite need this year in providing a lower cost seeding and yet one that gives highly satisfactory results. All of the seed is U. S. grown hardy stock thus qualifying for benefit checks to those in the agricultural conservation program. The seed is recleaned stock. You have quality here at a lower acre cost.

### Contains Approximately 60% Clovers

Lot Just-Rite is made up by combining approximately 40% Red Clover, 20% Alsike Clover and the balance Timothy seed. When you sow this seeding at 7½ pounds per acre you would have an average of around 21 Red Clover and 24 Alsike Clover seeds per square foot in addition to the Timothy. You know that is plenty to give you a fine stand of clovers. The Timothy holds these clovers erect. The blending of the Red and Alsike makes a dense, deep mat of clover that can yield "to beat the band." This really is a "hummer" and Just-Rite is a good name for it.

### All New Crop Quality Seed

We haven't tried to see how cheap we could make this. We have made this seeding from new crop seed and then priced it low. It is composed of cleaned seed and carefully blended. It is a quality that has the ability to produce good stands.

In Lot Just-Rite you have a seeding to produce a crop that can be used for hay or pasture. A crop that will check soil erosion. It is an adapted seeding and a good one, yet the acre cost is very reasonable. This seed is priced to save you \$1.50 to \$2.00 per bushel. If you don't believe you saved at least that much you can return it and get your money back.

# RED CLOVER

**Hardy  
U. S. Grown**

**See Sample enclosed for quality.**

Examine the enclosed sample for purity. It tests right around 99%. Sometimes 99½% pure. Note the fine color and size of berries. This sample is representative not only of our finest Red Clover but of our World Brand grade in other lines. You are always assured our extra fancy quality when you order World Brand. It has satisfied our most critical customers for many years. It is distinctly superior to the so-called best grade of some dealers.

## **ECONOMICAL AND SATISFACTORY**

This quality pleases because of the results it can give. It requires less seed per acre than country run or poorly cleaned lots. A bushel goes further. Produces crops that are generally more uniform, vigorous and productive. This seed is priced very low considering its fine quality. If at any time within 60 days after you receive shipment you do not consider you have saved \$1.50 to \$2.00 a bushel, write us for shipping instructions and a prompt refund.

## **THIS SEED IS HARDY U. S. GROWN**

It is new crop, hardy anywhere in the United States and suitable for the AAA conservation program. Compare sample with any you can find anywhere for appearance and quality. Such seed is worth premium prices.

You will find other grades of U. S. grown Medium Red Clover described on page 7 and priced on page 40. Lot Leader and Lot Just-Rite described on the page opposite this are also U. S. Grown. We have a fine quality of import seed in Lot Beauty on page 31.

## **GETTING GOOD STANDS OF CLOVER**

Use Berry's World Brand Seed. Avoid heavy nurse crops. Cover seed lightly. Roll if at all possible. Inoculate seed. Inoculation pays well and costs little. Price ½ bu. size 30c; 1 bu. size 50c; 2½ bu. size 90c. Also see page 41 on inoculation.

# MAMMOTH RED CLOVER

**U. S. Grown Seed, Priced to save you money**

Critical and thrifty buyers are served alike in our World Brand grade. The quality meets demands of exacting farmers. Our low price satisfies the sense of thrift. There is always true economy in such a superior value.

Here is extra fancy, northern grown Mammoth. It is recleaned and tested. It has size and color that indicate strength and vitality. Has a high purity. Such seed goes farther. It is far cheaper and more satisfactory than most average seed.

Our World Brand seed gives you better assurance of clean, heavy, healthy stands. That means larger and more profitable crops. This is a very fine value. Limited crops and advancing markets make it advisable to order what you need early. See page 7 for description of other grades and page 40 for prices.

Mammoth Clover is a large variety of Red Clover. It lives longer. It is also known as Sapling and Big English Clover. Superior for soil building. Extensively grown when seasons are too short for two cuttings and wherever an extra heavy crop is desired. Genuine Mammoth always sells at a premium. Buy early. We look for higher markets.

Yours truly,

August Krieger.

# ALSIKE CLOVER

## LOT ECONOMY

**\$6<sup>60</sup> — BU.**

### A Fine Seeding at Low Cost

A special lot. We consider this a remarkable value and a good bargain. A bushel sows 7 to 8 acres. The seeding cost is low yet it has been giving heavy production of fine quality hay. Also used for pasture. This value is a very popular one with our trade. They like the quality and our direct-to-farmer prices. Compare values. See for yourself, the attractive savings.

Alsike is a perennial clover. One seeding lasts several years. Grows on all soils except very dry ones. Seed is very small and goes a long ways. Almost sure to make a stand. Best clover for wet or sour land. Fine in hay or pasture mixtures. Higher in feeding value than Red Clover.

### Description

Lot Economy makes a cheap seeding yet a very good one. We secured this seed at a most attractive price because it contains Timothy. That makes a wonderfully productive seeding, but can be purchased for less because it is mixed. Runs over half pure Alsike. When sown at 10 lbs. per acre gives 80 Alsike seeds per square foot. At 8 lbs. per acre, 60 Alsike.

Do not confuse this with the ordinary mixture of Alsike and Timothy. It is a far different article. Sells at 60 lbs. per bushel. You can cut your seed bill by using Lot Economy. Shipment is guaranteed to satisfy you. Return it and get your money back if you can duplicate this value elsewhere. Why pay more for seed that is no better?

## ALSIKE CLOVER

### Highest Quality—Bargain Prices

Our finest quality. Our finest in color and plumpness. Berry's famous World Brand quality that has satisfied critical farmers for many years. Compare it with any of the finest grades for quality and price. Note the savings.

### Alsike Cheap to Sow

It costs less per bushel than Red Clover and a bushel sows about twice as many acres. Five to six pounds per acre is plenty. It costs only 95c to \$1.15 per acre to sow the very best alsike. That's less than the cost of sowing Red Clover. Our seed is all home grown and Alsike is the hardiest of the clovers. Grows on a much wider range of soils than Red. Is less sensitive to acid. The hay has a higher feeding value and is not as dusty as Red. Easier to get a stand.

Check quality and prices. You can find our values in Alsike outstanding. See page 7 for description of other grades and page 40 for prices. All cleaned and shipment guaranteed to satisfy. We'll save you money or give your money back. You be the judge.

Single pounds, postpaid: 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.

## LOT ALSIKE MERIT

### Extra Value at Low Cost

A very popular seeding with our trade. Bought at a discount because it contains a little crop seed. Gives you a dandy seeding at low cost. Free sample on request.

It is a nice lot of Alsike containing a small percent of White Dutch Clover, and Timothy. For all practical purposes it is as good as pure Alsike. In fact, we prefer a little mixture to help hold up the Alsike. Runs over 90% pure Clovers.

Lot Merit makes very nutritious feed. A bushel of this cleaned seed sows about 10 acres. Customers like it. We receive many repeat orders on it. Provides a low seeding cost. A guaranteed value. Priced low.

See page 7 for description of our regular grades of clovers and page 40 for prices.

**\$10<sup>20</sup> — BU.**

## LOT SURE-GROW COMBINATION

### Alsike and White Clover

This lot of Alsike has a little White Dutch Clover in it. Preferred by many farmers to straight Alsike, especially for pasture. The finer stemmed white makes a desirable combination for quality and yield. Makes excellent hay. Fine quality recleaned seed. Shipment guaranteed to satisfy.

Our direct-to-farmer price makes this an attractive bargain. Very economical to sow. Only takes about six pounds per acre. Makes a great clover seeding at only 90c per acre. Values such as this are most convincing proof that it pays to trade with Berry's.

### White Dutch Clover

The clover for pastures and lawns. Very small seeded. Four pounds sows an acre. See page 40 for prices, also see page 76.

**\$10<sup>80</sup> — BU.**

**\$1.40 — BU.**

Dorset, Ohio.  
Dear Sirs: I have been using your seeds for years back and I find them the best seeds I can buy. I have saved money on the seed orders I purchased from you. I gladly recommend you as reliable company to deal with.

Yours respectfully,  
LAWRENCE S. GIDDINGS.

# TIMOTHY WORLD BRAND

## Highest Quality—Iowa Grown

Timothy is coming back and coming back strong. Men who condemned it as a crop of little value are using the soft pedal now or advocating its use again. Its value in checking soil erosion is again appreciated. It is being sown more and more with alfalfa to increase production. Because of its low price it will be widely used in combination with other clovers. Straight Timothy seedings will be made for pastures and meadows. It will be a great Timothy year in 1939.

## Berry's Quality Prices Low

Located as we are at the door of one of the World's greatest Timothy seed producing sections we have a better opportunity to get the best. Our buying costs are low. Transportation is a small item. For years we have been large handlers of Timothy seed. Our machinery is designed to handle it efficiently. Our experience has taught us much. We handle a large volume. All these factors combine to make our prices lower and quality extra nice.

## More for Your Money

Our World Brand grade is extra fine. That is what our most critical customers have been demanding and using for years. We have other grades too, Fancy, Planet and Square. See page 7 for description and page 40 for prices. A quality and a price to meet every need and a genuine saving guaranteed on each one. Return for refund if shipment not satisfactory. Buy direct. Save Money. Get that extra measure of value and ease the strain on your pocketbook.

Single pounds, postpaid, 30c; 5 lbs., \$1.25; 10 lbs., \$2.25

# PLANET BRAND TIMOTHY

\$1.70  
PER  
BU.

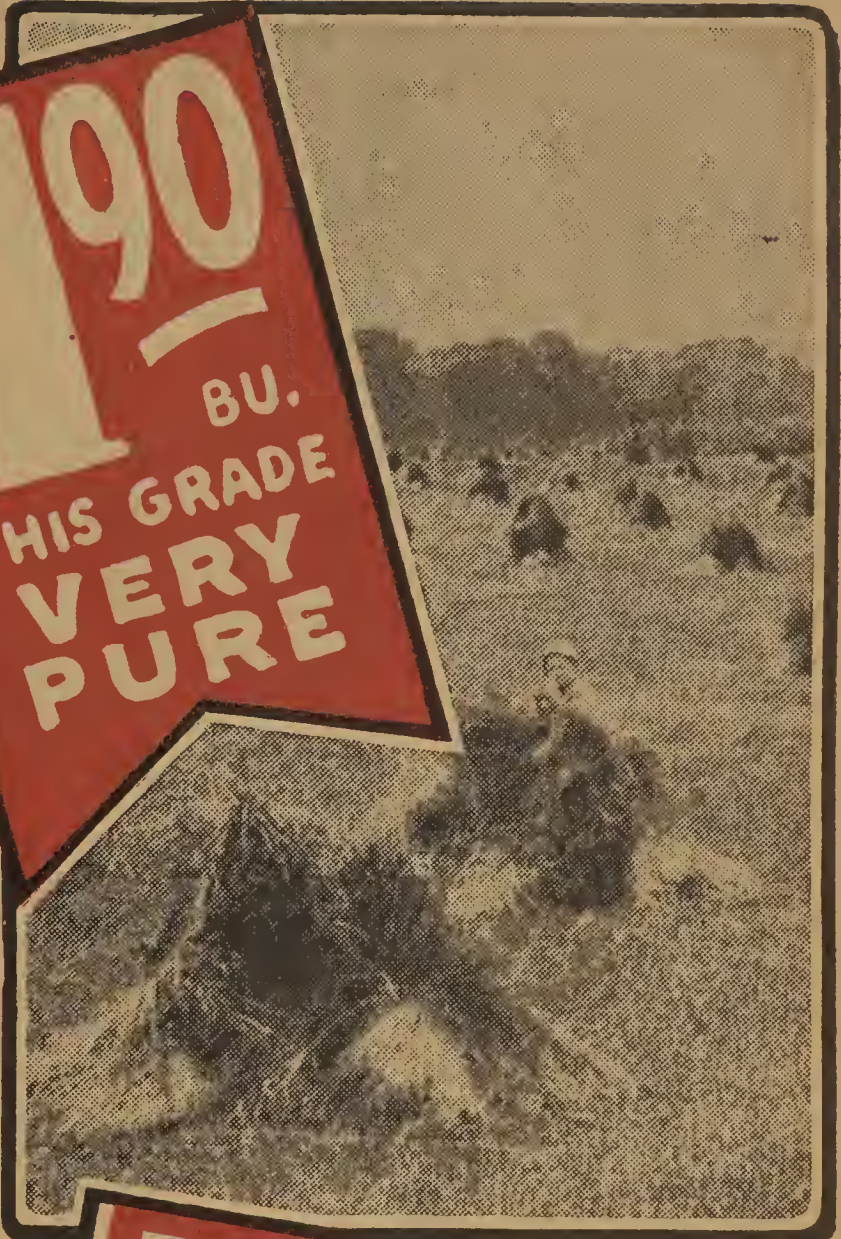

This is a very serviceable grade of recleaned new crop Timothy seed. It has good purity and germination and the ability to produce fine stands. It sells for less money than our World Brand grade because it isn't so nice in appearance. It contains some lighter weight seed and some lots with a larger percentage of hulled seeds are blended in. Therefore it is not quite as bright or uniform in appearance. This Planet Brand will compare very favorably with some dealers' top grade. When compared with our World Brand you will see it is not quite as nice looking.

## Costs Only 45c an Acre

A bushel will sow 4 acres nicely. Timothy is one of the surest seedings. It is adapted to a wide range of soils and climate. Gives you protection against soil erosion at low cost. It is a small investment that buys profitable returns. Don't risk the wastefulness of thin stands of grass when it costs so little to get a good one. Provide for bigger yields and better soil protection by sowing Timothy this year. This seed is good sound merchandise of high practical value.

Stoddard, Wisconsin.  
Dear Sirs: In the spring of 1931 I purchased some of your Lot More-Hardy Alfalfa at \$10.50 per bushel. I also used some high priced seed from another firm. All sowed on the same ground. Your seed made a good stand, the other failed. You saved me money and I got better results.  
Yours truly, ALBERT J. JONAS.

# DOMESTIC RYE GRASS

## Fast Grower—Big Yielder

Domestic Rye Grass is rather light green in color. Leaves are a little broader than Blue Grass and grows much taller. Requires no nurse crop. In fact it grows so fast it is often used as a nurse crop for other slower growing grasses. Do not confuse this with Rye that is sown for grain. It is entirely different. The seed is somewhat like that of Blue Grass only larger.

If you need early pasture or hay, something to sow early, use Domestic Rye Grass. A full seeding is 25 lbs. per acre. Some sow less. Prepare a good seed bed, cover seed lightly and roll if possible. Sow alone or in mixture.

Our Grow-Quick Mixtures (see page 48), a good percentage of this valuable grass. Buy now. For present prices see page 40.

Small lots, postpaid: 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.80

# SWEET CLOVER

## Varieties

The Common or Big White is the kind most generally grown. Lives two years. Grows 6 to 8 ft. high if not cut. For pasture and soil building this variety ranks highest. Has big powerful roots that go down deep. They decay quickly when crop is plowed under. See pages 29, 36 to 38.

Grundy County White lives two years. Does not grow so large, generally not exceeding 3½ ft. It is about 3 weeks earlier than Common. Seed is smaller. See page 37.

Yellow Biennial lives two years. Larger than Grundy but not as large as Common. Matures in between the two. Finer stemmed and more leafy. See pages 29 & 38.

Hubam. An annual or one year variety. Makes complete growth in one year. In big demand when it is desired to plow under the crop in the fall of the same year it is sown. Resembles common white when growing. See page 38.

## An Economical Soil Builder

This year Sweet Clover is proportionately much lower in cost than Red Clover or Alfalfa. The acre seeding cost is much lower and it will be widely used. It is not only cheaper but it excels other clovers in its soil building power and in its capacity as a pasture. It is a far better drought resister than most clovers.

Supplies of seed are not large in the face of enormous need. It is our opinion that Sweet Clover will show the largest percentage of market advances of any item in the seed line. According to our best judgment you will make a substantial extra saving by buying your seed early.

## Rebuild Your Land Now

Sweet Clover is an ideal crop to use for building up land. It surpasses all other crops in its quick soil building powers. It stores large quantities of Nitrogen in the soil, increasing fertility. It adds vast quantities of humus. That helps to stop erosion, makes ground easier to work and less apt to dry out hard. The bacterial life in the soil is increased so that plants will thrive better. A crop of Sweet Clover plowed under is equal to 25 big loads of manure.

## A Very Valuable Pasture

Then again it is a wonderful pasture crop. Can be pastured the first fall with one to two head of cattle per acre. Three to four head the second year is no exception and you put on hogs besides. Even then you may have to clip it to keep it down. Less danger of bloat and with a straw stack accessible to stock practically no danger at all.

Sweet Clover generally makes a hay crop the first year and two the second. Its greatest value is as pasture or fertilizing crop. A fine way to handle sweet clover is use it for pasture or hay the first year and plow under in the spring of the second year and plant to corn.

## Inoculate Your Seed

Inoculation of seed gives the young plants the bacteria they need to take nitrogen from the air for growth and development. Inoculation generally means healthier and more vigorous plants. It costs so little and is easy to apply. Complete simple directions on each package.

Price only 30c for ½ bu. size; 50c for 1 bu. size, and 90c for 2½ bu. size. It pays to use it on all kinds of clover seeds. Order Berry's Nodule Germ inoculation.

Sow sweet clover in the early spring just like Red Clover. Use about 15 lbs. of seed per acre. Your seed bed should be as firm as possible. Generally a light covering is advisable. If at all possible roll the land after seeding. Use a light nurse crop and pasture the grain if the season gets dry.

**BLUE RIBBON BARGAINS**

**UNHULLED  
SWEET CLOVER**

ALL RECLEANED SEED

**\$1.80 at CLARINDA**  
PER BU. 30 LBS. to BU. **\$1.95 at CHICAGO**  
PER BU.

**BAGS FREE**

Our well recleaned unhulled seed is the best to use for early winter seeding. It is better than hulled seed either scarified or unscarified. Germination is slower. Will not start to grow during a warm spell in winter. Becomes firmly embedded in the soil. Waits until spring, then grows rapidly. Many customers report that the sowing of our unhulled seed early in the winter gave them the finest stands they ever had. Sow about 20 lbs. per acre. Just broadcast it. No seed bed preparation necessary. If convenient cover it a little before growing season starts. Otherwise let nature take care of it.

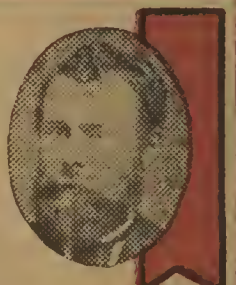

This seed is fancy cleaned quality that pleases our trade. It is a high grade product and our prices are very low. Compare qualities. Judge values and note the difference.

**Buy Now—Save Money—Sow Early**

Blackstone, Va.

Gentlemen: I have used your seeds for many years with satisfaction. The quality has never disappointed me. The price, excellency of the seed considered, has been much lower than I could secure elsewhere.

Very sincerely,  
**BENJ. R. MORSE.**

WORLD BEATERS

SWEET CLOVER  
BLUE RIBBON BARGAINS  
LOT  
PEARLEXTREMELY  
LOW  
PRICES  
COMPARE ON  
A QUALITY  
BASISGRUNDY  
COUNTYWhite Sweet  
CLOVER

An earlier maturing variety of biennial White Blossom Sweet Clover. Grows around 3½ ft. tall. Blooms about three weeks earlier than the Common white. Matures seed more evenly. Easier to handle because of its shorter growth. It is in big demand where the common grows too rank or where earlier maturity is desired. Only requires 12 lbs. of seed per acre because the berries on this variety generally run smaller in size.

World Brand  
Quality

We have the Grundy County white only in this finest quality. World Brand has pleased our most critical trade for years. It is scarified, cleaned, tested and shipment is guaranteed to please you in every way. You may compare it with the finest obtainable. If you do not find this a superior value at our low price you may return it for refund. See page 6.

Supplies of this Grundy County seed are much smaller than of the common white. Be sure to order your supplies of it early. Let us have your order for Grundy County Sweet Clover and save you money.

Inoculate your Sweet Clover seed. See pages 36 and 41.

\$4<sup>50</sup>  
BU.

## A Good Value—Moderately Priced

Lot Pearl is the biennial or two year big common white blossom sweet clover same as the World Brand grade described on this page and the Lot "Do-More" and "Wonderful" on page 29. The tall growing, big-rooted, long seasoned sweet clover. A leader in production. Unexcelled as a soil builder. Big pasture yields. Enormous hay crops. A valuable money making crop.

## A Medium Grade

Lot Pearl sells at lower prices because it is not as nice looking. If you demand the finest order our World Brand. If you want to cut seeding costs and willing to take seed that has some small berries and some off colored seed, then Lot Pearl should suit you ok. It has the ability to produce good stands. The seed is cleaned and blended. It lacks the uniformity and smoothness of our higher priced lots, but many of our customers have used a grade like this for many years and they are well pleased.

## Compare Values

A sample of our Lot "Do-More" sweet clover is enclosed with our catalog. That represents the quality of our lowest priced grade. Lot Pearl is the next higher grade. Contains less small seed and has a somewhat better color. There are a good many more seeds per pound than in the World Brand. If you would weigh out an equal weight of seed out of both grades and test all of the seeds in each pile you might find the larger number of sprouts in the lower priced seed. It is important to remember that while the germination per hundred seeds is lower in the cheaper grades, that larger number of seeds per pound tends to equalize that difference.

\$3<sup>60</sup>  
BU.WORLD BRAND  
WHITE SWEET CLOVER

## Extra High Grade

Consider what it means to you always to get our finest seed by simply placing two words "World Brand" on your order. We have customers who have been doing that for many years. They have been well satisfied with their purchase. Ask for samples. Compare quality and price. Could any seed give you greater assurance of success? Sweet Clover seed may vary in appearance according to the producing season. Our World Brand quality always represents our highest grade.

## Low Prices Now

We couldn't stay in business if our customers did not find our values superior. Satisfactory quality at lower prices. Why should any one pay more for seed that is no better? We urge you to check our World Brand next to any other. As this catalog with these low prices goes to press we are confident that we are seeing the low point in seed prices. The seed is only two-thirds of last year's price. Our finest seed costs only around \$1.00 an acre. With prices so low on seed so fine, this is an opportune time to make liberal seedings.

Sweet clover has been one of our specialties for years. We were one of the first to offer the seed in a large commercial way. This is one of our years of greatest values. You are guaranteed a liberal savings and a satisfactory shipment. Send your order early as higher prices may be expected later.

\$4<sup>20</sup>  
BU.

Binghamton, N. Y.

Dear Sirs: I have used your seeds for some time and I have had good results. I have used other seeds, but they are too high. I save about a third in buying from you and get better results.

Yours truly,  
MIKE ZOPP.

## WORLD BRAND YELLOW SWEET CLOVER

**\$4.50** BU.

### An Extra Value

Our very finest extra fancy quality. The choice of our most critical trade. Guaranteed to please the most exacting trade. See guarantee, page 6. Why pay more than our low price? Consider quality and check the savings. This is quick germinating scarified seed.

Yellow Sweet Clover is in great demand. It is finer stemmed than the white and more leafy. Does not get so rank. Matures about 10 days earlier. Many say it is easier to grow. Provides pasture in abundance. Makes hay superior to white. Works wonders in soil improvement.

### Brings Better Profits

Farmers generally are in dire need of clovers. They will restore humus, fertility and profits. Land will be easier to work. It will drain better yet hold the proper moisture at the surface for growing crops. Make your soil perform better. Use Sweet Clover to do the job. It will improve land quicker and at lower cost.

Our prices are guaranteed to save you money. See price list for price on our Planet Brand. Let us take care of your Sweet Clover needs.

It has been our specialty for years and we are equipped to take care of your needs. See page 29.

Lakefield,  
Minn.

Dear Friends:  
I like your  
seeds and rec-  
ommend them  
to others. Your  
seeds do well in

this section. I save money by  
buying from you. I am well  
satisfied and am sure other  
farmers will, too.

Yours truly,  
JOHN GREIN.

# New LOW PRICE HUBAM CLOVER

## ANNUAL WHITE SWEET CLOVER

**\$7.50**  
BU.

### The Sweet Clover That Does Two Years Work in One

Hubam clover is more plentiful this year. The price has come down. It is again economical to sow. Use it liberally this year. Sow it this spring. Use it as a hay, seed, pasture or soil building crop this fall. Hubam is a variety of sweet clover that blooms and bears seed the same year it is sown. It is an annual. Does not live over winter. Gives an enormous growth and production in a short season.

### Get Two Cash Crops in One Year

Sow Hubam with small grain. Harvest your grain. Then cut Hubam for seed. Produces up to 600 lbs. of seed per acre. Sometimes more. Or use it as a pasture. It grows fast, attaining height up to 4 or 5 feet if not cut or pastured. Think what a carrying capacity that means. The growth is rich in protein, making it all the more valuable. Makes a heavy production of rich hay if cut when it begins to bloom. Or if you want to enrich your land fast, plow under a full growth. Some pasture it a while and then plow it under. Think of it, all this in the same year the crop is sown. No wonder farmers who know the crop were willing to pay up to \$15.00 a bushel for the seed last year. It's only half that this year.

### Seeding Suggestions

Inoculate your seed with Berry's Nodule Germ. See Page 41. Sow on winter grain when ground can be harrowed lightly. Sow 15 lbs. per acre. Harrow lightly or roll after seeding. Rolling is best. Sow with spring grain in a similar way. Cover seed lightly with a harrow and roll. The firmer the seed bed the better.

If you cut Hubam as a seed crop or use it for pasture often the crop will reseed itself for another year. Hubam does not become a pest. It is easily eradicated by cultivation. If plowed under before it seeds it will not come up again.

### Low Price on World Brand Quality

Our Hubam seed is carried in one quality and that is our World Brand. That is our best grade and a fine quality that pleases critical buyers. Make comparisons on a quality basis and note the big savings our prices can give you. This is the year to get started with this valuable, quick acting, money making clover. Use Berry's World Brand scarified Hubam seed. We use care in the purchase and preparation of this seed. Our seed is scarified. Shipment guaranteed to please you and save you money. See Page 6.

We want your business and are making our prices correspondingly low. Don't pay more for seed that is no better or will do no more for you. Here in this great crop you can get a measure of value that we do not believe can be duplicated anywhere else. Let us help you get started with this money maker.

Small Lots, postpaid: 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.25.

## YELLOW SWEET CLOVER

### Lot PREMIUM

A very Serviceable lot of seed. Not as fine and smooth as World Brand but a quality that pleases many of our customers. Not our cheapest but a good medium grade. It is cleaned scarified seed. Graded and priced to make a very popular seeding. Widely used for top sowing on old pastures or thin stands as well as for new seedings. With smaller berries and more seeds per pound it gives ample sprouts per pound to give a good stand at the regular seeding rate of 15 lbs. per acre. Lot Premium is one of our big selling lots. Cuts seed costs and customers report satisfactory results.

**\$4.20**  
BU.

# KOREAN CLOVER

**\$ 1.50**  
BU.

**Grows on the poorest land**  
**Wonderful pasture—Excellent Soil Builder.**

## A VERY VALUABLE CROP

This clover came into use a comparatively few years ago. It is no longer an experiment but a crop of proven value. Its merits and its limitations should, however, be understood so it may be used in the most profitable manner. You should know where, how and when it will grow and how it compares with other crops for hay, pasture and soil building.

Korean is a Nitrogen gatherer and will improve the poorest land where other clovers cannot even get started. It will resist more heat and drouth than any other clover. It will stop soil washing and will grow in ditches and gullies.

## CHARACTERISTICS

Korean is an annual. It grows only one year from a seeding. It reseeds itself very readily and matures seed even after plants have been killed by frost. Thus it is proving itself adapted farther north than was at first thought possible. It is steadily and surely working its way north into Iowa, Illinois, Ohio, Indiana. If it does not reseed itself it will not come up the next year. When it does reseed the stands get heavier from year to year. Korean Clover is not a good competitor of Red and Sweet Clover and Alfalfa. That is those crops are more profitable if they can be grown successfully. But on poor land where those crops do not grow readily, Korean is a very valuable crop.

## PASTURE VALUE

Korean shows its greatest worth in pasture. It does not afford much feed early but produces its best during the latter part of June and in July and August up to killing frosts. Therefore Korean gives pasture when most other grasses are dormant because of heat or drouth. No matter how close it may be pastured the crop will reseed if heavy frosts do not come too early. We therefore recommend Korean as a mixture for all pastures, new and old. You can thicken up old pastures by just broadcasting the seed during the winter or when the ground is checked by freezing and thawing.

## VALUE AS A HAY CROP

Korean does not grow very tall. To get a good hay crop the stand should be heavy. While it is not tall the stems are very leafy and a surprisingly large yield can be secured from a stand that seems fairly short. One of our customers reports a yield of three tons per acre and a seed crop afterwards. This was in central Missouri.

## SEEDING SUGGESTIONS

The firmer your seed bed the better your success. Just broadcast seeding during winter or early spring. If sown with spring grain just scatter on top and then roll the land. Be sure to avoid covering it much. Sow 12 to 15 lbs. per acre. Land should have fair drainage.

## SEED QUALITY AND PRICES

All Korean Clover looks very much the same to inexperienced eyes. There is, however, a lot of difference in quality both in purity and germination. Off quality seed looks all right and can be purchased for less money. Insist on the best if you want to succeed.

Our stocks are new crop and of good quality. Considering quality we guarantee our prices lowest. We have quality stocks that are bargains.

Write for free circular on these Lespedezas.

## INOCULATE YOUR SEED

Inoculation helps get bigger and better stands. Cost is low. A bushel size package inoculates two 25-lb. bushels of Lespedeza. 1 bu. size, only 30c; 2 bu., 50c; 5 bu., 90c.

# GIANT INCARNATE

**CRIMSON CLOVER**

OR

**\$ 7.80 BU.**  
**60 LBS.**

This clover resembles Red Clover more than any other except Mammoth. Valuable for pasture, green forage, hay and especially for quickly restoring worn out soils.

Giant Incarnate Clover forms upright branching plants, often 2 to 2½ feet in height. It roots very deeply and is a bountiful provider of nitrogen. It grows most luxuriantly on fertile loam, yet it will thrive better on thinner and poorer soil than Red Clover. It is more efficient for green manuring than the latter. Plowing under a crop of Giant Incarnate has been estimated to equal 20 tons of manure to the acre. After hay crop was removed one authority states the stubble plowed under is equal to 12 tons of manure. It is the cheapest source of nitrogen. E. R. Lloyd, Agriculture Expert, states, "When plowed under will add from \$25.00 to \$30.00 worth of nitrogen to the soil." It has restored to profitable agriculture thousands of acres of poor land.

On many farms in Germany and France it is grown in preference to all other clovers. It is tremendously prolific. Yields up to 3 tons of hay per acre.

Crimson is used most extensively in the south as a fall sown crop. We suggest only spring seeding in the north where it lives as a quick growing annual. Sowing without a nurse crop should give best results. That permits it to escape exceedingly hot weather. Prefers a cool growing season. Maximum growth should be obtained in July. Our seed is new crop and the price is low. Shipment guaranteed to please you.

Postpaid, 1 lb., 35c; 5 lbs., \$1.50

## EARLY STRAIN NO. 19604 KOREAN LESPEDEZA

This strain of Korean is just coming on the market. Grows taller. Matures seed earlier. Best adapted and most productive for Iowa and similar conditions. Amount of seed still very short. Sow it this spring. Harvest seed crop this fall. Produced over 1000 lbs. of cleaned seed per acre. Grew about 2 feet high during dry year of 1936. Stands heat and drought in an amazing manner. This is a coming strain. Get in on the big money. Sow some this year. We have only a limited quantity. No more at any price when it is gone. Order at once.

1 lb., postpaid, 75c; 5 lbs., \$3.00; 10 lbs., \$5.50, see page 41 for quantity prices.

# SERICEA LESPEDEZA

A perennial Lespedeza. Comes up from roots in the spring. Has wintered as far north as New York. Grows on very sour soil without lime. Grows taller and coarser than Korean. Very leafy. Highly drought resistant. High feeding value. A great soil builder. Sow about 6 to 8 pounds per acre, about April 15th in latitude of southern Iowa. Wants a solid seed bed. Cover seed lightly.

Seed supply is still limited. All prices are for prompt orders. See page 40.

Small lots, postpaid: 1 lb., 50c; 5 lbs., \$2.25;  
10 lbs., \$4.25

Watson, Missouri.

Dear Sirs: I have used your seeds for fifteen years and have found them the best for the money. The Berry Seed Co. has saved farmers thousands of dollars by selling good seeds at popular prices. They are reliable.

Yours, M. A. McNEAL.

# INOCULATE ALL LEGUMES

Showing difference in yield between crop from inoculated and not inoculated seed.

The cost per acre is small. The extra returns are large. Bigger yields and better soil building.

## Inoculation Necessary

No legume can thrive without proper inoculation.

In order to be inoculated there must be a certain strain of bacteria working in the roots of the plants. Then and then only can these legumes take nitrogen from the air and use it for its own growth.

Legumes are heavy users of nitrogen. If they cannot make it for themselves because they lack the proper bacteria they generally turn yellow and often die. Meanwhile instead of building up your land they are robbing it of nitrogen which is the most valuable plant food. You grow legumes because you want them to store nitrogen in the soil but they will take it away if they are not properly inoculated.

When you buy Berry's Nodule Germ you get a package containing millions of bacteria suited for the crop you specify. You put that on the seed. See opposite column. As soon as the seed sprouts the bacteria start to work and give the plant the power to make its own nitrogen out of the air.

We urge you to inoculate. The cost is small. It is easy to apply. We guarantee our Nodule Germ to give satisfactory results. If it does not make nodules on the roots of your plants we will refund the price of the material. See opposite column for prices.

Use Seed Treatment for Better Yields. The Cost Is Small. It Is a Wise Investment.

We recommend inoculating all legume seeds. Read information on these two pages (right and left columns). For Potato treatment see page 28. Corn disinfectants are priced on page 56. The Ceresan treatment for small grains such as Barley and Oats is listed on page 61. Agricultural authorities are quite general in their approval of these treatments. The cost is small and the returns on the investment are large. Proper seed treatment may mean the difference between success and failure.

# CORN-BELT ALFALFA

Corn-Belt Alfalfa is a "registered" trade mark. It is our name for seed that we consider well adapted to the section that is shaded on this map. This Corn-Belt seed is produced in the northern and western part of this section and even further west and north. It contains no unadapted seed and is stock of a hardy character. All "Corn-Belt" Alfalfa qualifies as to origin for benefit payments in the agricultural conservation program. Save money and get a dependable seed by specifying Corn-Belt Alfalfa.

## Thoroughly Dependable

TRADE MARK  
Reg. U. S. Pat. Off.

It is not necessary to specify Montana or Dakota to get hardy seed. Experiments have proven that seed such as our Corn-Belt is entirely satisfactory. It is hardy and equal or better in production. Specify Corn-Belt. Get adapted seed without paying premium prices. See page 40.

## HARDY and HEAVILY PRODUCTIVE

## AUTHENTIC REPORTS from STATE EXPERIMENTS

We have verified the reports of our customers on Corn-Belt Alfalfa by checking reports from various state authorities. The information gained from these sources shows the performance of Corn-Belt type seed in a convincing manner.

From Nebraska eastward through Iowa, Illinois, Indiana, Ohio, Pennsylvania and New Jersey. Northward through New York, Michigan, Wisconsin, Minnesota and South Dakota we find excellent reports on the yielding qualities of this seed. Wisconsin specifically reports that Nebraska common has done as well as any common. It is recommended that if winter killing is severe that Grimm be selected but if common Alfalfa is used this stock is considered very satisfactory.

Southern states show the same superior qualities for this Corn-Belt Alfalfa. Its adaptability is even more wide spread than indicated by the map on this page. We have simply shown on this map the section to which we consider our Corn-Belt Alfalfa well adapted. To every customer in this section we say, "Save money and get a dependable kind of seed by specifying Corn-Belt Alfalfa."

## GRADES of CORN BELT ALFALFA

Berry's Corn-Belt Alfalfa comes in four regular grades of common. These grades are separated largely according to color and size of berries. Read page 7. There are also special lots of Corn-Belt designated by names such as "Honest John," etc. We also have the Corn-Belt Grimm such as our World Brand on the back cover and Lots Bonafide and Bed Rock. We have found our Corn-Belt Alfalfa hardy and heavy in production. See money saving prices on regular grades on page 40 and get seed that is suited to corn-belt conditions.

## INOCULATE ALFALFA SEED

### Better Stands—Heavier Growth

Alfalfa gathers nitrogen from the air. That is why it builds up soils and contains so much protein. But it can do this only when the plant's roots have certain bacteria working in them. You can get these bacteria by inoculating your seed. These bacteria can thus enter the roots and form nodules as soon as the seed sprouts. Then your plants will be healthier, stronger and grow larger. Plants that are not inoculated often turn yellow and die. Inoculation may mean the difference between success and failure.

Berry's Nodule Germ Inoculation is inexpensive. It is easy to apply. Full simple directions with each package. Price ½ bu. size, 30c; 1 bu. size, 50c; 2½ bu. size, 90c. If this inoculation does not form nodules on the roots of your plants we will refund the price of the Nodule Germ.

## Market Conditions

Alfalfa seed production is short in many producing sections. There is not much seed in growers' hands. The demand and need for the seed is great. As the season for seeding approaches we look for markets to show strong advances. Our prices will be protected until stocks are sold or market advances make duplication impossible.

## Sowing Alfalfa

Get your seed bed as fine and well packed as possible. Sow a little later than Red Clover with a very light nurse crop. Better still a little later seeding after some advance harrowing to kill weeds. In such case sow without a nurse crop. Fifteen pounds per acre is plenty. Do not cover over half an inch. Roll, if possible after seeding. Inoculate your seed.

North Liberty, Indiana.

Dear Sirs: Your seeds are the best I ever used. The Yellow Biennial Sweet Clover is certainly the best. Every seed came up. I am well satisfied and can recommend your seeds highly.

Yours truly,  
ELDEN KANE.

# ALFALFA

If you are not fully pleased with your purchase return it for refund of your money.

## LOT BED ROCK

**Grimm Alfalfa**  
**Shipped in a Sealed Bag**  
**Serviceable Seed at Low Cost**

**\$13<sup>50</sup><sub>BU.</sub>**

Applies on Agricultural Conservation Program

Grimm Alfalfa is placed within reach of every farmer who wants this super-hardy variety. This is a very low price on such quality. This grade has given our customers satisfying results. Has good growing power. Produces exactly the same kind of Alfalfa as higher priced seed.

This drastically low price is possible because we obtained some Grimm seed that was somewhat discolored. It would not classify for fancy colored grades. Berries are a little smaller. While the germination per hundred seeds is lower there are so many more seeds per pound that this is largely compensated for. Several tests per ounce show more sprouts than an ounce of larger berried kind.

### A Heavy Producer

We sell this seed because we know that it has the ability to produce good, strong stands. In appearance it isn't the best but from a practical standpoint it delivers the goods. Sow 15 pounds per acre. Seed is recleaned and shipment guaranteed to satisfy. If you want to get a start with Grimm at a low cost, order this lot. Customers report it an outstanding bargain.

LOT  
**GOOD SERVICE**

**\$12<sup>90</sup><sub>BU.</sub>**

### Corn-Belt Alfalfa Seed

#### A low priced grade that satisfied many

This is a quality similar to our Square Brand. Thousands of our customers have been using this type of seed for many years. They know the seed isn't the best for looks but they also know by experience that they can get good results from such seed. The great saving in seeding cost is clearly seen in our very low prices. Less expense with satisfactory results, gives plenty of reasons for the popularity of this lot.

The crop from this seed is just as hardy and productive as any of our corn-belt alfalfa. If you don't object to smaller berries and some discolored seed we're sure you'll like it as so many of our customers do.

## WORLD BRAND OKLAHOMA ALFALFA

**\$12<sup>90</sup><sub>BU.</sub>**

We are having an increasing call for Oklahoma Alfalfa. At present it can be sold at materially lower prices than seed grown across the border line in Kansas. We have some very favorable reports on its performance.

These show a hardness and adaptability similar to Nebraska and Kansas seed. An agricultural authority in Missouri says that Oklahoma alfalfa has given just as satisfactory results in Missouri as seed from Nebraska and Kansas. This would indicate adaptability to the southern two thirds of Illinois, Indiana and Ohio and the southern third of Pennsylvania. In fact Kansas and Nebraska alfalfa seed is extensively used in Wisconsin and other northern states.

While Oklahoma alfalfa has not been listed as adapted for A.A.A. benefit payments in the north central region some of the leading southern handlers believe this is due to the idea that their seed was of Peruvian type. They say Peruvian does not do well in Oklahoma and is not grown there. We believe therefore that the Oklahoma seed is adapted to a much wider range than has been formerly recommended. Our low price is a very attractive figure on bright, clean seed. Our World Brand Oklahoma Alfalfa seed is sure fine looking seed and our prices will save you money.

## LOT BIG KROP

**Choice Quality**  
**Corn-Belt**  
**Alfalfa**

**\$13<sup>80</sup><sub>BU.</sub>**

If you want a good serviceable, in between quality, order Lot Big Krop. It is a finer grade than the Honest John (page 30) and the Lot More Hardy described above. It is not as smooth and uniform as the extra fancy World Brand described on page 31.

It is the genuine hardy Corn-Belt alfalfa like the others. This medium quality seed has given our trade a high degree of satisfaction for many years. The very low price we have on it makes it a great value that we do not believe can be duplicated anywhere. It is a dandy practical value for thrifty buyers.

Chippewa Falls, Wisconsin.

Gentlemen: My father used your seeds for 30 years and would never think of planting any other seeds than Berry's. I have been farming for 14 years and always bought my seeds from you. The seeds always come up, have strong hardy plants and bear excellent crops.

Yours truly,  
 WM. E. KLEMKE.

# EXTRA HARDY ALFALFA

## SUPER HARDY Shipped in a Sealed Bag A Dandy Value

A true bargain in medium grade Grimm Alfalfa seed. Honest-to-goodness quality without the extra high color that means higher prices. It is seed of good character; cleaned, good growing power, extra hardy.

Lot Bonafide is Corn-Belt Grimm of the same productive hardy type as our World Brand described on back cover. We consider it practically as certain to produce a stand. This grade may sell as a fancy quality. It certainly is a serviceable lot.

We know that a lot of farmers have to watch their expenditures very carefully. That is why we made a special effort to secure seed of this type. We strive to supply the needs of every customer. It is typical of Berry Service to enable you to secure such quality of Grimm Seed at so low a price. Shipment is guaranteed to satisfy you. Any buyer of Lot Bonafide who does not think he has made a big saving can return shipment and get his money back.

## IDAHO VARIEGATED

\$16<sup>80</sup>  
BU.

## Considered Equal to Grimm

Secured as seed coming from fields having various colors of blossoms. That is one of the best earmarks of a super hardy strain. In every way it looks and performs like Grimm. We believe it is Grimm but there are no records to prove it. For real practical value it should give everything that Grimm can give.

This seed is straight Idaho grown from whence comes the famous Black-foot Grimm. Heat, cold and drought resistant it stays right on the job producing the finest of feed in great abundance.

## Extra Fine Quality

Our Idaho Variegated Alfalfa is a strictly quality lot. Fully World Brand grade. It has high purity and germination tests. Any buyer wishing genuine Idaho grown super hardy Grimm type alfalfa should be delighted with this money-saving opportunity. We recommend it to our most critical trade as a high quality bargain. Shipment guaranteed to stand up to the most exacting laboratory tests. See Page 6.

## Lot WESTERN

A high colored quality lot of seed having high purity and germination. A blended lot of California, Utah and Idaho grown seed. A very beautiful lot at so low a price. May not qualify for AAA in north central states but many will want it because of its high quality at low cost.

We can guarantee you one of the nicest looking lots of U. S. Grown seed in our World Brand Western Alfalfa. We know of no seed at this price that can compare with it in appearance, purity, color and germination.

\$11<sup>70</sup>  
BU.

Asheville, N. Y.

Dear Sirs: I have always found your seeds to be very satisfactory and have gotten good results from them. I recommend your seeds highly at every opportunity.

CARL A. C. JOHNSON.

## LOT COSSACK

## Considered by Many The Hardest of All

Cossack Alfalfa is in wide demand by those having unusually much trouble with winter killing. We really doubt if it is really superior to our Grimm in this respect but have a nice stock of beautiful seed.

Anyone wishing Cossack Alfalfa can certainly save money on seeding costs with this extra value lot.

This seed we carry only in the World Brand grade. It is truly an extra fancy lot. You can expect something very fine when you order this. This variety produces hay of a fine character. Sample sent free. Compare our quality; then compare prices. You should find a saving that will surprise you. Bargains like this move fast.

1 lb. any variety on this page, 55c postpaid; 5 lbs., \$2.50; 10 lbs., \$4.50.

\$17<sup>70</sup>  
BU.

# GRIMM ALFALFA

## At STRIKINGLY LOW MONEY SAVING PRICES

**BLUE TAG**  
FINEST QUALITY  
STATE SEALED AND CERTIFIED  
**GRIMM ALFALFA**

### The Highest Quality Obtainable

State Sealed and Certified Grimm alfalfa seed is grown, harvested, cleaned and sacked under state supervision. After it is cleaned it is graded. The color, purity, size of berries, etc., determine the grade. Only the very best of the entire crop is good enough to grade "Blue Tag." Whenever you see the State Blue Tag and Seal on a bag you can be certain that there is nothing better.

See page 40 for present exceedingly close prices. These are for prompt orders. Production of this super-quality is not large. Many growers are holding for higher prices. Demand is strong. Higher markets are certain. Present stocks are ample to care for early orders. You will save good money by acting now.

### For Those Who Demand The Best

This is the seed for the super-critical trade. If only the very finest will satisfy you buy Blue Tag State Sealed and Certified. The dealer has nothing to do with the preparation, cleaning and grading. That is done at the state of production and under state supervision.

The dealer does have a lot to do with establishing the resale price. See our price on page 40. Compare that with any Blue Tag State Sealed Grimm. Send us your order and save the difference.

### Blackfoot Grimm

#### State Sealed and Certified

This is Idaho seed. It gets the name Blackfoot from an organization that controls the selling of most of the seed produced in the section around Blackfoot, Idaho.

So great is the demand for this seed that they sometimes sell their entire year's supply in two days' time.

#### Prices for Prompt Orders

Since the supplies of this seed are so definitely limited orders can be filled only so long as stocks last. We have a nice stock on hand and believe we will be able to supply all of our trade wanting Blackfoot Grimm. To be safe, however, it is best to order early.

Blackfoot always sells at a premium over other Alfalfa yet our prices are down to money saving figures. See page 40 or our latest price list for quotations.

Postpaid 1 lb., 60c; 5 lbs., \$2.90; 10 lbs., \$5.50

# WORLD BRAND MINNESOTA GRIMM

### Extra Hardy - Extra Quality

"World Brand" means our top quality. "Grimm" means a super hardy strain. "Minnesota" means the seed was grown in that state where the most severe winters eliminate all weaklings and reproduce only the most vigorous and sturdy kind. You can make no better selection if you wish the hardiest type and seed of excellent quality.

#### Original Grimm Field State

Minnesota is the home of Grimm Alfalfa. Here it was found on the farm of a man named Grimm. Our World Brand Minnesota Grimm was purchased by Minnesota buyers. Men who know the state like a book. Experience eliminates a lot of guessing and provides greater assurance in securing the genuine article. Buy high quality Grimm at our direct-to-you prices. Shipped in a Sealed Bag.

**\$17.40**  
BU.

### Save \$3.00 to \$4.00 per bu.

This seed in our opinion will do as much for you as state sealed and certified stock, yet you can buy it at \$3.00 to \$4.00 a bushel less money. The difference on every bushel will buy a lot of things for the home or farm. We'll gladly send you a sample of it. Check! Make comparisons. Here is high quality World Brand grade, genuine Minnesota grown, Grimm Alfalfa at a price that is drastically low for such quality. Compared with any other seed of similar character you should find a saving of \$2.00 a bushel.

#### Grimm Is Popular

Its finer leafier growth gives a somewhat higher feeding value, pound for pound. Its super hardness withstands winter conditions that might kill out some alfalfas entirely. These two features create a big demand for Grimm. There is nothing better than Minnesota Grimm. Our World Brand gives you a fine quality and our prices give you a big saving. Order early; this seed will sell fast at so low a figure.

1 lb., postpaid, 55c; 5 lbs., \$2.50; 10 lbs., \$4.50.

Myerstown,  
Pa.

Dear Sirs: I have been getting my seeds from you for twelve years. I get the kind of seeds I want and save money. The Grimm Alfalfa I sowed in 1930 gave me three cuttings of fine hay this year.

Yours truly,  
MILES L. RISSER

# 3 POPULAR MIXTURES

Our ready mixed seedings have always been popular. They give a blend of clovers and grasses that produce heavily. They yield more when grown mixed than separately. The cost of seeding is reasonable. All the seed is re-cleaned and shipment is guaranteed to satisfy you in every respect. Return it for refund if not satisfactory.

## ALSIKE AND TIMOTHY

30 to 35% Clover

### Super Grade Low Cost — Big Yields

An Economical and Highly  
Satisfactory Seeding

All U. S. Grown as Required for A.A.A.

See Sample Enclosed.

**\$3.60**  
PER 45 LB.  
BU.

This is the year to sow liberally to this famous natural mixture. The cost is reasonable and a seeding lasts for several years. We know of no mixture that makes a finer quality of hay than our Super Grade Alsike and Timothy. The Alsike hay is less dusty than Red Clover and pound for pound it has a higher feeding value. It can be used as pasture to good advantage and keeps soils from washing.

Both Alsike and Timothy are very winter hardy. Alsike being the hardiest of the clovers. It will also grow on soils that are too sour or too wet for other clovers. Alsike and Timothy have the same soil and climatic requirements. They are naturally adapted to growing together. The Timothy supports the clover, enabling it to grow erect, taller and more leafy. The alsike forms a dense mat of clover down in the Timothy and it seems to stimulate the growth of the grass. Thus both do better when grown in a mixture instead of separately.

We know the sections where large quantities of this seed are grown together. The seed is harvested mixed. Because it is so difficult to separate the two we can buy it at a substantial discount below the cost of the Timothy and the Alsike unmixed. We secure the bulk of our seed from these sections. It is processed, cleaned and uniformed. It is passed on to you at prices that are bargain figures for such fine quality clover rich seeding.

This mixture when sown at 12 lbs. per acre will give an average of 65 Alsike seeds per square foot. It would take a 60% to 70% Mixture of Red Clover to give you as many clover seeds. Alsike seeds are smaller and go farther. This mixture satisfies because it is easy to get a catch, lasts for several years and produces big crop of the finest mixed hay.

We guarantee to save you money on this seed. See sample. Compare for color, purity and clover content. This seed has good growing power. It is truly a remarkable value. We recommend and urge its use because we know it is a seeding that gives satisfaction and the seeding cost is low this year. Buy early and protect yourself on price.

Small Quantities Postpaid any Mixture on this page.

1 lb., 25c; 5 lbs., \$1.10; 10 lbs., \$2.00.

## ALSIKE and TIMOTHY REGULAR GRADE

**\$3.10 per bu.—20-25% Clover**  
**Economical and Highly Satisfactory**

The same quality stock as our Super Grade. Twelve pounds sows an acre and places an average of around 40 clover seeds on every square foot in addition to the Timothy. That makes a rich mixture that produces heavily. Alsike is superior to Red Clover in feeding value. Hay is less dusty. The seeding is easy to start. Comparison will show you our prices are low, quality considered. Let us save you money on this quality seeding and send your orders early as we may not replace stocks at these figures.

Dalton, Ohio  
Dear Sirs: I have been using Berrys seeds for many years, especially Red Clover. I have often compared with others, but find none to equal Berrys' for quality and price. This year I have the best stand of Red Clover in the community.

As ever, your customer,  
S. J. KULA

**4 WAY**  
**CLOVER and TIMOTHY**  
**MIXTURE** **\$4.10**  
BU.

All U. S. Grown, suitable for A.A.A. conservation program. Contains 30-35% of Alfalfa, Red Clover and Alsike combined. Balance Timothy.

Here is a great seeding that we personally like very much. Makes very fine hay and excellent pasture.

By adding some hardy alfalfa seed to our Red Clover, Alsike and Timothy mixture we have made a combination that our customers praise highly. It produces heavily and gives you an opportunity to get some alfalfa started. Although one of our newer mixtures it is rapidly forging toward the front in sales.

Our price this year has been cut deeply, making it an outstanding value. Some of our finest lots of mixed seed are used in making this blend. It certainly has a good measure of value. Seeding cost is low. Only takes 12 lbs. per acre. It is priced to save you money on your seed bill.

# 3 Clover and Timothy MIXTURES

**AT  
LOW  
SEEDING  
COST**

## RED CLOVER ALSIKE AND TIMOTHY

### SUPER GRADE

**Contains 30 to 35% Clovers  
All Hardy U. S. Grown**

The heavy production and low seeding costs of this mixture makes it a great favorite with our trade. Its rich clover content is ample for a heavy stand of clovers. This mixture when sown at twelve pounds per acre will average about 50 clover seeds per square foot. You have the Timothy besides. The clovers grow erect and taller because the plants are supported by the timothy. That makes for finer quality and larger yields. With the Red Clover and the fine stemmed Alsike making a dense clover growth, a heavy tonnage of rich feed is obtained. Customers certainly are enthused about it.

### Adapted, Recleaned Seed

This seed is all hardy U. S. Grown qualifying for A.A.A. payments. The seed is cleaned and blended to the best of our ability to give a uniform clover content. Many prefer this three way mixture. They like the Alsike to assure a better clover stand in event there should be conditions in the field unfavorable to red clover.

We'll gladly sample this so you can see its quality. It is this combination of quality, low price, heavy yield and high feed value that appeals to our trade and makes this such a big seller. Use it for hay, pasture or soil building. At our low price you can afford to sow a larger acreage to clovers. Keep your land in better condition and farm for better profits.

**\$3<sup>90</sup>  
BU.**

## HOME GROWN RED CLOVER & TIMOTHY

### SUPER GRADE

**Contains 30 to 35% Clovers  
Qualifies for A.A.A.**

This good old standby will never go out of style or lose its popular favor. Especially not when the seeding cost of such a rich clover mixture is so low. This mixture will average around 30 clover seeds per square foot when sown at 12 lbs. per acre. Just draw a square foot and place 30 seeds on it and see how close they are together. Then you have the Timothy to make these plants grow erect and to add to the tonnage. You generally get a larger yield when these crops are grown in a mixture, than separately. It retards soil erosion very successfully and enriches its nitrogen content.

### Economical to Use

The seeding cost of Berry's Super Grade U. S. Grown Red Clover and Timothy mixture is only around \$1.00 per acre, less than the price of two bushels of "sealed" corn. The soil building value alone of this seeding should give you an increase of 10 bushel of corn per acre. Lots of farms need clovers worse than their owners think. This is the year to increase your grass and clover acreage while seed prices are low.

This seed is cleaned and if you'll compare values we are sure you will see a big saving. We mix it to attain as uniform a clover content as we can give it. Our guarantee (page 6) gives you assurance of a satisfactory shipment or your money back.

You should be pleased in selecting this kind of a seeding that for so many years has satisfied so many thousands. We want your business and are making our prices as low as we can so as to make it to your interest to trade with us. Buy direct this year for greatest savings.

**\$4<sup>00</sup>  
BU.**

## HARDY EUROPEAN RED CLOVER AND TIMOTHY

### Cut-Cost Quality—Contains 20% or Better Red Clover

This mixture is in demand because of its lower seeding cost. The clover in it is bright bold seed of extra high purity. It is as fine or finer than our mixture containing home grown clover seed. This clover is not the kind found non-hardy by the Department of Agriculture which has to contain red stained seed. The clover in this mixture contains the green stained seeds which indicate a hardier origin. See description of Lot Beauty on page 31.

Sowing 12 lbs. per acre averages around 18 to 20 clover seeds per square foot. That's plenty to suit a large number of buyers and it cuts seeding costs to around 75c per acre. Just ask us for a sample if you want to see how really fine this Cut-Cost grade is. If you don't consider it one of the finest values on the market today fire your shipment back and your money plus freight will be promptly refunded.

**\$3<sup>00</sup>  
BU.**

North Manchester, Ind.  
Dear Sirs: After using Berry's seeds for five years I am fully convinced as to the quality of them. It is to my interest to buy from you. I always speak a good word for Berry's Seeds whenever the occasion arises.  
Yours truly,

A. F. STELLAR.

# GROW QUICK PASTURE MIXTURE

\$ **1.60**  
BU.  
25 LBS.

## A Popular Mixture at Reasonable Cost

Our Grow Quick Mixture is the product of several years of development. Formerly we sold it in three different combinations but the great bulk of the orders were for the mixture containing Korean Clover, Sweet Clover, Timothy and Domestic Rye Grass. This overwhelming customer preference in itself indicates its merit, and fitness to meet average needs.

### Contains Approximately 50% Clovers

The Rye Grass in this combination is a fast grower and affords the earliest feed. Meanwhile the Sweet Clover, Korean and Timothy are developing to increase its production and value. It keeps on growing until after frost. The Korean will reseed for the next year unless the season is too short. The Sweet Clover and Timothy of course live over winter and can be used the next year for plowing under, for continued pasture or cut for hay.

Sow 15 to 20 lbs. per acre. Cover seed lightly and roll if possible. A firm seed bed and a light covering are always helpful in getting stands. Sow about the time you sow small grain. Do not use a nurse crop.

Contains  
Korean Clover,  
Sweet Clover,  
Domestic Rye Grass  
and Timothy.

Approximately 50%  
Clovers, Balance Grasses

# PERMANENT PASTURE and MEADOW MIXTURE

## Thrifty Mixture

A combination of different grasses is very desirable in a pasture seeding. That gives stock a greater variety which is generally desirable. It also provides a longer pasturing season as some grow early and fast while others are slower and later. Some will stand more heat and drought, others will do better when it is wet.

Our Thrifty Pasture mixture is designed to give you variety and yet at low seeding cost. It contains not only grass but Korean Clover as well to assure growth during the hottest and driest part of the year. The Grasses are Kentucky Blue Grass, English Blue Grass, Rye Grass, Timothy and a little Red Top. We mix these together thoroughly to make a uniform mixture to the best of our ability.

The seed has been cleaned before mixing. We have endeavored to make this a matchless value and guarantee you a shipment that will please you. See Guarantee, Page 6. Savings as well as quality are guaranteed. We are sure you will like our Thrifty Mixture at this low cost. Should develop into a straight Blue Grass pasture under normal Corn-Belt conditions. Sow 15 to 20 lbs. per acre.

\$ **4.00**  
50 LBS.

## Master Mixture

Thin pastures are a big drain on farm profits. Tens of thousands of acres of good pasture land are not doing their part. It's not always the fault of the land. It's the fault of the stand. That is often due to lack of proper seeding. Old stands may have been killed or thinned by drought or other factors. You may figure it will thicken up in time but meanwhile you are losing far more in production value than the cost of making a new or top seeding. Why have two acres in pasture when one might do as much if properly handled? Sow one of our pasture mixtures to aid in getting more feed per acre. The cost is lower this year. Now is the time to do it.

\$ **5.00**  
50 LBS.

### Contains 11 Different Grasses and Clovers

This Master Mixture contains the more expensive grasses in addition to the ones used in our Thrifty Mixture. Bromus, Orchard Grass, Reed Canary and Alsike Clover, White Clover, blended with the Kentucky Blue Grass, English Blue, Red Top, Timothy and Sweet Clover. This great variety of grasses provides for varying maturity dates and a maximum amount of pasture production. Some of the grasses to add to yields in wet seasons, others to carry on during drier periods. A succession of growth from early spring until late fall. It makes a pasture that should last for many years. Provides a greater variety of feed and a large carrying capacity.

We use recleaned tested seeds in the mixture and offer you a value that we do not believe you can duplicate elsewhere at so low a price. Sow 15 to 20 lbs. per acre. Shipment guaranteed to please you. This is a great combination.

Clinton, Iowa.

Gentlemen: We buy seeds from you. Some years the bill runs over \$1,000. The quality of the seed holds us as a customer. Then, too, the price is always less.

Yours truly,  
RAYMOND C. LANGAN.

## All Domestic Grown

All of the seed is hardy U. S. grown and qualified as to origin for benefit payments. Here is a mixture with an abundance of hardy clovers. Priced to provide very low seeding costs and yet give you a rich clover seeding. Averages fifty percent by weight in clovers. When sown at 12 pounds per acre should give you an average of 45 to 50 clover seeds per square foot and you have the Timothy besides. Think of making such a seeding at a cost of \$1.15 per acre for seed.

## Quality Guaranteed to Please

We will gladly send you a representative sample of our Marvelous Mixture so you can see the quality of this seeding. Or you can order it with the assurance that you will be well pleased. As with all our grass and clover shipments you can take up to 60 days time after you receive the shipment to have any test or analysis made. Then if you are not satisfied or if you do not believe you have made a big savings you can return the shipment and your money plus freight charges will be refunded.

## A Seeding That Lasts Several Years

Such a combination of clovers and grasses makes extremely heavy yields of hay. Our customers report highly satisfactory results. Big crops, fine quality and Big savings in cost. Many use it as a pasture. They stock it heavily and get feed of excellent value. The alfalfa seed in the mixture helps to establish the crop on your land. The sweet clover opens up the soil and adds much nitrogen. The Red and Alsike fill the lower growth and the Timothy supports them and adds to the weight and growth of all. It is a great seeding and it is no wonder our customers are enthusiastic about it.

## Start the Profit Maker

You, too, can become enthused over its wonderful production and high feeding value. See how it checks soil erosion and enriches your land. That dense heavy mat of clovers is a joy to behold. We sell thousands of bushels of Marvelous Mixture every year and with present low prices on such a combination of all home grown seed its sales should smash all previous records. We will protect prices until seed is sold or market advances make duplication impossible. Get the best bargain now. Sow around 12 lbs. per acre.

## A Few Who Speak for Thousands

It is the experience of our customers that gives our Marvelous Mixture its strongest endorsement. It is the heaviest producer we have ever developed. High in feeding value. Rich in soil building elements. Suitable for hay and pasture. Low in seeding costs. It makes an ideal combination for thousands of farmers.

### Saves 50% at Berry's Stratford, Wis.

Dear Sirs:

I was more than pleased with the seeds I bought from the Berry Seed Co. Never had a finer stand of hay. Sowed Marvelous Mixture this spring, and the seeding looks very good. I feel I saved about half by buying from this Co.

Yours truly, THEO ROGGENBAUER.

### Yield and Quality Fine Catawba, W. Va.

Dear Sirs:

I have been using your Marvelous Mixture of grass seed for more than eight years with satisfaction. The quality and yield has never disappointed me, and can heartily recommend to others desiring good seed.

Yours truly, WILLIE L. ROBE.

### Good Stands—Big Yields Hillsdale, Wis.

Gentlemen:

We have been using Marvelous Mixture grass seed on our farm near Blue River, Wis., for a number of years and have been well pleased with the results. Have had the best stand and best yield of any seed sown for several years.

Yours truly, G. L. POUND.

### Splendid Hay—Lots of It Martinsville, Ind.

Berry Seed Co.

Dear Sirs:

I find your Marvelous Mixture makes splendid hay and I got 21 loads off of 9 acres first cutting and 11 loads of fine Alfalfa this year in second cutting. In 1928 I bought one bushel of Kansas Grown World Brand Alfalfa, and it is still fine field of hay and thick as ever, so I have been using your seed ever since.

(Signed) W. L. COLEMAN.

### Marvelous Satisfies Kent, Ohio.

Dear Sirs:

I had good results with your Marvelous Mixture, very heavy crop and good quality. Your Marvelous Mixture is my choice. There is no guesswork about this seed. I have recommended it to a good many friends and neighbors.

Yours truly, J. B. SMITH.

## Farmers Nationwide Turn to Hybrid Corn

The large yields and stronger stalks of the better varieties of Hybrid corn have proven them so decidedly superior to the average open pollinated corn that farmers are interested as never before. After you have grown a real good Hybrid we do not believe you will ever want to go back to the old type.

But there is a tremendous difference between one variety of Hybrid and another. The difference is much greater than that between most kinds of ordinary corn. Some Hybrids are too hard and flinty. Some stick the ears out of the husks too early and are subject to more damage. There are other differences and defects. Therefore, if you have observed any defects in some Hybrids do not condemn all Hybrids but rather the particular varieties in which you may have observed such things.

### Why We Sell State Originated Hybrids

Hybrids are made by crossing inbred lines of corn. It takes 6 to 7 years to make these inbreds. The kind of Hybrid you get depends on what kind of inbreds are crossed. Many crosses produce corn that is inferior to ordinary corn. Only a few are truly superior. Those that are superior have much greater value than ordinary corn.

It costs money to develop inbreds and make crosses. It takes a long time. State experiment stations make these developments. Some work is also done by private firms for an ultimate profit. The State Experiment Stations however, are not concerned about private profits. All they are after is a corn that is really outstanding in its performance. They do not release Hybrids to the public until they feel sure they are proven worthy. They are therefore safe varieties to select for their adapted location. We sell only State Originated Hybrids.

### Why We Sell Only State Certified Hybrids

To be sure of a good Hybrid of any variety you must have the right seed, the field must be properly isolated and the detasseling of the seeds rows must be thorough.

State Certification established that the planting stock, the isolation and the detasseling has all been approved by State authorities. It further established that the variety itself has been proven superior to ordinary corn in yield and strength of stalk. Further, all "Certified" seed must be dried to 14% or less moisture and show a strong germination of 90% or better. Therefore the Blue State Tag of Certification which is attached to every full bushel bag of our Hybrid Corn gives you the information that the seed has complied with all the 6 points necessary for State Certification.

### Why We Sell the Varieties Listed

We have selected the four state originated Hybrids described on these pages because we consider them to be desirable hybrids from the standpoint of yield, and of a quality making them desirable to feed. In other words Hybrids that we believe our customers will really like and want again from year to year. You should find it to your interest and profit to plant such corn. We are pricing this "State Certified" seed at prices that save you \$1.00 to \$2.00 per bushel.

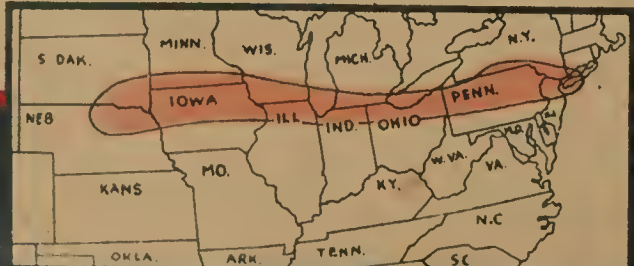

**STATE CERTIFIED**  
**IOWA 931**

This is our earliest maturing Hybrid. It was developed by the Iowa Experiment Station for conditions in northern Iowa. We, therefore, suggest planting it where similar seasonal conditions prevail. The map below gives our ideas on the adaptability of Iowa 931.

In State yield contests in the northern part of Iowa this Hybrid has proven to be 16.4 percent better than average ordinary corn over a period of 8 years. The bushel increase in yield has been as high as 17.62 bu. per acre over ordinary. The acre yield has been recorded up to 95.5 bushel per acre. In percentages it has outyielded ordinary corn by as much as 24.4 percent.

Iowa 931 is not a new and untried variety. It has now been in production for nine years and is truly a time tested Hybrid. In considering tests one should remember that in some favorable year a Hybrid of later maturity might show a little better record, but the same variety the next year might be way down because of improper maturity. The long proven record on 931 proves its adaptability year in and year out to Northern Iowa and similar climatic conditions. Map gives our idea of its northern limits.

This variety is not as flinty as many of the earlier maturing varieties. The kernels are medium rough and have a distinctive reddish cast on the side similar to the Iowa 939. It is important to bear in mind that a corn which is less flinty will be eaten much more readily than extremely hard corn. Flinty corn may also be discounted on the market. When you get a variety that combines heavy yields and good eating quality you really have a money maker.

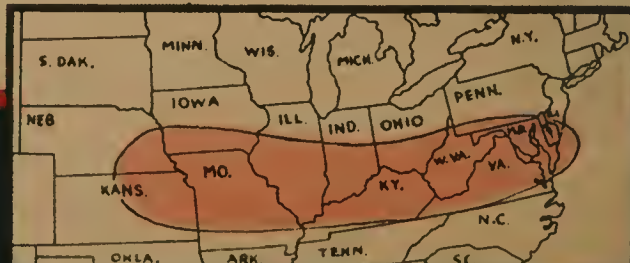

**STATE CERTIFIED**  
**IOWA 13**

This variety is especially adapted to climatic conditions such as prevail in the southern half of Iowa and northern Missouri. It should do well in all sections having similar conditions. Iowa 13 has shown that it is an exceptional resister against drought conditions. Over a period of seven years it has in the southern Iowa corn yield contest an advantage of 30.3 percent in yield and in the South Central section 28.9 percent superiority. That is a remarkable rating to extend over a seven year period. Its outstanding performance was in the drought year of 1936 when it outyielded other Hybrids by 26.9 percent and the average open pollinated 79%. It took the banner trophy in the southern Iowa district. Iowa 13 has recorded yields of 118.99 bushels per acre.

Like 931, Iowa 13 is a time tested Hybrid, 1938 being its 8th year in state yield contests. The examination of its records when judged over a term of years shows its high rating. Not only is its record good in Iowa. It has shown well in other states. In 1935 it yielded 109.7 in North Central Illinois. In 1936 it shared top honors in the south central portion with Illinois 960. In 1937 it made a yield of 105.4 bushels at Maryville, Missouri, which is in the northern part of that state.

Iowa 13 shows high yields, with adaptability and also is not so hard and flinty. That is important from a feeding standpoint. Big yields are discounted in value if cattle and hogs will not eat it. We have never had a complaint from our customers on excess hardness and consider that a most desirable factor. Any who have grown the very hardy flinty kinds will appreciate this most. We consider this variety especially good for extra drought resistance.

# The Outstanding Hybrid for Yield STATE CERTIFIED ILLINOIS 960

## An Extra Fine High Quality Hybrid

The development of Hybrid varieties seems to have been more of the earlier types. Kinds suitable to Central Iowa conditions and north. While Iowa 13 is good for the south this Illinois 960 shows a number of improvements. A wider adaptability and a superior quality. Here is a hybrid with such an imposing record of production that we give it our most enthusiastic recommendation for all sections having conditions similar to north central Illinois, south central Iowa and from there way down south into Kentucky.

### Some Yield Reports

The following information is gathered from state yield records and letters and bulletins received from State Experiment Stations. In **Illinois** over three year average it was heaviest producing corn in north central, central and south central sections of the state, and for a two year average the heaviest producing in the southeastern section. In another Illinois soil adaptability test it was the heaviest yielder on soils of high, medium and low fertility. Remember that some hybrids require rich soil while 960 has given top performance on a wide variation in soil.

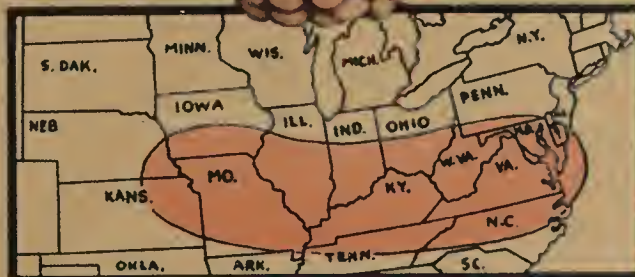

In southern **Iowa**, Illinois 960 was tested in Mills, Wayne, Henry and Johnson counties. The average of these tests showed 960 the heaviest producer of all Hybrids and outyielding ordinary corn by about 19 bushel per acre. The average yield of 960 in the four tests was 90¼ bu. per acre with a top production of 108.49 bu.

In northern **Missouri** in test with 65 other Hybrids, Illinois 960 was the top of all commercial varieties with a yield of 112.2 bushel per acre.

### Other State Reports on 960

It was top in eastern **Nebraska**. In **Kentucky** it classifies as a medium early variety and on the Experiment Station farm at Lexington was among the highest yield-

**\$4.00**  
BU.  
LARGE HILL DROP  
**\$4.50** SMALL  
BU. HILL DROP  
**\$5.50** EDGE DROP  
BU.

Where we suggest planting Illinois 960

ers. At Ridgely, **Maryland**, it yielded 72.4 bu. per acre and lacked only a fraction of a bushel in being tops in yield.

**Ohio** reports they consider Illinois 960 a good Hybrid for the southern portion of the state, and they are entering it in the certification list. It was one of the 3 best with an average yield of 4 tests in the southern section of 78.6 bu. per acre. The **Indiana** experiment station reports it did very well in several tests in the Central part of the state and that it should be a satisfactory variety. The fact that it also was one of the best in Kentucky would indicate its adaptability to southern Indiana also.

### Description of 960

It is a pure yellow corn with a very good depth of grain. The kernels are not as broad and shallow as some but narrower and longer. It is more like a smooth type of Reid's Dent. The grains and rows are closely spaced making a good solid ear. The kernels are not excessively hard and flinty.

The stalk growth is a little taller than the average hybrid. In our seed fields and in fields of Commercial 960 that we have inspected the stalks have stood up well. It is a very strong rooted corn. The ears of 960 remain better protected by the husks than many Hybrids. It does not have the tendency to protrude its ears while the grain is still soft.

On thin stands the Illinois 960 has a strong tendency to form two nice sized ears per stalk. Therefore even with thin stands it yields well and on different soil types maintains excellent performance.

By actual tests it has proven itself an outstanding Hybrid and we urge its planting because we believe it to be one of the best yielding and most profitable and satisfactory Hybrids yet developed. We consider it suitable to approximate territory shown in the shaded area on the map in the center.

**FREE CIRCULAR**  
Write for our Free Hybrid corn Circular giving more detailed information on all of these varieties as well as general information on State Certification on Hybrid corn qualities.

## STATE CERTIFIED

# IOWA 939

A development of the Iowa Experiment Station that has spread from Central Nebraska to the eastern coast and proven a very remarkable Hybrid. It is earlier in maturity than 960 going North up to the two northern tiers of counties in Iowa and going south into northern Missouri with very enthusiastic reports from farmers in that section. This indicates its wide adaptability in sections having similar conditions.

Iowa 939 has made some wonderful yield records in state tests. In Iowa it has averaged 20% increase in yield over o.p. corn going as high as 40% increase. In one test it outyielded all other Hybrids. In Nebraska it was the top yielding Hybrid over a 5 year average outyielding ordinary corn by 23% or an increase of 10 bushel per acre. It is a "time-tested" variety.

Illinois gives 939 recorded yields of 107.3 and 103.8 bushel per acre. In an Ohio report it topped all of the early Hybrids with a yield of 98.1 bushel per acre. This variety has been widely grown in West Virginia tests and it has shown up very well indeed and is suggested for elevations up to 2000 feet or where a medium early variety is desired.

There are many other sections from which official reports are not available. Considering what Iowa 939 has done at such widely separated points indicates an adaptability to a wide territory.

### Description of Iowa 939

It is a variety of medium early maturity. It forms more uniform ears than many Hybrids, looking more like ordinary corn yet outyielding it materially. The kernels are of a medium rough type. Kernels are fairly broad and of good depth. The sides have a distinctive reddish tinge. They are not as hard and flinty as those of many hybrids and are readily eaten by cattle and hogs.

It has strong roots and stalks. The husks give the ears good protection yet when ripe is a very easy corn to husk. Nearly every farmer that we know of who have grown Iowa 939 speaks very highly of it and want to continue growing it.

We believe this variety to be adapted to the shaded area shown on the map below.

## THE HEAVIEST PRODUCING SWEET SORGO

This is one of the most sensational forage crops ever developed. An enormous producer. Yielded up to 18.7 tons per acre, where corn yielded half as much. In dry seasons out produced corn 3 to 1. Nebraska and other states report it the heaviest forage producer, and farmers acclaim its phenomenal performance.

A matchless drought resister. Corn if it is severely injured by drought will stop growing. Atlas will start again. In sections where drought completely dried up corn, Atlas remained green. Where grasshoppers almost completely wiped out a corn field an adjoining field of Sorgo was practically untouched.

Atlas makes a highly palatable and very nutritious feed. The juice is sweet and live stock, especially cattle, will leave most any kind of feed to get it. They thrive on it. In dry seasons farmers have brought their live stock through with nothing but this feed and had them fat and sleek in the spring. Makes wonderful ensilage.

### State Certified Atlas the Best

There are many varieties of sweet sorgo but we consider Atlas the most profitable to grow. Compare the growth Atlas with Hegari as shown in the pictures on this page. All pictures were taken near Clarinda on the same day. The Hegari was on second bottom the Atlas on upland. Why grow a crop that grows 5 to 6 feet when you can get 10 to 12 feet. Requires less ground, less seed and less work. Atlas makes a leafy, sturdy growth. Very resistant against lodging. The white seed is very palatable.

We handle only State Certified seed because it is so difficult to distinguish Atlas seed from others. Even experts can't do it. State Certified stock comes from approved seed and fields are inspected. Certified Stock is best and safest to buy.

Atlas must have a warm seed bed. Drill it in with seeds 4 to 6 inches apart, 8 to 12 lbs. per acre are used for single row planting. Cut in fall a little before severe frost. Shock to cure.

**HEGARI - 6 Foot**

**ATLAS - 12 Foot**

# BILLION DOLLAR GRASS

## A QUICK GROWER AND HEAVY PRODUCER

We have for years been receiving reports from our customers on the big production of this Grass which is also called Japanese Millet. We have heard of its performance on good soil with plenty of moisture, making yields of 26,000 to 50,000 lbs. of green feed per acre and seed yields of 1,000 to 2,000 lbs. In 1937 we were further astonished at its production. It was pretty dry in this section that year but how it did come across. The picture below is of a field of Billion Dollar grass grown by one of our customers here in southern Iowa. It wasn't on extra good land either. Was that farmer pleased. And there were others writing in about their Billion Dollar Grass. Down in Missouri, up in Wisconsin, over in Ohio, they all like it.

### A Fast Grower

Makes a hay crop in 6 to 8 weeks. May be sown during May, June or July. We recommend 20 lbs. per acre although some sow less. Grows up to 6 and even 8 feet high. Valuable feed for dairy and young cattle and sheep. Does not become poisonous due to drouth or frost. Generally makes its heaviest growth on fairly fertile moist land.

The seed we have for you is new crop, recleaned, high germinating. Our price on this seed is low. Costs only around 80c an acre for seed.

# SOY BEANS

## A Big Money Crop

Here is another excellent crop to use on land thrown out of corn production. Can be used as a fertilizing crop of great value when crop is plowed under.

It is truly amazing how soy beans have swept the country. Comparatively a few years ago they were an experiment. Now you see them everywhere. The farmer who loses out on a crop of clover no longer does without hay. He plants Soy Beans and harvests a heavy crop of fine hay in the fall. If small grain doesn't pay him he plants soy beans for a seed crop and harvests 20 to 30 bushels of beans per acre. In our part of Iowa farmers plant soy beans after the small grain is off and take another hay crop or plow under the stand for soil building. It's no wonder the crop is popular.

## Excellent Values

Our soybean seed is cleaned graded stock. You will find it superior to stock containing a considerable portion of split beans and other impurities. On the basis of quality we are sure you will find our seed an economical and sound investment. A low price in itself does not make a bargain. It's the result you can get from the seed that make the real value. Our guarantee (page 6) assures you of a satisfactory shipment or money refunded.

## How to Handle Soy Beans

Plant when weather and soil is warm, corn planting time or later. Prepare a fine clean seed bed. For hay broadcast or drill in close rows 1½ to 2 bushels per acre. For seed in 18 to 20 inches apart 30 to 40 lbs. per acre. Cultivate with a harrow while beans are small and dry. Cut for hay when beans are fairly well formed, but before leaves fall. Harvest for seed when beans are practically ripe.

## Inoculate Your Seed

Inoculate Soybean and Cowpea seed. That helps to secure a more vigorous growth, heavier yields and higher value. Cost is low. Easy to apply. Full directions furnished.

Postpaid prices on Berry's Nodule Germ Inoculator for Beans and Peas: 1 bu. size 30c; 2 bu. 50c; 5 bu. 90c; 10 bu. size \$1.50 and a 25 bu. size \$2.75. Also see page 41.

## Varieties

**Dunfield.** Pure yellow. Heavy seed producer and an excellent hay type. Stands up well. Does not shatter easily. Matures in about 105 days. Medium sized leaves and stems. An extra good all purpose variety.

**Manchu.** An old standby. Widely grown both for hay and seed crop. Color light yellow with dark seed scar. Stands up well. Adapted to a wide range of conditions. Fine for hogging down. 105 days.

**Illini.** Very popular. Grown for hay north of Central Iowa and for hay and seed south. Medium in stems, leaves and maturity. Grows erect. Color yellow. One of the most profitable varieties.

**Kingway.** A Black Soybean of outstanding merit and quality. According to all customers reports it is greatly preferred to Wilson Black or Black Ebony both for hay and seed production. Especially valuable as a hay variety. Tremendous producer and excellent quality hay.

**Virginia Hay bean.** Makes large growth with enormous yields of hay. One of the best beans for poor land. Seed brownish and smaller than the average. Requires less seed per acre. Prices on Pages 40-41

# COWPEAS

This is a money making legume. A soil building and hay crop that is widely used.

Quick maturing crop. Requires more warmth than Soy Beans. Grow on poor soils. Very good for sandy or light loam. Makes rich feed. Also good soil builders. All our seed stock is good. See quotations page 41. Write for prices on large amounts. State quantity desired. Can ship southern orders from St. Louis.

## Varieties

**Whippoorwill.** Medium early in maturity, about 80 days. This is the most popular of all cowpea varieties and we have a big demand for them. They grow quite erect, which is a desirable characteristic and, no doubt, one of the reasons for its popularity. They are heavy producers and make a profitable kind to use. Seed is speckled brown in color. We recommend it highly.

**New Era.** If you wish the earliest of all varieties select this one. Good for northern states or where late planting is necessary. May be planted after small grain for plowing under. Good soil builder. Smaller seeded than Whippoorwill. Use 1½ bu. per acre for broadcast seeding.

**Mixed Cowpeas.** Somewhat cheaper than unmixed yet many prefer a mixture. Fine for pasture, hay or soil building. Very desirable unless pure seed crop is desired. All reclaimed stock. We have a big call for mixed cowpeas.

## CANADA FIELD PEAS

For early hay or green feed nothing equals Field Peas. Can be sown as early as land can be worked. Disc or harrow in 1 to 1¼ bushels Peas with 2 bushels Oats. Cut for hay when oats are in the dough stage. Production is very heavy and feeding value very high. Also fine to plow under for soil enrichment. Crop very fattening. Increases milk production. Excellent for hogs. Solves the problem for early green feed as no other early crop can do.

Shipment is guaranteed to please you in every way. Crop limited but our prices low. See page 41. If you are going to be short on feed next spring we recommend this crop very highly.

Edwardsville, Ill.

Dear Sirs: I have bought seed from you for several years. I find them to be O. K. in every way. The quality and the germination is very satisfactory. Your seeds produce results. Also your prices are real money-saving quotations. I am well pleased.

Yours truly,

H. C. STRASEN.

# GRASSES

## of SPECIAL MERIT

### BROME GRASS

#### Excellent Drought Resister and Heavy Yielder

Makes a splendid hay and pasture crop. Good feeding value. Livestock is very fond of Bromus. Produces heavily. Roots of Bromus go down 5 to 6 feet. It is a wonderful drought resister. Stays green when other grass becomes dormant. Starts a couple of weeks ahead of most grasses. Does well on clay loam and sandy soils. Usually makes some hay first year. Second and third years produce extra heavily. The most severe winters will not kill it. One seeding lasts many years, yet it is not difficult to eradicate.

Our prices this year are very attractive. We have a good quality of new crop cleaned seed and can give you good value on Bromus. The seed is generally sown at around 20 lbs. per acre. Prepare a good seed bed. Harrow in the seed a little and if possible roll the ground afterwards. Order your seed early.

The great increase we have had in the demand for Bromus during the past few years shows its growing popularity. It is a distinctive grass that increases production and profits.

Small lots, postpaid, 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00. See page 40 for quantity prices.

We urge you to grow some of this valuable grass this year.

\$3.40  
for  
25 lbs.

### CRESTED WHEAT GRASS

#### A Most Amazing Drought Resister

Stands the greatest extremes of drought and cold. Starts extremely early in the spring. Grows until very late in fall. Lasts for years with continuous heavy production. Remains green even after seed is ripe. Has yielded up to 900 lbs. of seed per acre. Very palatable; higher in feeding value than most grasses. Excellent for hay or pasture. Used for lawns in extremely dry regions. Forms a very dense sod. Roots go down 8 feet. Crowds out weeds especially in dry seasons. Not difficult to eradicate.

Prefers cool growing season. Becomes somewhat dormant in very hot weather. Responds quickly to small moisture supply. Has survived droughts that almost completely killed other average drought resisters. Unquestionably the finest grass for extremely dry conditions.

Sow 10 lbs. per acre on a firm seed bed about spring rain seeding time. Cover about 1 inch. Light nurse crop may be used on weedy land. You are going to hear a lot about this grass. Price is now greatly reduced. Let us save you money on new crop Crested Wheat. See page 40.

Small lots, postpaid, 1 lb., 45c; 5 lbs., \$2.00; 10 lbs., \$3.25.

If you want the best drought resister order this Crested Wheat Grass.

\$6.10  
for  
25 lbs.

## KENTUCKY BLUE GRASS

#### Now Economical to Sow

This is a good year to sow Kentucky Blue Grass. We are selling quality seed at low prices. Thin pasture stands are costly. It is a losing matter to wait for Blue Grass to come in naturally. You'll lose much more in the production per acre than the cost of seed at present levels. Thick stands crowd out weeds and make you more money.

If you have a fair stand make a top seeding with 6 to 8 lbs. of seed per acre or make a dandy new seeding with 20 lbs. per acre of our Extra Fancy Blue Grass. Thicken old stands by discing ground with knives quite straight. Then sow and harrow. A disc drill is excellent. Use a roller if possible. A light nurse crop may be used.

\$3.40  
for  
25 lbs.

#### A Valuable Grass

Kentucky Blue Grass is well known over a wide area. It is highly nutritious. Cattle and horses are very fond of it. Grows from early spring until late fall. Makes an excellent sod and stands close grazing. Stands a lot of drought, coming out after dry periods in a wonderful way. Extreme drought will cause some damage and thin stands. Thin stands are money losers.

It pays to thicken them up when good seed can be secured at our present low prices. Make each acre do its share by giving it a chance. You can't expect big yields from thin stands. Our seed is very nice and shipment is guaranteed to please you. See page 40 for prices on larger amounts.

Small lots, postpaid, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.25.

### Bermuda Grass

This grass is very widely used in the south for lawns and pastures. Stands the extreme heat of southern locations better than any other on soils of a clay or loam character. Grows on sandy soils too but is less productive on them. The seed is quite small. Five pounds sows an acre, although for lawn seeding a heavier rate is recommended. It is not very winterhardy and probably will winter kill north of Kansas and similar locations.

We have a very nice quality of seed for you and we are pricing it on a close margin.

Small lots, postpaid, 1 lb., 45c; 5 lbs., \$2.00; 10 lbs., \$3.75. Not prepaid, 25 lbs., \$6.00; 50 lbs., \$11.50; 100 lbs., \$22.50.

\$6.00  
for  
25 lbs.

### Western Wheat Grass

A native American Grass. It is very resistant against extreme cold and drought although will not stand it to the extent that Crested Wheat Grass does. It produces wonderfully well, however, under average drought conditions. Grows remarkably well on Alkali soils. Not suitable on land subject to much overflow. Grows 2 to 4 ft. high and yields are around 2 to 4 tons per acre. Matures a little later. The seeds are larger than Crested Wheat and it requires 15 to 20 lbs. to sow an acre. May be sown alone or with small grain as a companion crop. This crop has certainly come up fast in popular favor in recent years.

Postpaid, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.25. See page 40 for prices on large lots, not prepaid.

\$3.00  
for  
25 lbs.

# REED CANARY GRASS

## Grows on Very Wet Land Yet a Great Drought Resister

This grass has some extraordinary characteristics and its use is becoming widespread, especially in the northern and eastern sections of the nation. It is a grass that lives for many years yet is easily eradicated. It has good feeding value with crude protein tests running as high as 23.5% in first cutting to 15% in second. Annual yields reported up to 4.2 tons of cured hay per acre, on 2 cuttings and up to 7¼ on 3 cuttings.

In northern states like Minnesota and Wisconsin it makes two cuttings. Further south 3 may be secured. Reed Canary Grass is adapted to the entire northern half of the nation from coast to coast and well down to the south in sections of higher altitude. Makes fine pasture after hay crops are removed or can be pastured the entire season.

Exceptionally good for wet land, growing on peat and muck land that is too wet for stock to pasture on. Reed Canary Grass forms a dense sod that will support a team and wagon. Also gives heavy production on upland and has proven an excellent

drought resister. In a dry year on upland at Iowa State Experiment Station it outyielded Timothy, Orchard Grass, Bromus and similar grasses. It almost doubled the yield of Bromus which was second best.

It is no wonder the crop is so popular. Makes good quality hay and splendid pasture. Begins its growth quite early and continues until late in fall. First season growth is 10 to 20 inches. Does not head until second year. Seed forms only in first cutting. Grows 3½ to 5½ ft. high. Second growth shorter but very leafy.

Sow on a fine well settled seed bed early in spring or late in the fall. Do not cover over half an inch and roll if possible. Needs favorable moisture conditions to get started. Sow 6 lbs. per acre. Some prefer 4 lbs. Canary and 4 lbs. Timothy mixed. Canary crowds out Timothy later.

Ask for our Free Circular on Reed Canary Grass.

See page 40 for prices.

Small lots ppd., 1 lb., 50c; 5 lbs., \$2.25; 10 lbs., \$4.00.

**\$8.00 for 25 lbs**

## ORCHARD GRASS

**\$4.60**  
FOR  
**25 lbs.**

### A Very Valuable Grass

A very productive perennial grass. Starts growing very early in the spring. Grown in every state in the Union. Makes good hay. Yields about same as Timothy. Good grass for shady places. Keeps creek banks from washing. It is a good drought resister. Makes a fine combination with Red Clover for hay. Gives heavy after-growth after hay crop. It is a fine grass to mix with others for pasture purposes.

We know that customers who start with Orchard Grass will seldom do without it. It is a grass of great value. It will pay you to get acquainted with it. Our seed is new crop and guaranteed to satisfy.

Sow 20 lbs. per acre. See page 40.

Small lots, postpaid, 1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.80. See page 76 for lawn grass mixtures.

## RED TOP

### Grows Most Anywhere

**\$3.40**  
FOR  
**25 lbs.**

No land is too poor to grow Red Top. It does well where many other grasses fail. If you have trouble getting a stand of grass sow Red Top—it seldom fails. It grows on up-land, and is specially adapted to wet land. Some like it mixed with Alsike Clover. It matures along with Timothy.

Red Top grows on soils low in lime. It is a great drought resister. Stops washing of the soil. Makes a good hay crop. One seeding lasts several years. Begins early in Spring, and continues its sturdy growth throughout Summer and Fall. Sow about 10 lbs. to 12 lbs. per acre.

Our price is attractively low this year. They are bargain figures.

Our seed is high quality. You get a real bargain in the kind of seed that will give you fine assurance of success. We guarantee to save you money.

Small lots, postpaid, 1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.80. See page 40 for quantity prices.

## English Blue Grass

### A Grass That Is Widely Adapted

A crop used for hay and pasture. Yields around 2 tons of hay per acre on average land. Grows 15 to 30 inches high. Exceptionally valuable for pastures because it comes on very early in the spring and keeps on the job until late in the fall. Grows well from Kansas and Nebraska east to the Atlantic Coast and from Canada to the Gulf of Mexico. Not critical as to soils. Few grasses can equal it on wet land. Lives longer than Timothy. Seed cost is low this year. Sow about 20 lbs. per acre. It is a profitable crop either alone or in mixtures. Start this grass. You will like it and may always want some on your farm.

**\$2.60**  
FOR  
**25 lbs.**

See page 40 for prices. Small lots, postpaid, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.00.

## Lot "TIM" Red Top & Timothy

### A Popular Low Cost Seeding

Our trade uses a lot of this for top seeding in pastures and meadows, and new stands. Many sow it alone, others add Alsike and other clovers. Adapted to a wide range of soils and climate. Especially good for wet land. Ten pounds an acre makes a full seeding.

Lot "Tim" is Red Top containing some Timothy seed. We secured this seed at low cost and are selling it at figures that make an appealing bargain. The low acre seeding cost and the ease of obtaining stands make this a very popular value. Shipment guaranteed to please.

See price list for other quantity prices. Small lots, postpaid, 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75.

**\$2.10**  
FOR  
**25 lbs.**

# LOWEST PRICES

# SEED CORN

## 94% GERMINATION

All of our seed corn is high germinating seed. It is well dried, solid and bright. We have the ordinary corn which is now called open pollinated or O.P. corn and the State Certified Hybrid seed corn. You can secure from us early, medium and later maturing varieties. No definite maturity date can be given as that varies according to soil and seasonal conditions. Therefore no maturity date is guaranteed. It is very much to our interest to supply our customers with seed that will give highly satisfactory yields. Our seed is selected with that point in mind. The Hybrids are described on pages 50 and 51. The Open Pollinated on 56 and 57.

## GRADES

Our O.P. Corn comes only in one grade which is the Edge Drop or flat grained type. The Hybrids come in the Edge Drop and the small Hill Drop which contains the small rounder kernels. The Large Hill drop contains the larger rounder kernels. All grades have equal yielding ability. Edge Drop is most popular.

## ECONOMY OF BETTER SEEDS

Nearly every experienced farmer knows that the seed he plants has an influence on the yield he obtains. Our open pollinated corn costs you only a little over 25c an acre for seed. Such a small expenditure may readily bring you 5 to 10 bushels more corn per acre. Our Hybrids cost only about 75c an acre and has increased yields 10 to 25 bushels per acre. Better seed corn is a profitable investment.

## NEW PERFECTION

Many who read this have used the old Clarinda Big Perfection. Here is something newer and better. A large yellow corn. Big ears. Broad, thick kernels. Moderately rough, 16 to 18 rows per ear. With such kernels, that makes a big ear, and there are lots of them. Has outyielded Hybrid in one test. Beautiful golden color. Vigorous grower. Maturity around 110 to 115 days. It's the heaviest yielding open pollinated corn we know of. You have to grow it to appreciate its great merit. You can save seed from this crop for replanting. We urge you to get started with this great New Perfection.

Price 1 bu., \$2.00; ½ bu., \$1.10; ¼ bu., 60c. Postpaid 1 lb, 25c; 5 lbs., \$1.00.

## Merko

Corn Treatment  
only 3c per acre

Apply as a dust any time before planting. Controls seedling blight and root and stalk rots. Increases germination. Permits earlier planting. One pound treats 8 bushels. Directions furnished.

Postpaid: 4-oz. tin, 50c; 1 lb., \$1.25.

## BERRY'S REIDS DENT

There are a number of strains of Reids Dent. They are not all equal in production or quality. We would like to have you plant some of Berry's Reids Dent next to any of your own or anyone else's variety that goes by the same name. Keep careful record of yield and see what you gained by investing around 25c an acre for our seed. That's all it costs you this year.

We select this corn toward a smoother type than the Pride of Iowa. The average maturity is around 105 to 110 days. This corn bears solid compact ears ranging up to 9 to 12 inches long. The grains are quite deep and close set. They have a fine golden color indicating excellent feeding value.

The choice between this and Pride of Iowa depends largely on whether you like your corn toward the smooth or the rough type. Both kinds are extensively used by our trade and both give big production and fine quality corn.

See page 40 for quantity prices.

Small lots postpaid any variety Open Pollinated.

1 lb., 20c; 5 lbs., \$1.00.

## SEED CORN GUARANTEE

30 Days to test it—Your money back if not satisfied. 94% or better germination

We take great care in the selection and preparation of our seed corn. It is all tested and labeled when shipped. You have the privilege of examining it and retesting it in any way you wish. If you do not find it as represented, or if for any reason you are not satisfied you may return it, and your money plus transportation charges will be promptly refunded. We abide by your decision.

We cannot guarantee any particular kind of crop as that is influenced by soil, climate and cultivation over which we have no control.

**BERRY SEED CO., CLARINDA, IOWA**

## PRIDE OF IOWA

Berry's Pride of Iowa is one of our heaviest producing yellow o.p. corn. Comes about between the New Perfection and Reids Dent. Ears are somewhat larger than the latter with a tendency toward deeper and wider grains. Kernels a little rougher. Not Flinty. Cob is not excessively large and it has a good shelling percentage. Average maturity around 110 days.

We have been selling this variety for a long time and letters from customers attest to its productiveness and quality. We consider this one of our best o.p. varieties and a real money maker. If you are looking for a little rougher type than the Reids you should find this a very satisfactory selection.

# LARGER YIELDS MAKE BERRY'S SEED CORN A WISE INVESTMENT

## RED WHITE CAP DENT

This year we have just a limited supply of this famous Red White Cap. It is a cherry red corn with a light colored cap on the tip of each kernel. It is an early maturing variety being generally classified as a 90-day corn. It is highly popular with feeders. Many consider it by far the best early feeding corn they can raise. It is an exceptional producer. Good length ears, medium depth and fairly broad kernels. Gives corn to feed ahead of most any other. We certainly can recommend this distinct, early maturing and heavy yielding corn.

## SILVER KING

A very early white, also known as Wisconsin No. 7. Resembles Silver Mine, but the ears, of course, are somewhat smaller and grains not quite so deep. Matures at least ten days earlier. Although earlier, it is a very good yielder and ranks foremost among the early white types. Will outyield yellow on poor soil. It's just the kind of corn many farmers are needing.

## FLINTS

Extra early maturing corn. Eight rowed broad kernels. Can be planted close. In demand for early feed or late planting.

Longfellow—A prolific yellow flint. Large wide kernels.

Silver Triumph—A fine white flint quite long eared.

1 lb. any variety on this page 25c; 5 lbs. 75c post-paid.

## GOLDEN GLOW

A heavy producing early yellow corn. Stalks somewhat taller than the average corn of this early maturity. Very popular with northern growers and those wishing an excellent early feeding corn.

Fine yellow color. Kernels of medium depth. Good, solid, well filled ears, medium size. Prolific yielder. Maturity around 95 days. There is a big need for early corn this year and we have secured a supply of fine seed stock, northern grown.

See page 40 for prices.

**BERRY'S GOLDEN DENT**

This is our biggest seller in the 100 day class. It is a leader in sales and its popularity is no doubt due to its very satisfactory performance. It is very similar to Berry's Reids Dent in appearance, but is somewhat earlier in maturity. Ears run 16 to 20 rows of kernels. Kernels are quite smooth, but it is not a flinty corn. If you want something earlier than Reids without sacrificing much on yield you should like Berry's Golden Dent exceptionally well. This has long been a great popular favorite among our trade. You are generally making a wise choice when you select a variety that so many people are well pleased with. We have a very fine quality this year. See page 41 for prices.

## WHITE WONDER

A very large white variety. Big ears sometimes 12 inches long and proportionately large in circumference. They are big fellows. Makes good solid ears that are not flinty. The grains are quite deep and somewhat rough. Stalks are strong. A prolific producer. The heaviest yielder of any white corn we have ever handled. We do not know of any openpollinated white that will outyield it.

The maturity is around 115 to 120 days. Many farmers prefer a white corn finding that it yields more per acre on all kinds of soil. This seems to be true especially on thinner land. We found our White Wonder often exceeds the expectations of the grower. Our seed is secured through men who have had years of seed corn experience. Surely such corn shelled, graded and tested is cheap at 20c to 25c per acre. Less than a bushel increase per acre pays your total investment.

## KRUG'S DENT

Ranks along with our Big Perfection and Pride of Iowa in yield, but is 5 to 10 days earlier. A four-year test in Illinois proved it the best yielder of 118 varieties. It is a cross of a smooth Reids Dent with Gold Mine. Ears somewhat smaller than Reids, but lots of them. Exceptionally firm and solid. Rich yellow color. Combines early maturity with heavy production. We recommend it highly. We do not believe there is another variety of equal earliness that will yield like Krugs Dent. Our Hybrid is the only exception.

## SILVER MINE

The most popular white variety in the corn belt. A splendid yielder. Does well on all soils. Best variety for thin land. Maturity about 110 days. Will stand thick planting. Many stalks produce two ears. Pure white grain and cob. Medium rough type. Good shelling percentage. Makes good solid corn. For all around merit it is hard to excel. One of the best varieties for general use in the corn belt. A safe and profitable kind to grow. It makes friends everywhere it goes.

## ST. CHARLES WHITE

### The Famous Red Cobbed Ensilage Corn

This is an enormous producer having tall leafy stalks and large white ears. The grains are clear white, deep and large in size. Medium rough type. Leaves are broad and succulent. It is used extensively for ensilage in the Northern states. Yields up to 40 to 50 tons of green feed per acre. Grown as a main crop variety in this locality and south. Makes a good milling corn on account of its clear color. Customers tell us it is the most sensational producer they have ever grown or seen. We have some very nice graded and tested seed.

# IOGLOSS

## A Very Fine Variety Extra Heavy Yielder

A smooth awned, stiff strawed and high yielding strain of spring barley. It is a malting type. Ripens about the same time as the Velvet. In tests extending from 1930 to 1937 it showed a superiority over both Velvet and Wisconsin 38 in lodging strength. It outyielded all varieties in the test by a very substantial percentage. It produced 7 to 9 bushels per acre more on the average than other widely grown varieties. When you consider that this was the average of a seven-year test its significance is most important. No barbs, strong straw, big yield make Iogloss an exceptionally fine barley.

## ODERBRUCKER

Also known as Wisconsin 55. A standard malting barley. This, in our opinion, is the heaviest producer of its type by 5 to 10 bushels per acre. Plumper kernels. Great disease resistance. Higher protein test. Better feed. A bearded variety that gives greater returns. Our Oderbrucker should please you. We endeavor to secure the best of quality at our prevailing low prices. Recleaned seed gives you stock with small stuff removed. Plumper grains generally make some-what stronger plants. This variety and all of our barley and other seed grains are shipped subject to your approval. If in your opinion you have not received an extra measure of value, write us for shipping instructions. See guarantee page 6.

Danese, W. Va.

Dear Friends:

I have found you an honest and reliable house. Your seeds are certainly good and reliable in every respect. I am well satisfied with your service.

Yours truly,  
WATSON COLE.

# BARLEY

## SPARTAN

A two-row, smooth awned spring variety. Beards without barbs. One of the strongest strawed barleys grown. Bears large uniform kernels. A fine variety for pearling. Not acceptable as a malting variety. Its unusual strength of straw makes it an ideal kind to sow on rich land. Easy to harvest and because of its smooth awns or beards it is very satisfactory to harvest and thresh. Heavy yields are recorded and it is growing rapidly in popularity. It has greater value than some who, although yielding well, are discounted on the market or whose weak straw causes trouble. Our Spartan Barley is one of the most profitable varieties.

Small lots, any variety, postpaid, 1 lb., 20c; 5 lbs., 75c.

**LOWEST  
PRICES**

**ON  
HEAVY  
PRODUCING  
VARIETIES**

See page 41  
for prices

# VELVET

The KIND With SILKY BEARDS

Velvet is a smooth awned or barbless spring barley. The awns or beards give the grain some protection yet these beards have no barbs on them. They are as smooth as straw making the crop more pleasant to handle.

Velvet is a malting type barley that is in such big demand. It appears to withstand unfavorable conditions very well. It has a good stiff straw being close to Iogloss in that respect. Its quality and productiveness have made it one of the most popular varieties in the state of Iowa. It is now being grown over a wide area.

In many sections farmers are switching from oats to barley. These improved smooth awned kinds yield more and make more profitable grain crops. Barley has always been the heaviest producing grain in the northern states and this is materially above the average in production.

Barley makes a better nurse crop for grass and clover seedings because it does not shade the ground so heavily and matures earlier. Velvet is one of the most popular varieties.

## A VERY POPULAR VARIETY

# WISCONSIN No. 38 BARBLESS BARLEY

This is claimed as an improvement over Velvet and has shown a slight edge over it in production. In one test Wisconsin No. 38 outyielded all others with a production of 50 bushels per acre. It is also a spring variety and has smooth beards or awns like Velvet. It is a fine malting type barley. The straw is generally somewhat shorter than Velvet and a little later in maturing. In Central Iowa it should be ripe about July 15th.

Wisconsin No. 38 shares the popularity of malting types with Velvet and Iogloss. In some eastern and northern states it is even more popular. The straw is not quite as strong but it yields well. In localities where both are equally well known it is about a toss up between the two.

A farmer can scarcely make a mistake in selecting any of the varieties listed on this page. They are all recognized as excellent kinds. We price our barley at close figures. Our guarantee assures you of a satisfactory shipment or your money back. See page 6.

## Fine Feed

Barley makes a wonderful feed for hogs. It is fattening. Builds nerves, muscle and sinew. Matures early. It is a fine nurse crop. Malting demand creates a good market. Requires only 2 bushels of seed per acre. Grow better barley by sowing better seed.

We advise treating barley with Ceresan. It is a good investment. See description on oat page 61.

**See Page 41 for New LOW PRICES**

# SPELTZ

## NORTHERN GROWN

### ALSO CALLED EMMER

**Great Drouth Resister. Practically Rust and Smut Proof. A Heavy Producer. Extra Rich Feed**

A remarkable grain crop. Really a type of wheat. Shucks cling to the grain. Generally two grains in a shuck and somewhat softer than wheat. Makes a very nutritious feed. Stems are pithy, not hollow. Unusually strong straw. The compact heads are heavily set with grain. A wonderful drought resister. A heavy producer especially under drought conditions. Matures early. Grown from Canada to Texas and east and west across the continent. Very free of rust and smut.

Grow some speltz this year and show your neighbors what this drought and disease resistant grain can do. Sow in the spring. It is an ideal nurse crop. Sow  $2\frac{1}{2}$  bu. per acre. Set drill for oats. Sow early as possible. Cut before dead ripe. Thresh as for oats but not too close. It is a great grain crop. Its rich heavy grains will delight you. Splendid for all kinds of stock.

WHEAT**

**NORTHERN GROWN**

**THATCHER** **RUST  
RESISTANT**

Thatcher is a beardless rust resistant spring wheat first released to growers in 1934. Developed by the Minnesota Experiment Station. Has given sensational performance especially in years when stem rust was damaging. Reports during the bad rust years of 1935 and 1937 show yields of Thatcher 250% of New Marquis and over 350% of Red Fife. Think of  $2\frac{1}{2}$  to  $3\frac{1}{2}$  times as much wheat per acre grown side by side with the other varieties. If you live in a section having rains, morning dews and relatively high humidity by all means grow Thatcher wheat.

Thatcher has a very strong straw. Not as tall as some varieties. Excellent for rich land. Makes a wonderful nurse crop. Matures 2 to 4 days earlier than New Marquis. Heads are short and compact. An excellent milling wheat. It is also quite resistant to bunt and loose smut. This is by all odds the most profitable spring wheat for sections susceptible to stem rust damage.

Our seed is northern grown, recleaned and very nice quality seed stock. Supply limited. Order early.

**Northern Grown SPRING RYE**

This is a distinct variety. Strictly a spring grain crop. It is grown for grain, pasture, and hay. No doubt this triple usage is why the crop is so popular. The grain is practically the same as winter rye. It is a good yielder of grain. Good length straw. Sometimes used with Canada Field Peas for hay. Wonderful producer on good land and the best small grain for thin soil. Early seeding gives best result but may be sown later than most grains if necessary. Sow around 2 bushels per acre.

Rye makes a very fine feed as pasture and grain although growth not as heavy as winter Rye. Helps out on the early spring feed problem. We try to figure out the seed demand so we will have enough for our trade without any to carry over. Nearly every year we underestimate the demand so we ask you to order your spring rye early. It is a crop that we believe will please you. It is a money maker and our prices on this northern grown quality seed are very reasonable. See page 41.

### Winter Wheat

We have some extraordinary varieties of winter wheat for fall seeding. Some of them are guaranteed to outyield your own stock. Along in July we publish a smaller bargain catalog describing and pricing winter wheat and also Alfalfa and other seeds for fall sowing. If you fail to get a copy of it be sure to write us for it. It will save you money.

**BERRY'S  
WILT RESISTANT  
FLAX**

Can be grown where ordinary flax fails. Yields 10 to 15 bu. per acre. Crop is in big demand. Sow early 24 to 35 lbs. per acre. Ideal nurse crop.

Thresh like ordinary grain crop. This variety is a heavy producer and a good yield of flax seed makes a big paying spring grain crop. Our seed stock is recleaned stock.

Palmyra, Mo.  
Dear Sirs:

The two cars of Seed Wheat we bought of you last year to which you gave the Copper-Carbonate treatment, proved very satisfactory and we had a wonderful yield from same. We were specially pleased with your usual prompt service. Having used your seeds for past 15 years makes me feel very kindly to the Berry Seed Co.

Yours very truly,  
W. A. Rinehart.

Dear Sirs: I have been  
buying seeds from you for  
a number of years for  
my own use and for  
the Boulder Farm  
Club. The seeds  
have always given  
entire satisfaction,  
and we have saved  
over one hundred  
dollars by ordering  
from you.  
Very truly yours,  
Ira L. Dadisman

### A Splendid Heavy Oat

If you want the biggest grained, heaviest testing oat of all get some of our Victory Oats. It is the largest grained variety we have ever seen. Big, plump bright grains. Often weighs 40 to 42 lbs. per measured bushel. We tested the Victory oats we have in stock with one of the smaller berried varieties. There were 1.85 times as many kernels in the smaller seed. Consider what that means in the terms of extra hulls, almost twice as many grains in the smaller seeds.

We'll gladly send you a sample of these Victory Oats so you can see for yourself their amazing size and extra fine quality. You can order them with the distinct understanding that you will receive one of the finest and most beautiful shipments of oats you ever had on your farm. If they disappoint you just write us for shipping instructions and a prompt refund of your money plus freight charges.

### Northwestern Seed Stock

These oats command a premium on the market. There is a heavy freight rate on the seed from the Northwestern territory where

they are produced. Many farmers want new heavier seed and you certainly can't find it heavier than these. The records of production that this variety has made are most impressive and it has taken many prizes at grain shows. First prize International Livestock show in 1938.

Variation in seasonal conditions will naturally effect production and quality. With a relatively cool growing season it certainly has gone to town. They are not an early variety. The straw is of good length yet has strength to resist lodging. The heads are sprangled and when heavily laden with these oversize grains it is certainly a profitable harvest to gather.

### In Big Demand

This Victory Oat has been a big seller with us. The seed sells itself through its appearance. Naturally the cost is somewhat higher than of the earlier kinds more commonly grown. Extra production may readily absorb this and give you extra profit besides. We are sure that once you see what these oats are like you will not be satisfied until you have secured some of the seed. Let us send you a sample. See for yourself. See page 41 for prices.

# GREAT NORTHERN

## A Large White Variety

Great Northern is the name we have given to a fine Swedish Select Type Oat. They are not as large as Big Victory but having a somewhat earlier maturity may, under certain conditions outyield it. The meaty kernels have both length and thickness. They are far heavier than the average run. It is not surprising that their production may often be so amazing.

The straw is longer than the average yet stands up well. The straw growth is naturally influenced by soil and season. Not only does it have excellent yielding qualities, it also is a superior kind to use as a hay crop. Cut in the dough stage it makes wonderful feed. It is as a grain producer, however, that most of our customers use these oats. They yield heavily.

We secure northern grown stock for our seed as we consider that very definitely superior in quality and production. This seed is cleaned stock. Light small grains are removed giving a heavy cleaned product that is certainly worth the premium it costs. Real thrifty buyers appreciate seed of this character.

Some customers report that they sold most of their first crop of Great Northern oats for seed in their neighborhood at a premium price. We, of course, guarantee to ship you seed that will show up to your entire satisfaction. You can return any shipment that doesn't look right to you. See guarantee page 6. Send your seed oat orders early especially for Big Victory and Great Northern.

# BETTER SEED OATS

## LARGER YIELDS

### COLUMBIA

Every farmer we know of who has grown our Columbia oat is an enthusiastic booster for them. They are a development of the Fulghum but superior to them in that they may be sown as much as three weeks later and still be a leader in yield. The increase in production has ranged from 5% to 25% depending on season. Some years other oats do well but the Columbia nearly always ranks a leader.

Columbia oats are also similar to Burt oats but plants are taller, heads longer and more erect, and the straw much stronger. The kernels have light stripes on the back and are usually awnless. It is always one of the earliest oats to mature. Its wide range of seedling dates, its resistance to unfavorable conditions and early maturity make it one of the surest heavy yielding varieties. We recommend this variety strongly because of the satisfaction it has given our customers.

Our seed is cleaned and is priced low for such fine stock. See page 41.

### CERESAN

**Disinfects small grain for two cents a bushel**

A dry treatment. Easy to apply. Controls stinking smut of Wheat, covered smut and stripe of Barley and loose and covered smut of Oats. Does not cause seed to lodge in drill. Measuring spoon in each can. Half ounce treats a bushel. Makes for better stands and larger yields.

Many Agricultural authorities advocate its use. We recommend it highly.

Prepaid 1 lb. enough for 32 bushel only  
75c; 5 lbs. for \$3.00.

### FULGHUM

We consider this the heaviest producer of the early varieties, especially when sown early. It outyielded other varieties by 12% to 17% in a seven-year test. Kernels are medium size. Golden yellow color. Straw relatively short. One of the best to stand up on rich land and to outyield on thin land as well.

Fulghums are especially resistant against smut. Where Khersons showed 25 to 40% hardly a trace could be found in the Fulghums in the same test. These oats are hardier than most oats. They are sown in the south as a winter oat. Best results in the north come from very early seeding. For later seeding use Columbia or Iowar. Fulghums are an excellent early maturing heavy yielding variety that we can recommend highly.

### SWEDISH SELECT

Our Swedish Select type oats are large heavy grained kernels. Plump, meaty white oats. The stiff straw is fairly long. The grain is borne on spreading heads. Somewhat later than Iowar and Columbia. It is indeed a beautiful sight to see these large heads drooping with a load of these fine heavy grains. And that brings added profits too for oats such as these have yielded over 100 bushel per acre. With proper weather it is amazing how these oats can produce.

Our northern grown seed stock is very decidedly a superior product. It is well cleaned seed and we guarantee to ship you seed that will please you. If you do not consider it one of the finest lots of oats you ever saw, write us for shipping instructions and refund. We pay premium prices to get such seed. Our price is low for this quality. Sow better, bigger, cleaner northern grown seed. It takes seed of this character to get more profitable oat production.

### NEW HULLESS

**Big Yields—No Waste—Fine Feed**

Ordinary oats are 28 to 40% hulls. This variety has no hulls. It's all meat. Grains similar to rye but softer and lighter in color. They are also excellent producers in several cases, having outyielded the ordinary hulled oat. Even should it fall a little below in yield the increased feeding value of the Hulless makes it very profitable to grow.

Straw is of medium length and strong. Equally as hardy and drought resisting as ordinary oats. These oats can be fed without grinding. They certainly are fine feed. One grower reported his Hulless oat smut free while common oats were badly affected. In order to assure protection against smut we treat all our Hulless oats with copper carbonate to destroy any smut spores. This treatment is effective only on Hulless.

Our seed is fine quality, carefully cleaned, and graded. It is a real seed stock. We have new low prices on these oats this year.

### IOWAR

A wonderful early white oat. It was originated at the Iowa State Experiment Station from a 60 day variety. It outyields both the old Iowa 105 and 103. Grows a longer straw than the old kinds. The grain is medium size and has a thin hull. A wonderful feeding oat. Each kernel has a small black awn.

Many are acquainted with this variety because its performance has made it a great favorite. However, due to improper seed selection and preparation some of its most desirable characteristics are not fully secured. Our seed stock comes from heavy producing fields and the seed is graded so as to give you the select seed stock.

You will find it money well spent to use such seed. Let us supply you with a better yielding, earlier maturing oat, having a higher feeding value.

WONDERFUL for **PASTURE**  
and **HAY**

# Sudan Grass

**SPECIAL PRICES ON  
LARGE QUANTITIES**

100 lbs., \$4.30; 300 lbs., \$12.75, subject to market variations. Bushel weighs 50 lbs.

## GROW IT THIS YEAR

### A Most Profitable Crop

This valuable, quick growing, heavy producing grass should be grown on every farm. Produces enormous hay crops. Makes fine pasture during hot summer months. If you are needing a big hay or pasture crop this year be sure to sow Sudan. It is a sure crop and easy to grow.

### Priced Very Low

Our price on Sudan Grass seed is again very low this year. This crop is subject to sudden price variation and often makes sensational advances about seeding time. We advise laying in your supplies early as we contracted our present stocks on the basis of low markets. Considering quality you should find a big savings in our present quotation.

### Description

Sudan belongs to the cane family but is finer stemmed and a free stooler. Grows 4 to 7 feet high and yields 4 to 10 tons of cured hay per acre. Livestock is very fond of Sudan. It has good feeding value. First hay crop can be cut in about 60 days after seeding and second and third crops 30 to 40 days apart.

Sudan is one of the best drought resisters known and supplies an abundance of fine pasture or hay during the hot dry months of the summer when feed is often scarce. That's why every farm should have some of it. It has been a life saver to thousands during the past few years.

### How to Handle

Sudan is a warm weather crop. Do not sow until corn planting time or after. Prepare a good seed bed as you would for corn. Drill in close rows or broadcast. Cover seed about an inch deep. Sow 20 to 25 lbs. per acre. You can begin pasturing when 6 to 8 inches high. Cut for hay when in bloom, although you can cut earlier or later without damage or loss.

### A Saving Guaranteed

The true basis of value at a bargain price is the quality you receive. We will sell you this seed subject to any test you care to put it to. You can have up to 60 days to satisfy yourself that you have secured a quality lot at a bargain price. We guarantee to save you money on our Sudan Grass. If this seed fails to please you in any way let us know and prompt adjustment will be made in conformance with our guarantee.

It is easy to grow Sudan Grass when you use seed of such fine character. We urge you for the sake of better farm profits to grow some of it this year. It produces enormous quantities of feed in a short time. It keeps right on the job when heat and drought are damaging other crops severely. You get good bargains by buying now.

**\$2.20**  
BU  
**NEW CROP  
SEED**

## MIXED MILLET

### Serviceable Seed at Low Cost

Here is really a bargain in Millet for a hay crop. It is practically all German type Millet but contains a little percentage of other millets that make it unsuitable to use for seed production. For a hay crop, however, it makes a wonderful seeding and should produce a yield equal to a straight German type. This lot varies a little from bag to bag but should run around 90% to 95% pure German type stock.

These taller growing, heavy producing, hay millets are in big demand. You can buy this Mixed Millet at a very substantial reduction in price. It will give you a great big practical bargain. This seed is new crop seed of good germination. It is nice bright plump seed. The seed has been recleaned for the removal of impurities and our analysis shows it free of noxious weed seeds.

It is not often that we have such a value to offer. The seed was grown with this mixture in it and being purchased at a discount, we can pass it on at a bargain to those who do not care about a pure seed crop but would like to get heavy hay production at low cost.

**\$1.10**  
PER  
BU.  
50 LBS.

**10 bu. for  
\$10.00**

Rockwell City, Iowa.  
Gentlemen: I have been a customer of yours for several years. Your Red Clover seed is a wonderful producer. Your Dakota No. 12 Alfalfa, both in price and quality, has given me the best of satisfaction.

Yours respectfully,  
S. G. FOWLIE.

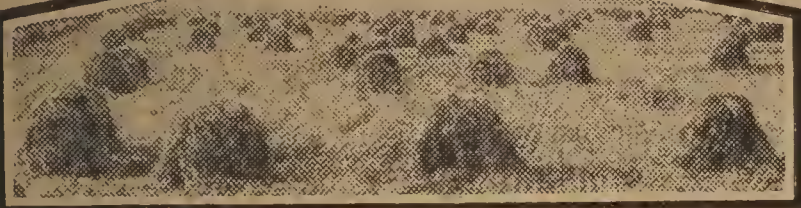

# CROPS of SPECIAL VALUE MILLETS

## BERRY'S ANNUAL PORK PRODUCER

A rapid growing mixture of legumes, forage and grass crops. Makes a wonderful pasture. Can be used a few weeks after seeding. Enormously productive. High in protein. Builds big body frames, reduces grain consumption. Makes hogs of marketable size in quicker time. Contains Peas, Vetch, Rape, Beans, Rye, Barley, Speltz, Oats, Sudan, Cane, etc. Sow 40 to 50 lbs. per acre after danger of frost. This is a great pasture combination at low cost. See price list, page 41.

## VETCHES

### SPRING VETCH

Spring. An annual variety having much the same characteristics as peas. Does well wherever Canada Field Peas are grown. Requires cool growing season. Should be sown early, using 50 lbs. per acre. Grows 3 to 5 feet high. Is quite finely stemmed. Generally sown with a bushel or two of oats and the two cut together for hay. Grows rapidly, yields heavily. Excellent feeding value; high in protein. Produces a wonderful early hay crop. Makes best hay if cut when in full bloom. Does not live over winter.

Scotia,  
Nebr.

Dear Sirs:

My father started buying seeds from you in 1898 and I have used Berry's seeds for the past 15 years. Have never had a complaint. You have always satisfied me and saved me money.

Yours truly,  
CHAS. KEOWN.

### SAND OR HAIRY

Also called Winter Vetch. May be sown spring or fall. Lives over one winter. Use 20 to 25 lbs. per acre. Can be sown with spring grain and pastured some in fall. Remains green for a long time. Excellent cover crop. Fine soil builder. Good yielder. High feeding value. Inoculate all Vetch seed. See Pages 40-41.

### GERMAN OR GOLDEN

This is that beautiful, heavy growing variety that makes such wonderful production. Its leafy growth is 4 to 5 feet tall. Yields up to 4 to 5 tons per acre and seed yields of 40 to 50 bushels. The feeding value is fine. It is one of the most popular varieties of millets and very widely grown.

This crop can be sown any time after corn planting until the latter part of July. Sow 40 to 50 lbs. per acre for hay production; 25 to 30 lbs. per acre for a seed crop. Our seed is secured from good sources and you should find it a superior product. See page 41 for prices.

### WHITE WONDER

This runs our Golden Millet a close second in popularity. Many think it is better. It has a dense foliage and broad leaves. A wonder for production. Matures early in spite of its big size. It has long heavy seed heads and is a good seed producer. Color of seed is white. Makes excellent hay if cut just when seed heads are beginning to form.

To some men millet is millet, but we find that thorough cleaning and grading makes a superior product and that such seed produces more profitable crops.

### SIBERIAN OR EARLY RUSSIAN

Two to three weeks earlier than German. Can be sown later but does not yield as much. Hay is of very fine quality. Grows 2 to 4 feet. Seeds reddish brown. Sow 35 to 50 lbs. per acre.

### PROSO-MILLET

Also Known as Hog Millet—Broom Corn Millet and Russian Wheat.

This Variety is grown almost exclusively for seed. A very prolific producer. Seeds are larger than other millets. Makes fine feed. It is used in some countries for human food. Equal to Barley in feeding value. Makes extra fine poultry feed.

Proso is a heavy seed producer, yielding up to 60 to 70 bushel per acre. It matures in sixty to seventy days. Makes a good cash crop. Needs warm weather and soil for quick germination. Sow 40 to 50 lbs. per acre. Drill in close rows or broadcast.

The demand for this seed has increased very rapidly in the past few years. Order as early as possible.

## DWARF ESSEX RAPE

**Reduces Pork Production Costs  
Enormous Producer—Grows Quick  
Economical—Every Hog and Sheep  
grower should have plenty of Rape  
pasture**

Sow this liberally and cut pork production costs. Lower pork costs are desirable. That means better profits. Lower your production costs and make still more money. Every hog grower can produce pork at lower costs if he has a good rape pasture.

Rape is exceedingly rich in protein, analyzing as high as 37%. Think what this means when yields run as high as 24,000 pounds of green feed per acre. Young pigs especially need lots of protein if they are to make the most rapid and economical gains. It is far cheaper to grow protein in the form of rape pasture than to buy it in the form of tankage or other feeds.

The seed is cheap, see price list. It only requires 6 to 8 lbs. per acre. It can be pastured in six to eight weeks after seeding. Sow any time from oat seeding until early in July.

Experiment stations recommend Rape highly. It builds big, strong body frames. Cuts down on grain consumption. Gets stock ready for market earlier. Used chiefly for hogs and sheep, but is good for all kinds of young stock. Our seed is genuine Dwarf Essex. 5 lbs., postpaid, \$1.00. See price list for quantity prices. See page 41 for larger lot prices.

Friends, if you really know the money-making features of this crop you would never be without it. We urge you to try at least a small patch of it.

# CANE

## A Leading Forage Crop

A crop that is rich in sugar and fat and very palatable. An enormous yielder producing from 10 to 15 tons of excellent green feed on rich land. A most remarkable drought resister. Especially valuable in dry hot seasons. Makes a wonderful hay crop when sown at the rate of 75 to 100 lbs. per acre.

Some farmers get cash out of their ordinary hay crops and use cane for their own feed supply. A few acres of cane will make as much hay as many acres of Timothy. Your live stock will relish cane hay and fatten on it. You can also pasture cane or cut it for green feed. Makes excellent summer and early fall feed. It is also used for ensilage. Cane is also a good seed producer, yielding 30 to as high as 60 bushels per acre.

## How to Handle

Sow quite heavily for hay or pasture, 75 to 100 lbs. per acre. Heavy seeding makes a finer growth and therefore easier to cure. Do not sow until corn planting time or after. It is a warm weather crop. Drill in close rows, or broadcast. Cover about an inch. Can be cut and cured like ordinary hay. Takes a little longer to cure than ordinary grass hay.

**Early Amber.** The kind most generally grown and of great value because of its splendid growing qualities.

**Early Orange.** Heavier stalks, more abundant leaves. Seed head more compact. Heavier yielder but a little coarser.

## CANE for MOLASSES

To make good sorghum, seed must be pure and we take care in getting this seed direct from sorghum producers. We do not guarantee the crop, but we consider our seed equal to if not superior to any on the market.

**Ames Special Sorghum.** An improved type of the Amber. Makes excellent sorghum of fine flavor and color. Very juicy. We recommend it highly. We are sure you will be pleased with it.

**Silver Tip.** More after the orange type. Makes delicious mild, clear, light colored molasses. Ranks very high in favor with expert sorghum makers.

Price, 1 lb., 30c; 5 lbs., \$1.00, postpaid. Not prepaid, 5 lbs., 75c; 10 lbs. or more, 11c per lb.; 50 lbs. or more, 10c per lb.

## GROHOMA

### A Cross Between Cane and Kaffir

Greatest drought resister. Very heavy producer. Cattle like it. Wonderful feed. Grows strong and erect. Most popular forage of recent introduction. Excellent pasture. Drill, double rowed using 18 to 20 lbs. per acre.

Price, postpaid, 1 lb., 25c; 5 lbs., 75c. See page 41 for prices in larger quantities.

# BERRY'S Special GRAIN and HAY CROPS

## KAFFIR CORN

A sorghum grain crop. Used to some extent for hay. Stalks less juicy than cane and not sweet. Stands lots of hot dry weather. Makes fine poultry feed and suitable for all kinds of live stock when ground. Produces up to 40 to 50 bushels of seed per acre. For grain drill in rows 30 to 40 inches apart using 6 to 8 lbs. of seed per acre. For hay drill close or broadcast 75 to 100 lbs. Cut off heads, cure 10 days to 2 weeks, then thresh. Our seed is well graded. Prices are very low on both Red and White Kaffir.

SEE  
PAGE  
41  
for  
SALE  
PRICES

## Feterita

A great drought resisting crop. Earlier than Kaffir. Has a higher protein content. A very heavy producer. Grains flat in shape, bluish white in color. The crop is a free stooler. Handle like Kaffir. Adapted to a large territory because of its earliness. Makes good hay if seeded 75 to 100 lbs. per acre. For grain about 6 lbs. A leader among grain sorghums. Postpaid, Feterita or Kaffir 1 lb., 20c; 5 lbs., 75c

## BUCKWHEAT

A quick growing grain crop. Matures in 10 to 12 weeks. Excellent catch crop. Sometimes sown after small grain so as to get two crops from the land. Good cover crop for orchards. Makes land mellow. Good for bee pasture. Does well on all soils excepting wet land. We have two varieties. Both are excellent yielders. Our seed is re-cleaned and shipment is guaranteed to be satisfactory. See page 6.

**Japanese.** Rich dark brown. Strong grower. Earlier than most varieties. In big demand.

**Silver Hull.** Thin shelled. Silver grey. Medium sized grain. Makes nice flour.

Postpaid, any of above five crops. 1 lb. 20c; 5 lbs., 75c.

## HEGARI

This is a sweet sorghum somewhat similar to Atlas (p. 51), but does not grow as tall. Very nutritious. Valuable for grain, dry fodder, ensilage and pasture. Yields up to 5,000 lbs. of grain per acre and up to 18 tons of ensilage. Live stock especially cattle are very fond of it due to its sweet taste. It combines the grain production of Kaffir and Milo with the high forage value of cane. For grain production drill like Kaffir 6 to 8 lbs. per acre. May be double rowed using double the amount of seed. For hay drill in close rows at 75 to 90 lbs. per acre. Postpaid 5 lbs. for 75c. See page 41 for quantity prices.

## MILO MAIZE

Similar to Kaffir. Earlier. Stalks more pithy. Requires less moisture. Fine feed. Handle like Kaffir. Color white. Excellent yielder. Our seed re-cleaned stock. Prices low. See page 41.

## Broom Corn

Grown for straw in the seed heads. 4 to 5 pounds plants an acre.

**Improved Standard**—Excellent straw of good strength and stiffness.

**Dwarf Evergreen**—Best for dry conditions. Price, 1 lb. 25c; 5 lbs. \$1.00, postpaid.

Nursery Stock is not shipped to Arizona, California, Nevada, Washington, Oregon, Idaho or Florida

# FREE GIFTS TO NURSERY STOCK BUYERS

## PICK OUT YOUR GIFT NOW

If Your NURSERY STOCK Order, Received by April 15, is:

**1 A \$5<sup>00</sup> to \$9.99 ORDER BERRY'S GIVE YOU FREE**

1 of the following gifts:

- A—2 H. T. Roses—our selection OR
- B—10 Latham Raspberries OR
- C—10 Youngberry OR

Your choice of any three of above gifts.

**PREPAID PRICES SAVE YOU 15%. ALL OUR NURSERY STOCK IS PRICED PREPAID TO YOU. WE PAY THE POSTAGE OR EXPRESS.**

THESE gifts are offered to get our customers acquainted with our outstanding bargains in Nursery Stock. They are given only on orders for nursery stock (excepting strawberries). They are not given on orders for farm or vegetable seeds.

Your order must be mailed in before April 15th. No Free Gift is sent unless requested on your order.

### ORDER EARLY

You will always have grand success with Nursery Stock which is planted early. Order now and we will ship the order at proper planting time—just as soon as the weather moderates so it is safe to plant. Be wise—get the best from Berry's and plant early. Be sure to order your Gift.

## SAVE NOW - BERRY'S Guaranteed QUALITY

### FINEST QUALITY

Our enviable reputation is built on high quality at low prices—superior values. We have developed the largest business of its kind in the country, on this sound policy.

These same high standards maintain in our nursery department. Each and every item is carefully tested before Berry's will put their name behind it. You can order our Nursery Stock with full confidence that it is accurately and honestly described, that the quality is of the highest and the prices, the lowest.

Berry's guaranteed nursery stock is grown by experts, wherever possible in northern sections for extra-hardiness. Transplanted, pruned and root pruned to insure sturdy, well rooted, well branched plants that will thrive anywhere. Do not be misled by claims of superior quality—we offer high quality at very low prices.

### LIBERAL GUARANTEE

Berry's guarantee their nursery stock to be exactly as represented and to be delivered to you in good planting condition. If not, we will replace it free of charge but you must notify us within 10 days after you receive it.

If any nursery stock is proven not true to name, we will, upon proper proof, replace all such stock or refund the exact amount paid, but, in no case, shall we be liable for any sum greater than the amount originally received for said nursery stock.

If any Berry's nursery stock fails to grow with proper care, we will replace it at half price IF you notify us within 90 days after you receive it.

#### BERRY'S PREPAY CHARGES

All orders are mailed, postpaid, except packages which are too large and must be sent Express prepaid. If your post office address is not your shipping point, please be sure to give name of nearest Express station.

### FALL SHIPMENTS

In the spring of the year we ship orders at the earliest possible date or proper planting time, by postage or express prepaid. Detailed planting and pruning instructions for the care of each item ordered are enclosed with shipment.

With the main exception of Strawberries, Cannas, Dahlias and Gladiolus, we can ship all nursery stock in the fall for planting. Many items even in northern latitudes do just as well or better if planted in the fall than in the spring. They will be way ahead of the same stock planted in the spring. Our guarantee is behind every shipment, too, just as in the spring.

There are some fruits such as Peaches, Plums and Raspberries that should not be fall planted in north central states as Iowa. Otherwise we can make shipment of the best quality stock in the fall. If you order anything not suited for fall shipment we will refund your money or hold for spring shipment as you direct us.

## RHUBARB ASPARAGUS HORSE RADISH

Nature's best Spring tonic! Peps you up for the heavy Spring work. You can't beat Rhubarb for tasty, snappy sauce and pie. Good for canning, too!

### RHUBARB

Victoria— $\frac{1}{2}$ ". 5 @ 35c; 10 @ 50c; 25 @ 95c; 100 @ \$3.00, postpaid. McDonald Seedless. The best flavored Rhubarb you ever ate. Makes the finest sauce and pies—best for canning, too. The new Rhubarb that never goes to seed. Berry's send you strong divisions (part of a root with eyes) that quickly develop into big, strong, hardy plants. Each, 45c; 3 for \$1.15, postpaid.

### ASPARAGUS

The Washington rust proof strain—best flavored, heaviest cropper, and longest lived of any Asparagus.

Berry's offer your choice of two sizes—either will thrive for you and both are unusual values at our low prices. The heavier grade usually bears bigger crops, quicker.

## TALL HEDGES for Screens

Will Grow to  
4 ft. or Higher  
See Description

SEE PAGE 75 FOR LOW PRICES ON TREE SEED-  
LINGS FOR WINDBREAKS

These taller, rapid growing varieties are best for screens to conceal undesirable buildings, alleys, unsightly situations next door, etc. Where room is available, they are excellent for mass plantings or as background for Shrub borders, etc.

**HONEYSUCKLE—BUSH.** (12 to 15 ft.) One of the most attractive of the taller hedges. Perfectly hardy, vigorous grower—beautiful flowers followed by bright red berries. The ideal screen. Plant 2 to 3 ft. apart.

12 to 18 in.—10 for 95c; 25 for \$1.95; 100 for \$7.25.

**RUSSIAN MULBERRY.** A very useful variety at unusually low cost. Quick growing and absolutely hardy. Useful for both hedge or screen as it can be kept pruned down to 4 or 5 ft. (when planted 15 to 18 inches apart), or allowed to grow to 12 to 16 ft. high (when planted 3 to 5 ft. apart). Birds love the fruit, too.

12 to 18 in.—10 for 25c; 25 for 45c; 100 for \$1.20.

18 to 24 in.—10 for 29c; 25 for 59c; 100 for \$1.98.

**RUSSIAN OLIVE.** Another very useful, attractive, yet inexpensive variety. When planted 15 to 18 inches apart, it makes a good tight, silvery grey hedge, kept pruned down to 4 to 6 ft. high. For effective screen, plant it 3 to 5 ft. apart and it will grow 15 to 18 ft. tall.

12 to 18 in.—10 for 45c; 25 for 90c; 100 for \$3.15.

18 to 24 in.—10 for 60c; 25 for \$1.15; 100 for \$3.75.

## TRIMMED and NATURAL LOW HEDGES

**IMPORTANT.** Your Hedge will never be tight, close to the ground unless you prune it severely immediately after planting. Always prune off at least ½ of the top branches. Smaller sizes should be left only about 4 to 6 inches taller than ground—larger sizes about 10 to 12 in.

**PRIVET—AMOR RIVER NORTH.** Most popular Hedge plant—Hardy Russian Privet. Dense, glossy green foliage on numerous upstanding branches. Can be kept pruned down to a thick Hedge only 2 feet high or will grow over 4 feet if not pruned.

12 to 18 in.—10 for 55c; 25 for \$1.00; 100 for \$3.35.

18 to 24 in.—10 for 65c; 25 for \$1.30; 100 for \$4.75.

**PRIVET—CALIFORNIA.** Similar to Russian Privet except that it is not dependably hardy north of St. Louis. In mild climates, it is almost evergreen.

12 to 18 in.—10 for 50c; 25 for 90c; 100 for \$3.00.

18 to 24 in.—10 for 60c; 25 for \$1.15; 100 for \$3.75.

**BARBERRY—Red.** Like Japanese but with brilliant red foliage when planted in full sun.

12 to 18 in.—5 for 65c; 10 for \$1.20; 25 for \$2.50.

**SPIREA V. H.—BRIDAL WREATH.** One of the most beautiful Hedges—in the Spring, its graceful arching branches are a mass of lovely white bloom. Very hardy—grows 4 to 6 ft. high. Prune very severely when planted but, after the first year, prune out only the dead wood.

12 to 18 in.—10 for 60c; 25 for \$1.15; 100 for \$3.75.

18 to 24 in.—10 for 80c; 25 for \$1.60; 100 for \$6.15.

2 to 3 ft.—10 for \$1.00; 25 for \$2.15; 100 for \$7.75.

**BARBERRY—JAPANESE.** A very compact, dense growing, thorny, protective Hedge. Can be kept pruned to 2 feet or allowed to grow to 4 feet. In Fall, the leaves turn red and bright red berries appear.

12 to 15 in.—10, 55c; 25, \$1.00; 100, \$3.35.

15 to 18 in.—10, 65c; 25, 1.30; 100, 4.75.

**CARAGANA.** Best ornamental Hedge for severe northern climates. Strong, upright, growing, thornless branches with dense foliage and yellow blossoms insure a beautiful hedge. Keep pruned from 3 to 6 feet or you may let it grow higher.

12 to 18 in.—10, 35c; 25, 70c; 100, \$2.25.

18 to 24 in.—10, 45c; 25, 90c; 100, 3.15.

**LOMBARDY POPLAR.** These tall, fast growing, slender trees with many upright branches growing right to the ground, are excellent for sentinel trees, tall screens, windbreaks, etc. Being very narrow with upstanding branches, they are ideal for planting along driveways or where there is not sufficient room for wide-spreading trees. Berry's prices are unusually low.

2/3'—10, \$0.85; 25, \$1.75; 100, \$6.35.

3/4'—10, 1.15; 25, 2.50; 100, 8.25.

**CHINESE ELM.** One of the fastest growing, longer lived trees. Absolutely hardy, drouth resistant, and desirable in every way. If not pruned, branches start from ground like a shrub making an extra tight windbreak. Keeps your buildings cooler in summer—warmer in winter. Take advantage of our new low prices—order now!

2/3'—10, 40c; 25, 75c; 100, \$2.50.

3/4'—10, 80c; 25, \$1.50; 100, \$5.00.

## VINES

### Strong 2 Yr. Plants for Rapid Vigorous Growth

Vines with their luxuriant foliage and lovely blooms relieve the monotony of bare walls and give quick shade on porches and arbors.

These 2 varieties postpaid, 2 for 50c; 6 for \$1.25.

**BOSTON IVY.** Best clinging vine for brick, stone, cement or stucco.

**ENGELMANN IVY.** Best for quick results. Does not cling so tight as Boston Ivy.

### For Trellis, Arbors, Porches, etc.

**HONEYSUCKLE—Scarlet Trumpet.** A strong growing vine with bright red, trumpet-shaped flowers. 2 for 50c; 6 for \$1.25.

**ORIENTAL BITTERSWEET.** Better than the American because it produces many more lovely red berries for winter bouquets. A sex plant that requires cross-pollination—always plant from 4 to 6 nearby. 2 for 50c; 6 for \$1.25.

**HONEYSUCKLE—Hall's Japan.** A very hardy, rapid growing vine covered with creamy white flowers in season. Fine for porch, arbor or fence. Best vine for ground cover in shady places, on steep banks or terraces. 2 for 50c; 6 for \$1.25.

**CLEMATIS—Paniculata.** The hardy, vigorous growing Japanese Clematis. Covered with fragrant flowers in late summer and fall. 2 for 50c; 6 for \$1.25.

### Some Vines of Special Beauty

**SILVER LACE VINE.** The fastest growing, most beautiful hardy vine. Often grows 20 ft. per year. Glossy green foliage covered with snowy white flowers. 2 for 50c; 6 for \$1.25.

**CLEMATIS JACKMANI—Purple.** A beautiful perennial vine with its mass of large, rich, purple bloom. Considered the most beautiful vine for trellis. Requires protection in severe climates. Each, 59c; 2 for \$1.00.

**CLEMATIS—MME. E. ANDRE.** Like Jackmani except that the lovely bloom is velvety red. Each, 59c; 2 for \$1.00.

**WISTERIA—Purple.** The most magnificent of all vines—lasting for generations and increasing in beauty each year. Long clusters of lilac flowers in summer. Requires some protection in severe climates. Each, 35c; 3 for 95c.

**DUTCHMAN'S PIPE.** That interesting old fashioned, rapid growing vine with the large broad leaves and the yellowish-green flowers that resemble a Dutchman's pipe. Excellent for trellis or arbor. Each, 75c; 2 for \$1.35.

**MADEIRA VINE.** An old fashioned vine, covering a large space in a very short time. Heart-shaped leaves and feathery white fragrant flowers. Not hardy—dig up in late Fall and store like Gladiolus. 4 for 25c; 10 for 50c.

# EVERBLOOMING ROSES

# 29¢ EACH

**4 for \$1.00**  
**10 for \$2.35**

**POSTPAID**  
**NOT SENT C.O.D.**  
**BABY RAMBLERS**

(Dwarf Polyantha)

Excellent for Porch Boxes, Urns, Cemeteries, House Plants, and for low hedges, edging, protection for evergreens, etc.

**CRIMSON BABY RAMBLER**  
—Bright red bloom all summer. Vigorous and hardy.

**GOLDEN SALMON**—Gorgeous red salmon, overlaid with orange and gold. Striking. Vigorous.

**GRUSS AN AACHEN**. The little "Sweetheart Rose" of flesh pink salmon and yellow. Fragrant. Extra double, unusually hardy, vigorous and free blooming.

**No. 670 BABY ROSE GARDEN**. 1 each of above 3 @ 70c.

## OLD FASHIONED ROSES

Those lovely old varieties that grow so well and bloom for years with very little care. Extra hardy and disease resistant.

**PAUL NEYRON**. Largest, bright Pink Rose. An old favorite of great merit. Very fragrant, extra hardy and vigorous. Best pink for severe climates.

**AMELIA**. Large carmine red, fragrant blooms in great profusion. It's a beauty—and so hardy!

**F. J. GROOTENDORST**—The best Hybrid Rugosa. Clusters of vivid red Roses, in great profusion, until frost, if dead blooms are kept pruned off. Best for mass plantings, hedges, etc.

**HARRISON'S YELLOW**—The old fashioned hardy yellow, double, fragrant Rose blooming in May. In older gardens everywhere. An old favorite of unusual merit.

**No. 671 OLD FASHIONED ROSE GARDEN**. 1 each of above 4 @ 90c.

## Hardy CLIMBERS

At Berry's low prices, you can afford to plant the beautiful climbing roses you have been wanting.

**PAUL'S SCARLET**—Blazing red, double blossoms in masses. Vigorous, hardy, free blooming. No better Climbing Roses can be had at any price. Plant on Trellis, Arbor or along the fence.

**CL. AMERICAN BEAUTY**—Rose-red. Large, fragrant, very hardy. Free bloomer.

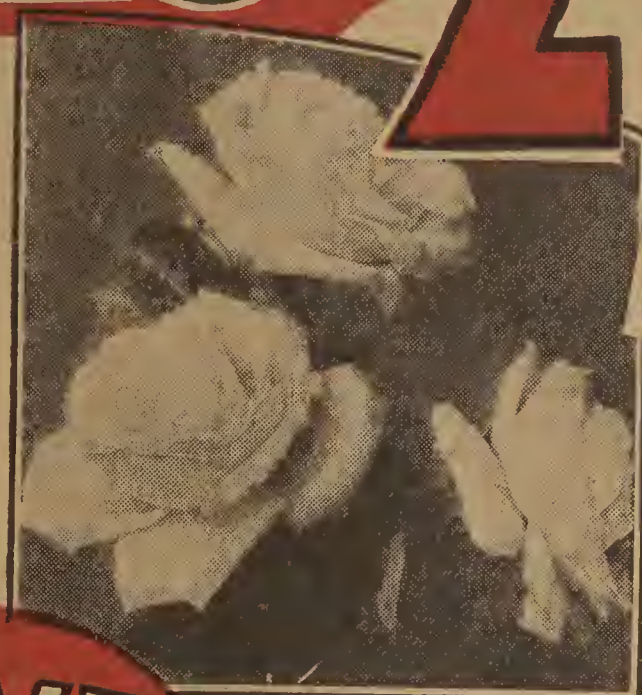

**CRIMSON RAMBLER**—Red. Clusters of bright red. Strongest vine.

**No. 672 ALL RED CLIMBERS**. 1 each of above 3 @ 59c.

**DR. VAN FLEET**—Full double large flowers. Color flesh pink. Very fragrant. Bronze foliage.

**PRIMROSE**. One of the better double, yellow climbers. Hardy, free flowering, desirable.

**No. 673 ROSE ARBOR**. 1 each of above 5 @ \$1.00.

**SAVE MONEY**  
**HIGHEST QUALITY**  
**LOWEST PRICES**  
**FREE OFFER**  
**Page 65**

## YELLOW

**GOLDEN DAWN**—A new yellow that is a sensation. Free bloomer. Large, very fragrant, long lasting flowers.

**MRS. E. P. THOM**—Best yellow for outdoor gardens. Clear yellow blooms on strong stems. Strong, vigorous, free blooming and disease resistant.

**MRS. P. S. DUPONT**—Golden Yellow. Winner of more Gold Medals for outdoor blooms than any other Rose. Strong, vigorous, free blooming. The best.

**APRICOT QUEEN**. A lovely new Spanish rose. A unique blend of Apricot orange and dark pink opening to coppery apricot. Fragrant. Vigorous. Free flowering.

## TWO-TONE

**EDITH NELLIE PERKINS**—Exquisite. Long pointed buds. Perfect flowers. Salmon petals blending with an over-spread of gold.

**TALISMAN**—Richly colored yellow and copper tinged red. Very lasting and extremely fragrant.

**PRESIDENT H. HOOVER**—Best two-tone for outdoor gardens! Unusual combination of scarlet-yellow, cerise-pink, and flame. Sweetly fragrant. Long strong stems. Vigorous, disease resistant.

**CONDESSA DE SASTAGO**. Another delightful new Spanish Rose. Oriental red with golden yellow underneath. Unusually vigorous, disease resistant and free flowering. One of the best.

**WHITE FRAU K. DRUSCHKI, H. P.**—Hardest white—blooms all summer. Very vigorous. Extra large, double snow-white bloom.

**MME. JULES BOUCHE**. Considered the finest pure white rose but not as hardy as Frau Druschki. Lovely bud and bloom on long, strong stem.

## AMERICA'S "10 BEST" ROSES

Selected by rosarians affiliated with the American Rose Society as being the 10 best Roses for the average amateur gardener. Chosen for vigorous growth, rich coloring, disease resistant qualities, and production of lovely blooms. Berry's are happy to offer these outstanding groups to you at such low prices. The varieties are described on this page.

**Mme. Jules Bouche**—White.  
**Editor McFarland**—Rich Pink.  
**President Hoover**—Twotone.  
**Mrs. P. S. Dupont**—Yellow and Gold.

**Mrs. E. P. Thom**—Large Yellow.  
**Charles K. Douglas**—Vivid Red.  
**No. 674** One each of above 6 @ \$1.39.

**Pink Radiance**—Silvery Pink.  
**Golden Dawn**—Rich Yellow.  
**Etoile de Hollande**—Best Red.  
**Edith N. Perkins**—Pine and Rose.  
**No. 675** One each of above 4 @ \$0.95.

**No. 676** One each of above 10 @ \$2.20.

**PINK RADIANCE PINK**—Universally popular! Best and Hardest Pink H. T. for inexperienced gardeners. Rose Pink with true rose fragrance. Strong—blooms freely.

**EDITOR MCFARLAND**—Rated one of America's Best 10. Deep, brilliant Pink, fragrant blooms on long, strong stems. Vigorous, free bloomer.

**DAME EDITH HELEN**—Extra large, extra double, extra fragrant, vivid Pink blooms. Bush is strong, healthy, disease-resistant.

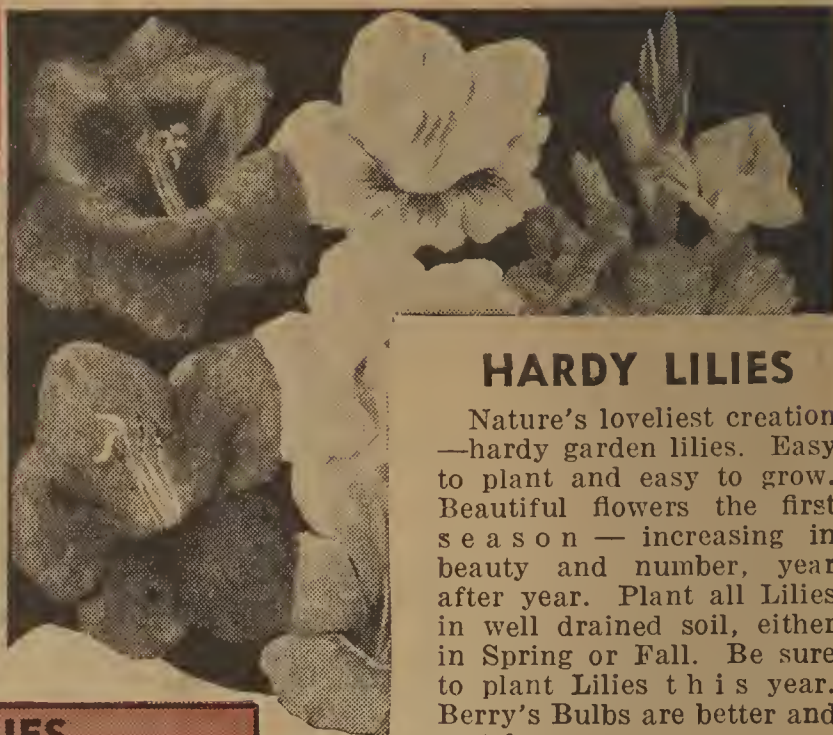

**MISS ROWENA THOM**. Extra large, sweetly fragrant rose pink with yellow at base. Vigorous and very free flowering.

# BULBS

Border Queen—lovely brilliant cerise.

Lady Ellen—Orchid with carmine eye.

Prime Minister—large white, red eye.

Rebecca—vivid rose-red.

Ruby Red—best brilliant red.

Your choice—2 for 49c; 4 for 90c; 6 for \$1.20.

No. 698—New Phlox Garden—1 each of above 6 Phlox for \$1.10.

**CUSHION MUMS**

The earliest blooming Chrysanthemums. Very hardy, vigorous, and sure to bloom before frost. It is not unusual for these varieties to produce hundreds of blooms on each plant, the first fall after planting.

Pink Cushion—Lovely silvery pink.

Bronze Cushion—Rich golden bronze.

Red Cushion—Brilliant red.

Your choice—2 for 49c; 4 for 90c; 6 for \$1.20.

No. 699—Early Mum Garden—2 each of above 3—6@ \$1.10.

**HARDY FERNS**

Just the thing for that shady, rather moist corner or for the Rock Garden, Porch Box, or Cemetery Urn.

Ostrich.

Maiden Hair.

Goldies.

Your choice, 2 for 45c; 6 for \$1.15.

No. 700—Fern Garden—2 each of above 3—6 for 95c.

**LILY OF THE VALLEY**

Another old favorite for moist, shady spots. Covered with dainty, creamy white flowers in Spring. Berry's send you a medium sized clump in dirt, that will quickly develop into a big clump.

2 for 45c; 6 for \$1.15.

**BABY'S BREATH—DOUBLE**

Bristol Fairy Gypsophila. A strong growing plant that produces clouds of small double flowers for a long season. Excellent as filler in bouquets and when dried for winter bouquets. New and very desirable.

Each, 39c; 3 for \$1.00.

**SURPRISE PERENNIAL GARDEN**

No. 701

12 fine plants for \$1.00.

Two each of 6 free blooming varieties that will give you flowers from late spring until fall. Plants are our selection and not labelled.

Shipped  
C.O.D.**SHRUBS**

Berry's prices are lowest on highest quality Shrubs. All Northern grown, transplanted, root pruned and cut back. Sturdy 2 or 3 year old Shrubs that are sure to grow extra well if planted and pruned according to our Planting Guide sent with each order.

Hydrangea, P. G.

**NOTE:** Figures after shrub name indicate height at maturity. Most shrubs can be pruned lower as desired.

All shrubs are "Postpaid." Size, strong 18/24 inches high except where specified. Height at maturity is given after name—most Shrubs can be kept lower by pruning.

We do not ship Shrubs, or other Nursery Stock, into states of ARIZONA, NEVADA, IDAHO, WASHINGTON, OREGON, CALIFORNIA or FLORIDA.

**ALTHEA**

5-6 ft. A lovely fall flowering shrub—thrives in moderate climate. Strong, upright grower. Choice Red, Pink or Purple.

**BARBERRY**

Japanese. 3-4 ft. Very useful, hardy shrub for foundation, border or corner planting. Thrives anywhere—sun or shade. Small plants for hedges on page 66. 15/18".

**BUTTERFLY BUSH**

3-4 ft. Beautiful spikes of fragrant, lilac-purple flowers in late summer. This really is a Perennial and, in severe climates, the top branches kill off each winter, but the hardy roots send up strong branches each Spring. Very desirable.

**DOGWOOD**

Red Twigged. 5-6 ft. Very hardy and vigorous. Succeeds anywhere. Spreading habit. Desired for its brilliant red branches in winter.

**ELDER**

Golden. 5-8 ft. Big, broad bright yellow leaves. For color contrast as specimen or in groups. Hardy, vigorous, desirable. 12/18".

**FORSYTHIA**

Golden Bell. 6-8 ft. Upright branches covered with brilliant yellow flowers before the leaves. A very useful, hardy, strong growing shrub—we recommend it.

**HONEYSUCKLE**

Bush. 12-15 ft. Best for background or screen planting, tall hedges (see page 66), etc. If pruned severely, excellent for foundations. Very vigorous, hardy and useful. Pink.

**NO. 700—8 FLOWERING SHRUBS—\$1.00**

Extra special value in smaller, hardy shrubs that will grow into big bushes covered with lovely blooms in season. Requires more care than the bigger huskier shrubs described above but still a great bargain.

White Bridal Wreath—18/24".

Pink Tamarix—18/24".

Red Spirea—12/18".

Pink Weigela—12/18".

Yellow Forsythia—12/18".

White Mock Orange—12/18".

Red Jap. Quince—12/18".

Purple Lilac—12/18".

**BUDDLEIA—FORTUNE****75c each; 3 for \$1.95**

Plant Patent No. 206

A gorgeous new Butterfly bush producing many spikes of pure lilac with brilliant orange eye, all summer. Many Florists consider it the best outdoor cut flower.

**LILAC**

Old Fashioned. 8-12 ft. Our Grandmothers' favorite! Loads of lovely, fragrant lilac bloom. Hardy.

Persian Purple. 6-8 ft. Handsome foliage and striking reddish-purple bloom in Spring. Hardy and vigorous—blooms young.

**QUINCE**

Japanese Flowering. 3-4 ft. Brilliant orange scarlet blooms with first leaves, early spring. Glossy, dark green foliage. Hardy and vigorous. Spreading habit, excellent for foundation planting.

**SNOWBERRY**

3-5 ft. Superior for shade—thrives anywhere without care. Graceful arching branches loaded with attractive berries in Fall. Very useful. White.

**SYRINGA**

Mock Orange. 6-8 ft. Old favorite! Large, sweet scented white flowers in late Spring. Very useful and hardy.

Virginal. 4-6 ft. The newest and best Mock Orange. Unusually large, double, very fragrant white flowers in June and all summer. Hardy anywhere. Extra good! 12/18".

**WEIGELA**

Rosea. 5-7 ft. A stalwart, upright, hardy shrub of great value. Lovely pink bell-shaped flowers in May and June.

**TAMARIX**

African. Graceful arching branches with feathery rich green foliage. Dainty pink flowers in early Spring. Green or blue foliage.

**SPECIAL  
SHRUBS****37c Each 3 for 95c**

Grade 18/24" except as specified

**SNOWBALL**—Old fashioned. 6-10 ft. Another old favorite that thrives anywhere. Loaded with pure white flower balls in early summer.

**WEIGELA**—Eva Rathke. Brilliant red bloom in great profusion for several weeks. Rather dwarf in habit. A delightful shrub. 15/18".

**BUTTERFLY BUSH**—He de France. 2 yr. Medium. Most beautiful late summer blooming, Perennial Shrub. Striking spikes of rich, fragrant, wine-red flowers from August until frost. Top branches kill back to ground each Fall, in severe climates, but root is hardy—strong new branches grow and bloom each year.

**ALMOND**—Double Pink Flowering. 4'. In early spring a mass flowers. The beauty spot in any garden.

**HIGHBUSH CRANBERRY** (Viburnum). Strong grower. Hardy. Somewhat spreading. Has heavy crop of red berries in fall. 15/18".

**PURPLE LEAF PLUM**—Distinctive reddish purple foliage. Makes tall dense hedge or may be grown as an ornamental tree. 15/18".

**ROSE TREE OF CHINA** (Prunus Triloba)—One of the most beautiful hardy Shrubs. Completely covered with rose like, double pink flowers in early Spring. Similar bloom to Almond but bush more vigorous and hardy.

**BARBERRY**—Red Leaved. Like Japanese but with brilliant red foliage when planted in full sun. 12/18".

**SPECIAL OFFER—HYDRANGEA  
18/24" GRADE****32c each; 3 for 85c; 6 for \$1.65.**

Hydrangea—Pee Gee. Magnificent large conical shaped white bloom in summer, with pinkish cast in fall. Thrives anywhere—very popular.

Hydrangea—Hills of Snow. Best shrub for shade—thrives anywhere. Masses of large round white bloom in early summer. Very good!

# America's Favorites SPIREA FAMILY

**2 for 42c 6 for \$1.15 10 for \$1.75**

America's most popular family of Shrubs! Spireas succeed anywhere, are absolutely hardy, drought resistant and bloom freely, even under adverse conditions. If sheared, some varieties will bloom 2 or 3 times each season. Strong, transplanted shrubs—sizes as indicated below.

**BRIDAL WREATH.** 5-6 ft. Our best seller. Graceful, arching branches loaded with dainty white flowers. Big 2-3 ft. size.

**FROEBEL.** Semi-dwarf. 3-5 ft. Vigorous, spreading habit. Rose-pink bloom. Beautiful purplish red foliage in Fall. 18/24" size.

**ANTHONY WATERER.** Dwarf. 2-3 ft. Bright red flowers all summer. Very useful dwarf. 12/15".

**BILLIARDI.** 4-6 ft. One of the better flowering shrubs. Countless spikes of pink flowers all summer. 2-3 ft. size.

**THUNBERGI.** 3-5 ft. Countless white blossoms on graceful, arching branches with first leaves. 18/24" size.

**ARGUTA—Snow Garland Spirea.** Slender, upright growing Shrub covered with snowy blossoms in Spring. Earliest blooming Spirea. 2/3 ft.

## LOMBARDY POPLARS

**10 for 85c**

2 to 3 ft. tall, lightly branched but these sturdy little trees quickly grow into a tall, slender upright tree for screens, windbreaks or Sentinel Trees.

## HANSEN BUSH CHERRY

Bears fruit in one year. Dwarf Grower—Absolutely hardy.

2 ft. size—2 for 49c; 6 for \$1.00, Postpaid.

A dwarf growing, highly ornamental, hardy shrub. Introduced last year by Prof. Hansen of South Dakota it is used widely for making jams and jellies. Fruit is good to eat and it will bear by second year.

For a low bushy fruiting hedge plant 18 to 24 inches apart. In the garden or orchard plant 3 ft. apart. Try it this year at Berry's low prices.

# TREES

Trees larger than 4/5 ft. are usually too large to mail and must be sent by Pre-paid Express. If your Post Office address is not your shipping point, please be sure to give name of nearest Express Station. All Prices Prepaid.

## SHADE TREES

**ELM—AMERICAN.** The best all-around Shade Tree. Hardy, rapid growing, yet long lived. Cheapest to plant, easiest to grow, best in every way. Plant the large size for quick shade.

6-8 ft.—Each 79c; 4 for \$2.85.

8-10 ft.—Each \$1.00; 2 for \$1.85.

**ELM—CHINESE.** The new extra fast growing Manchurian Elm. An improved type that's better.

4-5 ft.—Each, 49c; 4 for \$1.75.

5-6 ft.—Each 49c; 4 for \$1.75.

6-8 ft.—Each 85c; 2 for \$1.55.

**SPECIAL NO. 666 CHINESE ELM.** Extra heavy 3 year seedlings, not transplanted but well rooted and branched. Not shipped after May 10th.

4-5 ft.—2 for 39c; 6 for \$1.00.

**MAPLE—SOFT or SILVER.** One of the best rapid growing shade trees. Perfectly hardy.

5-6 ft.—Each 55c; 4 for \$2.00.

**LINDEN—AMERICAN.** A fine shaped, very fast growing shade tree for moderate climates.

6-8 ft.—Each \$1.25; 2 for \$2.35.

**BIRCH—CUT LEAF WEEPING.** One of America's most beautiful trees with its flashing white bark and graceful, drooping branches. Usually, the bark on these small trees is not white but turns white in a couple of years. Perfectly hardy, but not recommended in hot, dry climates. Not shipped after May 1st.

5-6 ft.—Each \$2.25; 2 for \$4.25.

**WILLOW—NIOBE WEEPING.** A beautiful, hardy, weeping tree with yellow bark and graceful branchlets. Fast growing and thrives anywhere. Not shipped after May 1st.

5-6 ft.—Each 65c; 2 for \$1.15.

6-8 ft.—Each 90c; 2 for \$1.65.

**POPLAR—LOMBARDY.** Stately sentinel trees from Italy. Upright growing branches start at ground. Very valuable for windbreak, or screen to hide unsightly buildings, or for accent trees in well designed plantings. Hardy and very fast growing.

6-8 ft.—Each 40c; 4 for \$1.45.

8-10 ft.—Each 55c; 4 for \$1.95.

## Lombardy Poplar Special

Strong 4/5 ft. lightly branched trees. Not transplanted but they will soon grow into big trees.

No. 716—5 for 85c; 10 for \$1.50.

**POPLAR—NORWAY.** Not as long lived as the Elms but strongly recommended for severe climates. Very hardy, stand drouth and thrives anywhere regardless of climatic or soil conditions.

6/8 ft.—Each 45c; 4 for \$1.65.

8/10 ft.—Each 60c; 4 for \$2.15.

**ASH—GREEN.** A well shaped, rapid growing yet long lived shade tree that thrives in all climates and all soils.

5/6 ft.—Each 70c; 2 for \$1.25.

6/8 ft.—Each 85c; 2 for \$1.55.

## ORNAMENTAL TREES

**MOUNTAIN ASH—EUROPEAN.** Very valuable small ornamental tree with attractive foliage and large clusters of bright orange-red berries in early fall. Thrives everywhere. The trees we send at this low price are not well branched but will quickly develop plenty of branches.

5/6 ft.—Each \$1.35; 2 for \$2.55.

**CRAB—JAPANESE RED FLOWERING.** 18-22 ft. America's hardiest and most beautiful flowering tree. A mass of bright rose colored bloom in Spring. Heavy crop of edible red crabs for good jelly. Extra good!

3/4 ft.—Each 55c; 2 for \$1.00.

**RED BUD.** Also known as Judas tree. Covered with beautiful rose-pink flowers in early spring. Highly recommended in moderate climates.

3/4 ft.—Each 60c; 2 for \$1.10.

# GRAPES

## THE EASY MONEY CROP

### 2 EXTRA VALUE GRADES

**HOME SIZE.** Big, strong, extra well rooted, 2 year No. 1 Vines for Rapid growth and quicker crops. No better vines can be secured at any price.

**COMMERCIAL SIZE.** These good 1 year No. 1 Vines are sometimes preferred for large vineyard plantings. Not as big and strong as our 2 year No. 1 Vines, but extra value at Berry's new low prices.

**AGAWAM.** Late, dark red of excellent quality. Vines are vigorous, hardy and good bearers. Fruit can be kept several weeks after picking.

**CONCORD.** The best commercial grape for the Middle West. Vines vigorous, extremely hardy and dependable bearers of large crops of big, blue-black fruit.

**BETA.** The hardiest of all grapes—consistent bearer of juicy black fruit for jelly, juice or wine. Rich, full flavored but rather tart for table use. Fine for Arbors.

**MOORE'S EARLY.** Earlier

than Concord. This large blue-black full flavored grape brings premium prices on any market.

**NIAGARA.** Enormous bunches of large greenish-white, sweetly flavored fruit. Best white for market—good shipper. Requires some protection in severe climates.

**WORDEN.** Extra high quality blue grape of Concord type but clusters are often larger and the berries sweeter and of finer quality. Extremely hardy and productive. Ripens between Concord and Moore's Early.

## GOOSEBERRIES CURRANTS

**IMPORTANT.** If you live in the following States, please send us the legal description of land (taken from your Tax Receipt), where you will plant the Gooseberries and Currants you order—Michigan, Minnesota, Ohio, Wisconsin, New York, Pennsylvania, or New England States.

The Federal Government requires us to secure a Special Permit to ship Gooseberries or Currants into parts of the above States where White Pine Blister Rust Control Areas are established. There is no charge for this service but we must have this Legal Description of your land to secure the Permit for you.

**These 2 Gooseberries Prepaid**

	2	6	10
2 year .....	\$0.49	\$1.25	\$1.90

**HOUGHTON.** Mildly acid. Heavy bearer each year. Very vigorous and hardy.

**CHAMPION.** Good commercial variety. Strong, hardy, fewer thorns. Good for pies and canning. Color green.

**These 2 Varieties Prepaid**

	2	6	10
2 year .....	\$0.59	\$1.55	\$2.35
1 year .....	.49	1.25	1.90

**DOWNING.** Very large, light green, juicy berries of extra quality. Strong, vigorous, hardy. Commercial variety.

**JOSSELYN.** Larger sized, prolific and hardy. Best quality red berries. Resists mildew. Recommended.

Delicious for pies, sauce, jelly or canning. Lots of fruit with no work. Extremely hardy, bear every year—disease resistant and long lived. Require very little room in the garden.

Our Gooseberries and Currants are Federal and State inspected and absolutely free from disease. Sturdy, well rooted 2 year No. 1 plants that are sure to thrive and bear quickly for you.

#### CURRANTS All Prepaid

2 yr. No. 1. 2 @ 49c; 6 @ \$1.25; 10 @ \$1.90

**PERFECTION.** Largest of the reds. Long stems. Beautiful bright red berries. Favorite commercial variety.

**WILDER.** Large, well filled bunches of moderately acid, red berries. Very heavy, dependable cropper.

**FAY'S PROLIFIC.** A favorite in many localities. Long easily picked clusters of dark red, juicy, full flavored berries.

**CHERRY.** The old fashioned big red currant. Juicy, rich flavored. Very Good.

#### TART BERRY GARDEN

No. 721. 6 plants 85c, postpaid

No garden is complete without Gooseberries and Currants. Prime favorites for pies, sauce, jelly and preserves. Berry's offer a choice selection of varieties, in the 1 year No. 1 size, at a new low price.

FOR BLACKBERRIES SEE PAGE 74  
PAGE 77 FOR RASPBERRIES

# FRUIT TREES

# The BIG MONEY CROP

## PROFIT IN FRUITS

There are big profits in Fruits for Home use and Commercial Markets. Cash Profits from their sale and "health" profits for the family. Over a period of years, you make more money per acre from Fruit than from 2 to 4 acres in any other farm crop—more profit with less work.

Plant an Orchard this year. Government Reports indicate that the older Orchards are aging rapidly and have not been replanted. Some Fruits may be plentiful now but by the time a new Orchard is in bearing, Fruits will be scarce and high priced.

Consult your County Agent or State Experiment Station. Study their recommendations about varieties, pollination, air drainage, soils, etc., then order from Berry's. Many fruits thrive on less fertile or hilly ground that can not be profitably farmed. Investigate now for future profits! Write us for further information.

We can also quote low prices on large quantities of other varieties not listed here. Send us your variety list and quantities desired.

## BERRY QUALITY

Our nursery business is built on a firm foundation—we make no extravagant claims, no "wild" statements—just honest descriptions. You can buy with confidence from Berrys—See our guarantee page 65.

**QUICK-CROP SIZE.** 5 to 6 ft. tall— $1\frac{1}{16}$  to 1 inch diameter—extra heavily branched and well rooted. Plant this size for quicker crops—best results.

**HOME ORCHARD SIZE.** Strong  $\frac{9}{16}$  to  $1\frac{1}{16}$  inch diameter—4 to 5 ft. tall. Very well branched and well rooted.

**COMMERCIAL SIZE.** Being lower priced, usually preferred for large Orchard planting. 3 to 4 ft. tall,  $\frac{7}{16}$  to  $\frac{9}{16}$  inch diameter. Extra value at Berry's lowest prices in years.

**ECONOMY GRADE.** In Peach Trees, we offer this smaller size—2 to 3 ft. tall,  $\frac{5}{16}$  inch caliper (diameter), lightly branched trees. With extra care, these little Peach Trees will rapidly grow into good trees. Recommended for larger Orchards in warm climates.

NURSERY STOCK NOT SHIPPED TO OREGON, WASHINGTON, IDAHO, CALIFORNIA, NEVADA, ARIZONA OR FLORIDA

2-3 ft. only  
**14¢**  
EACH  
in quantities of 25

## PEACH

Peach Trees should be planted early in the Spring and not in the Fall. We do not ship Peach trees after May 10th.

ALL PRICES PREPAID—SEE SIZE DESCRIPTION ABOVE

**CHAMPION.** Hardest Peach. Large, creamy white with red cheek. Freestone. Very high quality—juicy and sweet. Tree vigorous and thrifty.

**ROCHESTER.** Hardy, large, yellow, rich flavored freestone. Good shipper and keeper. 2 weeks earlier than Elberta.

**J. H. HALE.** Earlier and larger than Elberta. Unusually fine flavor. Good yellow with red blush. Good keeper. Requires cross-pollination—plant with other varieties.

**ELBERTA.** Best known freestone, commercial variety. Yellow with reddish cheek. Excellent for eating or canning.

**BELLE OF GEORGIA.** Mid season. Rich, creamy color tinted with a bright red blush. Fully a week earlier than the Elberta. Good for shipping or home use.

**GOLDEN JUBILEE.** Yellow freestone, firm, juicy, full flavored. Ripens 15 to 20 days earlier than Elberta. New and very good.

**CRAWFORD LATE.** Yellow freestone, medium size, good quality. Ten days later than Elberta.

**HALEHAVEN.** Newest and best early freestone. Strong, thrifty grower, very hardy—heavy bearer of exceptionally fine flavored yellow peaches.

**EARLY ELBERTA.** Excellent early, commercial peach. Yellow. Freestone. Richer flavor than Elberta. Very good.

**HEATH CLING.** An old favorite for pickling or canning. White. Late.

**POLLY.** Originated in Iowa and considered the hardest peach. Yellow freestone of good quality. Tree vigorous and hardy and productive. Midseason.

### IDEAL PEACH ORCHARD

**8 Trees for \$1.65** Ideal for the Home Orchard in any climate where Peaches thrive. Carefully selected for hardiness, long bearing season and cross pollination. 8 sturdy, well branched, well rooted  $\frac{3}{4}$  ft. Trees.  
2 each Champion and Elberta.  
1 each Golden Jubilee, Halehaven, Rochester and J. H. Hale.

**8 TREES FOR \$1.65**

### ECONOMY PEACH ORCHARD

**12 Trees for \$1.39** 12 healthy, one year trees about 2 ft. high. Not well branched but sure to grow into fine trees with extra care. Choice selection of varieties for the all-purpose Home Orchard.  
4 Elberta.  
2 Each Champion and J. H. Hale.  
1 Each Early Elberta, Halehaven, Heath Cling and South Haven.

**12 TREES FOR \$1.39**

## PEAR

Pears are easily grown in any climate where any fruit thrives. Most varieties require cross-pollination so be sure to plant at least two different varieties.

### PEAR PRICES

	Each	4	10	25
5 to 6 ft.— $1\frac{1}{16}$ " up.....	\$0.65	\$2.35	\$5.45	\$13.15

3 to 4 ft.— $\frac{7}{16}$ " to $\frac{9}{16}$ ".....	.45	1.65	3.60	8.45

**DOUGLAS.** Best for Middle West. Vigorous and hardy. Often bears second year. Considered blight proof. Fruit large, golden yellow with blush. Fine texture and flavor for eating or canning. Good keeper.

**SECKEL (Sugar Pear).** Medium sized fruit. Very sweet and spicy. Hardy blight resistant. A young and heavy bearer.

**BARTLETT.** Favorite commercial variety. Heavy bearer of large, juicy, high flavored fruit. Strong growing tree—fairly hardy. Best for eating or canning.

**KIEFFER.** Large, golden yellow, meaty pear for canning. Tree, extra hardy, blight resistant, and bears young. Good pollinator. Fruit should be picked green and ripened in cool, dark place.

**DUCHESS.** Extra large, dull, greenish yellow overlaid russet. Midseason. Blight resistant. Heavy yielder, good pollinator. Fruit excellent for canning—not as good fresh as Bartlett.

**MENDEL.** The hardest of all Pears originated in Minnesota. Tree vigorous, hardy and free from blight. Produces large crops of good sized, bitter flavored fruit. Excellent for canning, fair for eating fresh.

### HOME PEAR ORCHARD

**4 Trees for \$1.39**

A choice selection for all purposes—eating, canning or pickles. Chosen with proper pollinators to insure consistently heavy crops. One each of the following in the  $\frac{3}{4}$  ft.— $\frac{7}{16}$ " branched trees.

Bartlett Kieffer Douglas Seckel

## BOYSENBERRY

### Well Rooted, No. 1 Plants

The greatest Berry of them all! Produces amazingly large crops of richly flavored fruit often 1 to 1½ inches in length. Bears from 8 to 10 weeks under good conditions.

While this variety is too new for exhaustive tests, many authorities consider it more hardy than Blackberries. We recommend that it be protected in severe climates.

Undoubtedly, the best Berry ever produced—unequalled for juice, jelly, pies, canning and eating fresh. Lowest prices on well rooted tips that will thrive for you.

### Postpaid Prices

5 for 55c; 10 for 85c; 25 for \$1.95.

# WINDBREAKS

at **LOW COST**

## from SEEDLING TREES

### A MONEY MAKING INVESTMENT

For just a few dollars you can now plant several hundred Evergreen and Forest Tree seedlings; to protect your home, farm buildings, and feed lots, from sweeping winds in winter and summer. Windbreaks from these seedlings will greatly increase crop production from the protection given, also production of your livestock. Nearly every farm has some waste land that will grow all the fence posts you need, all the wood you can burn, and at the same time, prevent soil erosion and provide shelters for grazing livestock. A fine investment needed on every farm at such low cost.

### EVERGREEN SEEDLINGS

By following carefully the planting instructions given below you will obtain excellent results with the smallest of seedlings.

For further planting suggestions and windbreak ideas ask for our **free circular on Evergreens** giving a full description of all varieties also.

Berry's Evergreen Seedlings are grown in Northern Wisconsin on soil that develops a strong root system, and are shipped direct to you prepaid. They are carefully packed by experts and guaranteed to arrive in good condition.

#### PLANTING SUGGESTIONS

Evergreen seedlings should be planted in beds and cultivated like garden plants. Rows may be 18 to 24 inches apart with the Evergreens 10 to 15 inches apart in the row. Provide some shade for the first year. A covering of lath spaced about 1½ inches apart with slats running north and south is good. After about 2 years or when 18 to 24 inches high, transplant into permanent location.

##### NO. 750 WINDBREAK SPECIAL

**40** Seedlings **\$1.00** POSTPAID  
**EVERGREENS**

### Windbreak IDEAS

When double row planting and up to four or more rows are used; it is best to use a combination of species, rather than a single species. By using one species with a crown like the Scotch Pines, and one with a crown like the Norway Spruce, a more complete screen is formed from the ground up. The different spruces should be on the inside row, and the pines on the outside. For a three and four row windbreak, just add more rows of pines. The first two rows may be 14 to 16 feet apart, all further outside rows 20 feet. Other suggested three or more row windbreaks are: Douglas Fir inside row, Chinese Elms outside rows; or White Spruce inside with Chinese Elm for the outside rows.

### TREE SEEDLINGS

Our tree seedlings are better than ever before. Growing conditions have been excellent and these extra quality little trees are furnished you at new low prices.

We suggest planting all sizes of tree seedlings in rows where it is convenient to cultivate them often the first 2 or 3 years—rows about 36 inches apart with the seedlings 12 to 24 inches apart in the row—they grow more bushy when planted 24 inches apart. After 2 years, when the trees are well rooted and about 5 feet tall, transplant into permanent location.

# BERRY'S LAWN MIXTURES

## GENERAL CHOICE MIXTURE

This makes a fine smooth lawn in the northern half of the United States. Contains chiefly Blue Grass, Red Top, White Dutch Clover and Rye Grasses. The quicker growing grasses provide a nice green stand while the slower kinds are coming on. It is our most popular mixture, because it gives such wonderful satisfaction. Postpaid price: 1 lb., 25c; 3 lbs., 65c; 5 lbs., \$1.25; 10 lbs., \$2.25. A pound sows about 500 square feet.

## TERRACE MIXTURE

This mixture contains deep rooted grasses. They hold the soil firmly and resist drought. Select this for terraces and sloping places. Soil on terraces is often filled in dirt of low fertility. It will pay you to fertilize your ground well. You cannot have a nice lawn on poor soil. Postpaid price: 1 lb., 50c; 3 lbs., \$1.30; 5 lbs., \$1.90; 10 lbs., \$3.60. All seed is thoroughly cleaned and tested.

## SHADY-SPOT MIXTURE

This contains grasses naturally adapted to growing in shade, such as Poa Trivialis. Fine for grounds shaded by trees or buildings. In heavy shade a light application of lime in addition to fertilizer will improve results. This is a dandy mixture. Postpaid price: 1 lb., 45c; 3 lbs., \$1.20; 5 lbs., \$1.80; 10 lbs., \$3.25.

## WHITE DUTCH LAWN CLOVER

The small white clover so popular for lawns. This may be mixed with any lawn grass seed you have on hand or sown on an old lawn in the early spring. Very drought resistant. Helps soil fertility. Seed is very small. A pound sows 1,000 or more square feet, depending on how heavy percentage of clover is desired. Postpaid price: 1 lb., 75c; 3 lbs., \$2.00; 5 lbs., \$3.25; 10 lbs., \$6.00. See page 40 for larger quantities.

## SOUTHLAND MIXTURE

Contains grasses adapted to the south, including Bermuda Grass and Kentucky Blue Grass. Makes a beautiful lawn for such sections. We do not consider this hardy enough for our northern trade. Like all our lawn mixtures the seed has been cleaned, tested and guaranteed to satisfy. Postpaid price: 1 lb., 50c; 3 lbs., \$1.30; 5 lbs., \$1.90; 10 lbs., \$3.60.

# KENTUCKY BLUE GRASS for LAWNS and PASTURES

## For Pasture and Lawns. Stands lots of abuse.

Comes back strong even after protracted drought. Yields abundantly. Adapted to a wide range of soils and climate. Very palatable and nourishing pasture grass. Easy to grow. A seeding normally lasts for many years. Thin stands are not profitable in a pasture nor beautiful in a lawn. Top seed old pastures using about 10 lbs. per acre. A full seeding is 20 lbs. For lawns figure 1 lb. to 4 or 500 square feet.

We have some beautiful bright heavy seed this year priced at very attractive figures. See page 40 for quantity prices.

It is the kind of seed that will give you excellent assurance of success. Prices are very low considering high quality.

Small lots, postpaid, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.25.

## Pointers on Lawn and Pastures

Good seed is essential but in addition richer soil is required for luxuriant lawns and pastures. It will pay you well to top dress each year with well rotted manure or commercial fertilizers. Whenever you see rich heavy growth and few weeds you may be sure the land has been helped with some fertilizer. It pays to use it.

# STRAWBERRIES

## WAYZATA

### Best Flavored Everbearer

A delicious, large sized, firm fleshed berry. Very winter hardy. A phenomenal producer. Starts bearing in 90 days. Beautiful red color from top to tip. Genuine Wayzata plants are only grown in the North and can not be shipped until after about March 25th. Postpaid price, 25 for \$1.00; 50 for \$1.85; 100 for \$3.25; 300 for \$8.85.

Plant Strawberries early for best success. We do not recommend planting them after these dates.

South of Clarinda,  
April 20th to 25th  
North of Clarinda,  
May 1st to 5th

We do not ship plants in the fall.

## ALL STRAWBERRIES ARE POSTPAID EAST OF THE ROCKY MOUNTAINS

We do not ship Strawberries to Arizona, California, Oregon, Washington, Idaho, Nevada and Florida

### SURE CROP

#### BLAKEMORE

New, early market berry. Extra vigorous grower, heavy bearer, very drouth resistant, healthy and good plant maker. Recommended for Northern States. Mild flavor, beautiful color, early maturity. For market or home.

#### SENATOR DUNLAP

Old reliable favorite for home or market. Strong, extra hardy grower—heaviest yielder of big, solid, red berries. Mid-season.

Above 2 varieties postpaid.

	50	100	300	500	1000
Postpaid	50c	75c	\$1.75	\$2.65	\$4.95

### EVERBEARING

#### NEW GEM

A true everbearer with rich, full, sweet flavor. Fruit unusually large, extra firm. Highly recommended. Best plants—lowest prices!

#### GIANT MASTODON

The King of Everbearers. Extra large, extra heavy bearer, extra vigorous—the super strawberry. Starts bearing in 90 days. Big money maker. Berry's top grade.

Above 2 varieties postpaid.

	50	100	300	500	1000
Postpaid	75c	\$1.45	\$3.90	\$5.85	\$10.00

### THORO-BREDS

#### FAIRFAX

A new variety that is making thousands of friends. It wins because of its greatly superior flavor and astonishing yields. Has produced over 5000 quarts per acre. Large firm berries. Bright red color. Excellent shipper.

#### PREMIER

Famous for flavor and huge crops in any soil or climate. Berry's plants are true early strain—heavy bearers, big red berries.

Above 2 varieties postpaid.

	50	100	300	500	1000

# RASPBERRIES

#### INDIAN SUMMER

New Variety  
bears 2 crops—  
SUMMER  
and  
FALL!

#### CUMBERLAND—Black

The favorite commercial Black. Never fails to bear big crop of extra large, glossy black Raspberries. Strong plants for best results—low cost!

#### NEW LOGAN—Black

The "Ace" of Blacks! Yields more fruit, larger and firmer. Bush extra hardy, very vigorous—resists drouth and disease. The best Black! Top grade plants—lowest prices.

Above Varieties—Postpaid

Cumberland and New Logan—Tips

	10	25	100	300	500
	39c	79c	\$2.85	\$8.50	\$13.50

#### INDIAN SUMMER

A new, almost everbearing Raspberry, producing two good crops each season. First crop same time as Chief. Fall crop usually starts in September and lasts until frost. Fruit is extra large, red, firm and of excellent quality. Very hardy. No. 1 plants: 5 for 50c; 10 for 85c; 25 for \$1.85; 100 for \$6.50, postpaid.

#### NEWBURGH

A new Red Raspberry of great value to commercial growers. Ripens between Chief and Latham. Fruit more firm than either. Excellent flavor. Plant thrifty, hardy, and disease resistant. No. 1 Plants. 10 for 55c; 25 for \$1.15; 100 for \$4.00; 300 for \$11.00, postpaid.

#### CHIEF—Red

10 days earlier—highest market prices. Hardy, vigorous grower, heavy bearer—disease resistant. Best early red.

#### LATHAM—Red

Hardy—thrives in any climate. Largest, reddest, best flavored—very productive. Plant with Chief for long season.

#### ST. REGIS—Everbearing—Red

Bears 2 to 4 crops each year. Fruit good sized, firm, full flavored. Hardy, vigorous grower. Recommended for home gardens.

PLANT PLUMS THIS YEAR / BIGGER TREES-LOWER PRICES

EUROPEAN & JAP PLUMS

These well known varieties are not as well branched nor as hardy as Hardy American and Hybrid Plums and are not recommended for planting north of Clarinda. These are the best varieties and will thrive wherever European or Jap Plums can well be grown. Plums require cross-pollination—always plant at least two different varieties of the same group.

Table with 4 columns: SIZE, Ea., 4, 10. Rows for 3/4 ft. 7/16 to 9/16 in. caliper, 4/5 ft. 9/16 to 11/16 in. caliper, 5/7 ft. 11/16 up in. caliper.

VARIETIES

GERMAN PRUNE—EUROPEAN

A vigorous grower producing large crops. Large dark purple fruits, very juicy and sweet.

MONARCH

Large oval round, purplish-red fruit. Moderately sweet, firm, tender and juicy. Extra high quality. Good commercial variety. Hardy. Bears young. Late season. Very desirable.

BURBANK—JAPANESE

Tree strong and hardy. Fruit good size, bright cherry red, luscious flavored.

PLUMS 2 YEAR 3 to 4 Ft. POSTPAID 25¢ EACH in LOTS of 25 ~36¢ EACH in LOTS of 4

Plums are one of the easiest Fruits to grow. Big crops of luscious fruit to eat or can, in just a couple of years after planting. Government Reports show that the older Plum Orchards are not being replanted fast enough. This is the year to plant Plums. Our Nursery has a big crop of extra fine, big Trees at extra low prices—extra special values!

HARDY AMERICAN VARIETIES

All these vigorous varieties will grow well and bear big crops anywhere—the hardiest of all Fruits. For big crops every year, be sure to plant at least 2 different varieties for cross-pollination—the best pollinators are marked "P."

All Plum Prices Prepaid—Grades Same as Apple Page 79

### DESCRIPTION OF SIZES

**QUICK-CROP SIZE.** 5/6 ft. tall—11/16 to 1 inch diameter—extra heavily branched and well rooted. Plant this size for quicker crops—best results.

**HOME ORCHARD SIZE.** Strong 9/16 to 11/16 inch diameter—4/5 ft. tall. Very well branched and well rooted.

**COMMERCIAL SIZE.** Being lower priced, usually preferred for large Orchard planting. 3/4 ft. tall, 7/16 to 9/16 inch diameter. Extra value at Berry's lowest prices in years.

### MONEY CROP—WINTER APPLES

**DELICIOUS YELLOW.** Considered even better than Red Delicious. Superior in flavor, texture and keeping qualities. The very best golden apple.

**DELICIOUS EXTRA RED.** America's sweetheart! Supreme in flavor, texture and keeping qualities. Young bearing. Thrive anywhere.

**MCINTOSH.** Red. Extra hardy, strong, long lived tree. Fruit uniformly well shaped and colored. Juicy, full flavored. Especially recommended for Northern States.

**STAYMAN'S WINESAP.** The extra large, hardy Winesap. Fine for eating or cooking. Good keeper.

**ROME BEAUTY.** New red. Favorite commercial apple in Michigan and New York. Excellent keeper. Fine flavor—eating or cooking.

**NORTHWEST GREENING.** Keeps until Spring. Excellent for eating or cooking after Xmas. Tree—hardy, bears young.

**JONATHAN.** Most profitable apple for Middle West. Heavy, consistent bearer of rich, juicy, tart, good keeping apples.

**NORTHERN SPY.** Large, tender delicious fruits. Bright red color suffused with a delicate bloom. Very popular.

**GRIMES GOLDEN.** (Not recommended in severe climates.) Distinctive in flavor and texture. America's favorite yellow apple for home or orchard planting.

**CORTLAND.** Has the tang of Jonathan, the richness of Delicious, and the hardness of McIntosh. Vigorous, young bearing. A superb apple.

### CRAB APPLES

**WHITNEY.** A wonderful large early Crab for eating, canning or pickling. Tree very hardy, bears very young.

**DOLGO.** A new, extra hardy, rich red crab. Unsurpassed for jelly and pickling. Very ornamental.

### All Hardy U. S. Grown Seed

We always delight in showing critical customers our World Brand quality Grimm Alfalfa seed. When they compare it with other high quality seed and then compare prices it is really not necessary to say much more. This quality is prepared for our most critical trade. Our best Corn-Belt Grimm seed goes into it. It contains high colored seed and plump berries. It is our purest grade. It has satisfied exacting customers for years and its value should appeal to every thrifty buyer.

Grimm Alfalfa is generally hardier than Common and wherever winter killing is prevalent, the Grimm is the kind we advise buying. Customers say they get a finer leafier growth and appreciate the measure of value in our World Brand Grimm.

**\$16<sup>50</sup>**  
BU.

## WORLD BRAND QUALITY

If you are an old customer you know that World Brand means our finest and best. There is a sample of World Brand Red Clover enclosed with this book. That will show you the Character of this grade and what kind of seed you may expect when ordering World Brand Corn-Belt Grimm. No matter how exacting you are the seed is guaranteed to please you. Yet our price is not a premium price. Make comparisons. Judge for yourself. If after you receive your shipment you do not consider that you have saved \$1.50 to \$2.50 on every bushel, ship it back and we will refund your money plus freight. A guarantee of savings and satisfactory shipment backs every order we ship. Why pay more for this fine quality seed than Berry's Direct to you prices.

# DAKOTA No. 12 ALFALFA

## WORLD BRAND QUALITY

Dakota No. 12 has long enjoyed a wide popularity. The seed we have for you this year is of World Brand quality and Nebraska grown stock. Consider the high quality of this seed. Ask for samples. Compare values. Thrifty quality buyers should delight in this quality bargain. The price should save you around \$2.00 on every bushel. Shipment guaranteed to please you.

Our Dakota No. 12 alfalfa is not Grimm but is considered by many farmers to be equally hardy and heavier in production. We have many customers who will buy nothing else. They claim it out-yields others and takes a lot of punishment. Seed of Nebraska origin comes from plants that have survived extremes of heat and cold are damaging and drought also takes its toll of weaklings. We consider therefore that in this seed you will secure a type of stock that will give you most satisfactory performance and a stand of rugged character. Supply limited. Early buying is advised.
